

WNY RAPTOR & WILDLIFE CARE, INC.

WHAT WE DO:

- **Rehabilitate and release** injured and orphaned wildlife, particularly birds of prey
- **Raise public awareness** about the importance of wildlife conservation
- **Contribute to wildlife conservation research** as part of the scientific community

WNY Raptor & Wildlife Care is the only WNY wildlife conservation organization affiliated with higher education. Our small size means one-on-one attention and lower stress for our animals.

To meet the demand for wildlife rehabilitation, we need more space!

Your sponsorship will help us build a new 20' x 24' enclosure with space to treat up to **24 additional animals** each year and **expand the variety of species** we can accept for rehabilitation.
