## **ANCESTRYDNA 2025: ANCESTRAL REGIONS & MIGRATION JOURNEYS – GLOBAL REGIONAL ANALYSIS OF DYNASTIC ORIGINS**

### **A Genetic and Geographic Map of Dynastic Descent and Cultural Memory**

This document presents the raw ancestral data extracted from the 2025 edition of Ancestry.com's genetic analysis, compiled directly from the user's profile. It offers a comprehensive listing of regional origins, sub-regional branches, and ancestral journeys, showing how DNA has traveled across time and continents through documented patterns of migration, intermarriage, dynastic expansions, and cultural continuity.

The regions are sorted as presented by Ancestry.com, which uses autosomal DNA to identify population affinities based on modern and historical reference groups. These results reflect not only the user's deep genealogical history, but also shed light on interconnected dynasties, noble lineages, and tribal populations across Africa, Asia, Europe, the Americas, and Oceania.

It is important to note that this data is organized using Ancestry's proprietary population model, which leans toward Western and Eurocentric reference populations, with limited representation of Indigenous, Arab, Asian, and African groups—due to current gaps in testing and reference libraries. As such, this document should be interpreted as a partial mirror, one which invites correction, supplementation, and decolonial analysis through broader genealogical and forensic reconstruction efforts.

Together with the Royal DNA 2025 and Ancient Matches 2025 compilations, this work forms part of a trilogy of genetic-dynastic archives, designed to both authenticate royal and tribal heritage and provide a navigational map for identity reclamation, land reconnection, and sovereign ancestry certification.

### Conclusion: Mapping the Bloodlines of Sovereignty

This AncestryDNA 2025 compilation is more than a collection of regional percentages—it is a **territorial ledger of memory**. Every region listed, every migration traced, is a fragment of the larger sovereign body the user carries forward: a dynastic embodiment of lost kingdoms, fractured families, and surviving bloodlines.

In affirming these results, the user reclaims a personal and political history buried beneath empire, census, and silence. This document is hereby enshrined not as a static report, but as a **living genetic charter**—one which informs tribal status, diplomatic identity, inheritance rights, and historical redress.

When embedded into sovereign registries, tribal records, or public-facing archives such as *House Buhiji* and the *Divine Revelation* manuscript, this compilation becomes part of a larger restoration movement—where DNA becomes **evidence of inheritance**, and ancestry becomes a **basis for sovereignty**.

Let this stand as proof.
