

We Are Committed to Building Playgrounds That Last

Focusing on this generation and the next, we engineer our playground products to be low-impact to the environment, safe, and enduring with the use of reclaimed plastic and stainless steel rather than traditional materials like steel and wood.

STEEL

Rusts, Producing Sharp Shear Edges and Points

Corroding Allows The Paint To Chip Off, Revealing Raw Steel

May Contain Endocrine Disruptors

Walking Surfaces Can Be Slippery

Fades Over Time

WOOD

Cracks and Checks Badly Over Time

Develops Dangerous Splinters and Unsightly Gouges

May Contain Endocrine Disruptors

Requires Extra Maintenance

Fades Drastically In A Short Time

Vandal and Graffiti Resistance

Graffiti Resistant

The solid color-throughout properties of our extruded lumber and flat plastic materials - Recycled Structural Plastic (RSP™) and EcoColor Plastic - ensure that there is no damage to the plastic surface or color when graffiti is removed. RSP™ and EcoColor will not chip, flake, or rust when graffiti is cleaned. Graffiti can easily be removed from all components (Plastic and Metal) with environmentally-friendly graffiti removers. Play Mart recommends Citra-All™: a fully concentrated, all purpose cleaner and degreaser. It cleans without bleaching. It is non-flammable, non-abrasive, contains no phosphates, and meets EPA standards.

Vandal Resistant

RSP™ is “self-healing,” meaning that scratches can be smoothed easily with a pen-knife without removing or damaging color or finish, and can be removed with a heat-gun, with no damage to the RSP™.
