Common Uses:

Arthritis, bronchitis, catarrh, cold sores, colds, coughing, fever, flu, poor circulation, sinusitis.

Cautions

Tisserand and Young indicate that due to its 1,8 cineole content, Eucalyptus Radiata Essential Oil may cause CNS and breathing problems in young children. They caution against using Eucalyptus Radiata Oil on or near the face of children under 10. Their dermal maximum recommendation is 20%. Eucalyptus Oil is very toxic when taken orally (no essential oil should be taken internally without the guidance of a qualified aromatherapy practitioner)
