

Biden's legacy will be the "Gaslight President", because it's absolutely a 'corrupt' Presidency.

<https://oversight.house.gov/wp-content/uploads/2022/11/Interim-Staff-Report-A-President-Compromised-The-Biden-Family-Investigation.pdf>

Reading through the 31 page report dated November 17th 2022 by the "Committee on Oversight & Reform" five months after its release I have more questions than answers except for one. My first thought was "is this a leak? Is this a joke? or is this smoke? "While I was being facetious a few weeks ago when I asked if there existed any person surnamed Biden who was not on the corruption payroll? I no longer have to ask that particular question...

This report indicates the "Committee" has not only the "smoking gun", but ALL of the smoking guns on Hunter Biden and by proxy all others surnamed Biden. The investigation that started as an inquiry into Big Tech and the increasing control they exercise over American dialogue and information sharing, particularly one story that became the target the Oct 2020 New York Post story on the laptop previously belonging to Hunter Biden.

REMEMBER Election 2020?

"My son, my family will not be involved in any business, any enterprise that is in conflict with or appears to be in conflict, where there's appropriate distance from the presidency and government," Biden said.

In January 2023, the House Committee officially began its investigation, almost 2 months post this "interim report".

<https://apnews.com/article/biden-technology-politics-united-states-government-us-department-of-the-treasury-b80e36533fa8da85199fe397d2b50d85>

Timing is everything given the trajectory toward financial crisis (the great reset), WWII well on its way, and mass pandemic fraud, this report got no time in the MSM.

MSM are to their credit to this point covering the 4 potential slaps on the wrist of the Biden Prince Hunter.

- three charges related to tax fraud two misdemeanour counts for failing to file taxes and one felony count of tax evasion related to a business expense
- possibly one charge for allegedly lying on a federal form related to a 2018 gun purchase in Delaware

Meanwhile evidence obtained by the Committee on Oversight and Reform Republicans shows:

- President Joe Biden has participated in his family's global business ventures with America's adversaries

- He **has misused his public positions to further his family's financial interests** creating the potential to be susceptible to influence, blackmail, or extortion by foreign entities, including the Chinese Communist Party
- Hunter Biden's abandoned laptop, as well as information from whistleblowers, reveals a **decade-long pattern of influence peddling, national security risks, and political cover-ups**.
- **Biden family members** used their connections with Joe Biden to enrich themselves
- During the final weeks of the 2020 election, **the media's response** to Hunter's abandoned laptop—full of documents, suspicious business deals & details, worth millions of dollars **was not to report it, but to hide it**
- **Big Tech actively suppressed this information on social media**
- Twitter blocked users from posting links to stories about the laptop; it even locked the New York Post
- Facebook used its algorithms to limit the spread
- **Former Intelligence officials now television pundits—labeled the Hunter Biden laptop story as Russian disinformation.**

The Committee also uncovered evidence demonstrating:

- deliberate, repeated deception of the American people,
- abuse of the Executive Branch for personal gain,
- use of government power to obstruct the investigation and prevent transparency,
- potential violations of the United States Constitution's Foreign Emoluments Clause

After starting to review a complete copy of the laptop, they expanded the investigation based on:

1. The Treasury Department's Refusal to Provide Suspicious Activity Reports (SARS) Suggests **Obstruction**

The Treasury Department refused to provide any documents or information. Without the assistance of the Treasury Department, however, Committee Republicans obtained several SARs that implicate Hunter in criminal activity. For example, JP Morgan Chase generated a SAR, which implies Hunter Biden has some connection to a sex trafficking operation and raises troubling questions about what illegal activity the SARs being withheld by the Treasury Department may reveal.

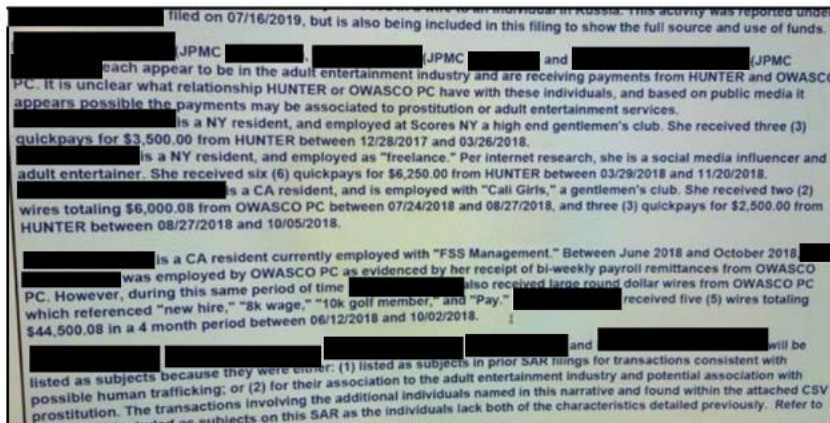

Figure 1: Excerpt of Suspicious Activity Report obtained by Committee investigators and implicating human trafficking in a financial transaction tied to Hunter Biden

While the Biden Administration's Treasury Department publicly claims it is cooperating with Committee Republicans' investigation, this is not true. According to Treasury, SARs are made available to Members of Congress "regardless of party."¹⁴ Treasury has publicly stated it has made SARs "available for every request [they've] received,"¹⁵ but this is not true as not a single request by Republicans working on this investigation has been accommodated.

2. Big Tech's **Censorship** Raises Questions About **Helping the Biden Campaign**
3. The Investigation Has Expanded to Include Biden Family Members and Associates **Profiting Off Public Office**
4. Uncovering Joe Biden's Involvement in and **Knowledge of Hunters Business Deals**
5. Matter of National Security: The **Biden's Connections to Russia and Ukraine Raise Questions Regarding Sanctions**
6. Matter of National Security: The **President's Ties to China and the Chinese Communist Party** Raise Questions of Conflicts of Interest

I concur with their statement, they are FINALLY saying out loud and confirming what we all knew and got punished for reporting: ***"The President has exposed the United States to national security risks that could be leveraged by your enemies to undermine the Office of the President."***

In my best “SHAMWOW” voice, oh but wait... there’s more!

The Committee is fully aware of the existence of additional evidence implicating the Biden family business ventures but has been obstructed in attempts to obtain the information:

- To date, Committee members have sent **over 100 document requests to numerous entities, including the White House and Department of Treasury,**
- The Committee has **not received a single document from the Administration**
- Department of Treasury (Janet Yellen) is in possession of at least 150 Suspicious Activity Reports. Despite numerous formal requests, despite decades of precedent, the **Biden Administration changed policy and now refuses to produce Biden family SARs or to make them available for Committee investigators**
- President Biden and his Administration are **committing obstruction**
- The President **misled the American people during his 2020 campaign**
- They **continue** to be untruthful

As Republicans pointed out in their letter, “The reversal in policy even raised concerns among Democrats, leading Chairwoman Maxine Waters to sponsor a bill requiring Treasury to provide the reports to Congress.”¹⁶ If the President or his agent used the federal government to obfuscate his role in his family’s ventures, he is abusing the power of the Office of the President.

Committee Republicans have written multiple letters to Treasury refining requests for SARs as more information has been uncovered (see, *infra*, Section III.6) regarding the Bidens’ connections to China and the Chinese Communist Party. These requests, too, remain unanswered.

Congressional Democrats have been unwilling to engage or consider the merits of the evidence accrued against the President. Congressional Democrats have not joined Republicans’ letters, have denied Republican requests for subpoenas, and have even voted down attempts to compel the Biden Administration to produce related documents.

In July 2022, Oversight Committee Ranking Member Comer introduced House Resolution 1243, which would have officially requested the President release information about his family and various corporate entities set up to do business around the world.¹⁷ Committee Democrats unanimously voted to prevent the Resolution from going to the House Floor, despite Committee Republicans showing evidence of the Biden family’s connections to China during the Committee mark-up. Of note, no Committee Democrats defended the decision by Treasury to change the policy for providing SARs to Congress.

The White House has given no indication the Administration will cooperate with this investigation. Instead, reports indicate the White House is hiring staff—and spending over a quarter of a million dollars at taxpayers’ expense—specifically assigned to thwart this investigation and other probes.¹⁸

What you have so far is an insult, a Department of Justice contemplating 4 possible charges, two misdemeanours and two felonies, including lying on a federal form to obtain a firearm? It was such an insult an IRS member of the investigatory committee has had enough, and is blowing the whistle: <https://apnews.com/article/hunter-biden-irs-whistleblower-joe-biden-investigation-ce0c0769e61e7b5886af37a0cfa7cc32>

Fact: President Biden has no clothes, and no legitimate place in office. The threat is real, the danger is real, and so is the urgency. Who has any teeth, Where can American's expect any enforcement when the current "guardians of law, order, Justice and the Constitution" have all failed upwards to their lofty and profitable syndicate protection statuses?

Now that the truth is finally being said out loud, the real answer to who has any teeth lies deep in the realm of "Constitutional Historians". The likes of Karl Rove and his puppet Mr Cheney understand still do, it is how this entire mess has been allowed to manifest in the fogs of old "Reconstruction Acts" and "jurisdictions", between "martial rule and martial law". Speaker of the House Kevin McCarthy could end it all with a single statement, he knows it. But, under the Karl Rove principle of "continuity of government" Congress is always closed by the statement "Closed Sine Dei" (without day) which preserves the continuity of the current (fraudulent) jurisdiction. It would end the moment he closed congress with the statement "I close Congress Dejure" but that is another whole story.

There is no time left to "Rubberneck" ...
