

PRO BEARING

Heavy industry bearing manufacturers.

PRO BEARING group

THE COMPANY

A trained staff ready to support you in every phase of the order

Quality and reliability at a competitive price

Meticulous quality control, to ensure maximum performance even in the most demanding uses

We carefully follow every customer request

PROBEARING

Born from the combination of the motivation of our young partners and a team with global standing in the lifting industry.

Our company began as a retailer of mechanical transmission products, later specializing in manufacturing.

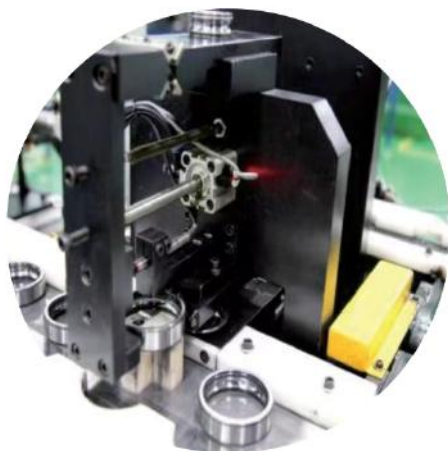

Thanks to strong and long-standing relationships with our customers and suppliers, we are able to offer efficient support at a competitive price.

THE COMPANY

FIELDS

THE PRODUCTION

THE PRODUCTION

It takes place at the PRO BEARING Co. plant located in Henan Province.

Strong commercial relationships and direct, meticulous control over production in both China and Italy allow us to produce a bearing of the highest quality at a highly competitive price.

This allows us to be a dynamic company, ready to solve and supply even difficult-to-manufacture or difficult-to-source parts.

Possibility of producing customized items related to mechanical transmission.

Quality control by certified personnel both at the production site and in Italy

BEARINGS / SLEW BEARING / SPECIAL BEARINGS

We have developed our own complete line of bearings, designed to guarantee construction quality, maximum reliability, and immediate availability.

Our production covers all the main market needs, but does not stop at standards: we are able to manufacture special slewing rings and bearings to design, even in large sizes or with specific technical characteristics.

Thanks to our production flexibility, we support customers in the development of customized solutions, offering a tailor-made service that combines technical expertise, experience, and rapid response.

COUPLINGS/ CARDAN SHAFTS

We manufacture both standard and custom-designed transmission couplings in a wide variety of types: flexible, geared, cardan, and many other custom solutions.

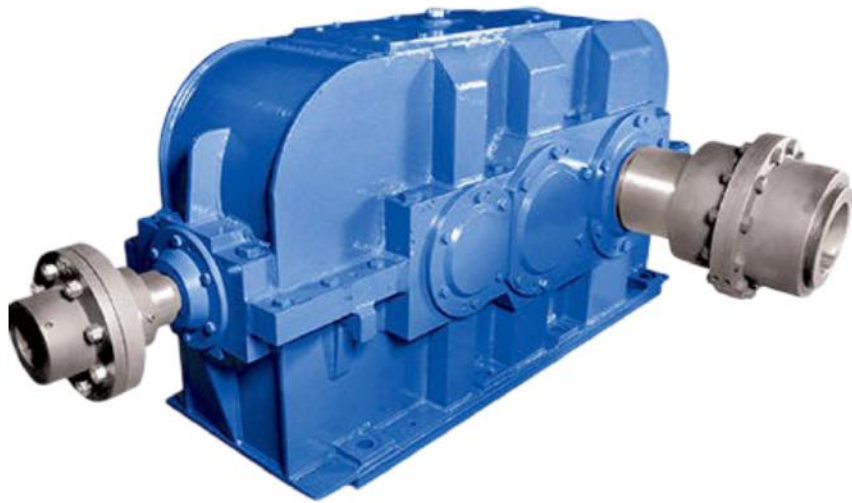

We place no limits on torque capacity or level of customization: each project is developed to precisely meet the customer's specific needs, ensuring maximum flexibility and full coverage of both standard and special requests.

BUSHINGS/CHAINS/BELTS:

We can produce standard and custom bushings in any material, including self-lubricating, bronze, and bronze/graphite solutions, ideal for high-performance applications.

We also supply PRO-ROPE and RMB Catene Industriali brand belts and chains, available in all sizes and even to customer specifications, ensuring reliability, versatility, and maximum customization.

GEARBOXES/GEARBOX OVERHAULS:

We design and manufacture custom and sample gearboxes, rigorously adhering to all standard parameters and technical specifications required by the customer.

In addition to production, we offer a complete overhaul service, with certification and final testing on our test bench, ensuring maximum reliability and optimal performance over time.
