### **Bloodstain Pattern Evidence Analysis**

Vista Law Enforcement Training and Consulting, LLC, in cooperation with **????**, has scheduled this **16-hour POST-approved training program, titled “Bloodstain Pattern Evidence Analysis.”** This training program is presented by current and retired law enforcement personnel who are expert forensic scientists, crime scene investigators, homicide detectives, and death investigators. Topics include:

- Missouri Statutes related to death investigations, homicides, and other major crimes
- Duties and responsibilities of first responding officers and investigators
- Interpreting various types of blood evidence discovered at crime scenes
- Locating, identifying, documenting, seizing, and analyzing different types of blood evidence, including blood spat, droplets, smears, prints, soaked, cast-off, misting, etc.
- Utilizing BlueStar, Luminol, and other chemicals or chemical processes to locate and identify blood evidence invisible to the naked eye
- Different methods utilized by forensic scientists to analyze blood evidence at the crime lab
- Actual crime scenes investigated and processed by course instructors
- Practical training exercises in identifying, documenting, and seizing blood evidence
- Practical training exercises in the preparing of crime scene investigative reports
- Proper methods in the investigation of homicides, suicides, accidental, natural, and undetermined deaths, where blood evidence is present, and needs to be analyzed

This program is designed for all law enforcement personnel responsible for investigating and processing crime scenes where blood evidence is present. Classroom demonstrations and practical training exercises are utilized for all participants to demonstrate proficiency in processing various types of blood evidence.
