Garrett Magnetometer and Metal Detection

Vista Law Enforcement Training and Consulting, LLC, in cooperation with **????**, has scheduled this **2-hour POST-approved training program**, titled **"Garrett Magnetometer and Metal Detection."** This training program is presented by both current and retired law enforcement personnel who are experts in magnetometer and metal detection. Topics include:

- Technology associated with metal detection devices
- Different types of metal detectors, including handheld and walkthrough, and how each of these devices targets different kinds of objects or contraband
- Necessity to calibrate and conduct regular maintenance on these types of metal detection devices
- How to properly identify and differentiate between types of metal objects vs. illicit contraband
- Proper search techniques for individuals, vehicles, and packages where suspicious items or contraband may be located or observed during these types of screenings
- Various legal aspects and the rights of citizens in the search and seizure of contraband items that are discovered in the personal property of individuals being screened
- Proper methods to document and report items of contraband
- Proper procedures in the handling of hazardous materials discovered during a screening
- In practical training exercises, the proper methods, tactics, and techniques in the screening of individuals and other items or packages utilizing various types of Garrett metal detection devices

This program is designed for all law enforcement, public safety officers, and security professionals, who are charged with the safety and security of screening of individuals entering buildings, structures, or other vulnerable areas. This specialized training ensures security professionals are proficient in the use of the devices to locate weapons, contraband, other metal objects, and hazardous materials that might pose security risks or that may be used in criminal activities.
