Ramy Elshaboury

ERA DEVELOPMENT
CEO

Ramy Elshaboury, now CEO and owner of ERA Development. Graduating from the Faculty of Commerce in 2005, he started his carrier as a financial accountant, amassing three years of invaluable experience. Driven by his fervor for information technology, Ramy pursued various certifications in information technology field.

His foray into the realm of IT commenced at Arab Bank Egypt, where he began as an IT Operations Officer. then he swiftly ascended to the role of IT Operations Manager during his notable eight-year tenure at Arab Bank. Transitioning thereafter to the Bank of Commerce and Development, Ramy assumed a pivotal role overseeing core banking system operations, administration, and implementation.

Ramy's unique strength lay in his ability to bridge the gap between business and IT realms, drawing from his extensive experience in financial and information technology domains. This fusion facilitated a lucid and comprehensive understanding of the business cycle, making complexities more accessible and facilitating smoother operations. Today, as the CEO and proprietor of ERA Development, Ramy continues to synthesize his expertise, driving innovation and success at the intersection of business and technology.

ABOUT US

ERA Development: Your Trusted Partner in Fintech Consultation and Banking Solutions

Welcome to ERA Development, your unwavering ally in the dynamic world of fintech consultation and banking solutions. With a collective team experience spanning over 15 years in the realms of banking support and development, we arrive equipped with a reservoir of knowledge, a spark of innovation, and an unwavering commitment to excellence, poised to redefine the financial industry.

At ERA Development, we transcend the role of mere consultants; we emerge as the visionary architects of financial transformation. Our seasoned team members, boasting extensive backgrounds in banking, are wholeheartedly dedicated to sculpting tailor-made solutions that empower financial institutions to not just survive but thrive in the ever-evolving digital landscape. We are not just advisors; we are the catalysts for your financial institution's success in the digital era.

VISION & MISSION

Vision

Leading the Way in a Fast-Changing Financial World

The world of finance is changing really quickly, and we're right at the front of this change. Our goal is to lead and enable financial institutions to adjust, expand, and shine in a time when everything is being transformed by technology. We get how modern banking works, and we're determined to assist our clients in using technology's incredible potential to reach their big strategic objectives.

Mission

Guiding Financial Institutions to Thrive in the Digital Age

Our mission is not just to keep up with the times but to lead the way in harnessing the power of technology and innovation for the benefit of our clients. Together, we embark on a journey of transformation, where the challenges of today become the opportunities of tomorrow, and where success is measured by the tangible results achieved in this exciting digital era.

BUSINESS ACHIEVEMENTS

ERA has a multitude of experts in the field of Information Technology. The company specializes in providing essential expertise to ensure the availability of banking and financial systems, surpassing a 99% availability rate for all supported systems.

The company's experts have successfully executed significant projects that have significantly enhanced operational efficiency.

Arab Bank Egypt's Auto-Print Organizer: This system facilitated the availability of daily and real-time reports for all banking operations, simplifying access to crucial information.

Permissions Management System: A tailored system for managing permissions within the infrastructure, enabling comprehensive control over granted permissions to each employee. It offers categorized authorization levels, allowing instant allocation of permissions based on job roles.

implement misys| equation core banking enhancement security : This application segregates permissions into maker and checker roles, preventing actions beyond an employee's limits without the responsible manager's approval through the system. It also mandates the completion of essential data entry before any transaction, preventing fraud and ensuring the security of the bank's system.

IDigital Banking System: This system facilitates various banking services, including inter-account transfers, electronic banking services such as account inquiries, check inquiries, statement printing, online account opening, and other essential banking services required by financial institutions.
