

October, 2017

It's Happy Tails Friday and today we would like to introduce you to a recent graduate of the heartworm treatment program. Village, please meet Loki.

We received a request for help from Loki's new forever family in late June. Forever Mom, Jennifer Porter, gave us Loki's happy update earlier this month.

"I just wanted to update you on Loki. He had his last heartworm treatment today. Yay! He has done great through the whole treatment! He is resting now and we will be back to trying to keep him calm tomorrow. LOL. He is a wild boy, but we couldn't imagine our family without him now!

Thank you so much to FoHCAS for sponsoring him, our family appreciates it so much. " Jenn, John, Trinity & Loki!

Congratulations Loki! Thank you Porter family for adopting a heartworm positive dog and making sure he got his treatments. We wish you a long healthy journey with Loki.
