

Be ready with team member at gate. Foreman will give you a rope (if you didn't bring your own) and saddlebags. Be familiar with contents of saddlebags. You may have your own "horse holders" follow you through course -or- you may hold your reins while on ground if your horse doesn't ground tie. Unless specified, team determines gait and path between obstacles. This is NOT a timed event, but efficiency matters. If youth is on team, adult must drag.

1. Once team before you proceeds to hay loading obstacle #7, work gate to enter – ensure gate is closed.
2. Both team members exhibit pasture covering trot and each jumps different log.
3. Continue ground covering trot (trot judged separately from jumps).
4. One team member drags calf to "branding fire", the other dismounts to brand/vaccinate the calf. Return the calf/rope to original position.
5. Rider starts at cone, ride to feedbunk, drag feedbunk to feed sacks, partner loads sacks, drag to other cone, partner unloads, return feed bunk.
6. Ride to electric fence, repair fence, pound post three times.
7. Load 2 bales of hay into bed of gator.
8. Rider ropes dummy. Once caught, other team member gives a dose of "antibiotics", recoil rope.
9. Work two gates into cattle pens, ensure gates are closed.
10. Both partners walk through cattle pen counting cattle, record number of cattle in notebook. Announce # counted to judge.
11. Work gate, ensure gate is closed.
12. Load one horse into trailer. Both partners wave to judge to signal completion.
