

Product Design Standards

Innovative design and age-appropriate scale is our Design Team’s major focus. The Play Mart design process is continuous in nature, with the Design Team creating new products to match market demand throughout the year. The scale of product designs spans across different age ranges and targeted groups depending on product line. Design efforts are heavily influenced by market trends and customer demand, so there’s always something exciting and new!

Meeting & Exceeding Industry Standards

Our design efforts are centrally focused on compliance and industry standards within the production. We meet the following compliance and industry standards:

- CPSC Guidelines Publication 325
- IPEMA Certification
- American Disability Act Accessibility Guidelines (ADAAG)
- ASTM Standards: F-1487, F-2373, F-1148, CAN/CSA-Z614

Graffiti resistant. Dirt, paint, and even scratches remove easily	Will not rust, splinter, split or de-laminate
Resistant to marine borers, termites, fungus, salt, and oils	Color throughout plastic; no fading or chipping
Stainless steel, vandal-proof hardware	Highly UV and fade resistant
Wrinkle finish powder coating increases friction to reduce falls	Modern color palette
Customizable with modular components	Textured walking surfaces for safety; SureStep™ Decks
10 Year Warranty on RSP Components & EcoColor Plastic Products	High quality metal components have stainless steel welds, electromagnetically “baked on” powder coating
Multiple quality assurance processes in place in our factory	100% BPA, Phthalate, and “soft” PVC free
Prefabricated components; easy installation	Additional stainless-steel reinforcement as needed
