

UNPARALLELED EXPERTISE IN SPINE

Meet Spine Surgeon Dr “K”

Dr. Armen Khachatryan "Dr K" is an established world leader in cervical arthroplasty and is among the first to implant artificial discs in Utah, both in the lumbar and cervical spine. He has devoted his entire career to spinal motion preservation technology, specifically to artificial disc replacements. Dr. Khachatryan has performed more cervical disc replacement surgeries since 2016 than any other surgeon in the United States.

Dr. Khachatryan has an extensive 22-year spine surgical career in minimally invasive surgery, motion preservation technology, artificial disc replacement, and non-fusion technologies for treatment of cervical and lumbar spinal disease. He trained thousands of surgeons in advanced spine surgery solutions and cervical arthroplasty as an international lecturer. He strongly advocates for preserving motion with disc replacement surgery instead of traditional fusion surgery.

Dr. Khachatryan is married to Emily and cherishes every moment with his twin children, Jack and Isabel. He is an avid cyclist, golfer, rower and skier.
