

TruckChef

24 Volt Microwave Oven

InCab Microwave suitable for 24v. systems

TruckChef, the 24v microwave oven which fits almost any truck perfectly. With a huge 20 litre capacity and 800w cooking output, it's like having the kitchen appliance you used to at home, right there in your truck.

With Samsung discontinuing the RoadMate 24v microwave towards the end of 2013 a huge gap in the commercial vehicle in cab cooking market was left. Kuda UK immediately started to design and develop a full sized 24v microwave oven for use within the cabs of almost every truck.

Towards the beginning of 2014 TruckChef was born. TruckChef has been specifically designed and engineered to fit as many truck cabs as possible, whilst maintaining the maximum cooking capacity and power such as that seen in most domestic microwave ovens.

TruckChef is quickly becoming Europe's fastest selling 24v microwave and shows no sign of slowing down. Backed by a full years warranty and dedicated in house technical team, along with us proudly assembling the microwave right here in the UK, the quality of the product is second to none. In fact, the products quality is so good the failure rate is almost non-existent.

TruckChef boasts some pretty impressive specifications with a huge 20 litre cooking capacity and 800w power output. Using TruckChef feels no different to using your microwave at home.

Features

- ✓ 800w Power Output
- ✓ Finished in a sleek black exterior
- ✓ Assembled in the UK
- ✓ 20 Litre Capacity
- ✓ Dial based control system
- ✓ 6 Microwave Power Levels
- ✓ Cooking End Signal
- ✓ 30 Minute Mechanical Timer
- ✓ Defrost Setting
- ✓ Quick and Easy to fit

Microwave Features Manual

Please note - Instructions for Features, Controls and Cooking only

The control panel on the front of the microwave unit consists of two function operators. One is a timer and the other a power knob.

Power Selector.

You use this knob to choose a cooking power level. It is the first step to start a cooking session.

Timer Selector.

This knob offers visual timing settings. Just select the desired cooking time by turning the knob. Up to 30 minutes per cooking session.

Microwave Cooking.

The TruckChef microwave offers six power levels from which to choose from. You can select and increase the power levels by turning the knob clockwise. The power levels can be classified as the following:

Power Input.	Description.
1. 100%	High
2. 85%	M. High
3. 66%	Medium
4. 48%	M. Low
5. 40%	Defrost
6. 17%	Low

Note - As soon as the timer is turned and the unit has power the oven will start cooking. When selecting times less than 2 minutes, turn the dial past 2 minutes and then back to the desired time. The timer should always be returned to the zero position after use. Check food is piping hot and cooked before consuming. The above power levels are only a guide and should in no way be used to alter any food / meal recommended cooking times.
