

COVID CRIMINAL EVIDENCE FROM DR. SIGOFF AFFADAVIT ON COMIRNATY PFIZER INJECTION FROM AFFADAVIT IN THE LAW SUIT AGAINST DOD AND SECRETARY AUSTEN

SOME OF THE INJECTION INGREDIENTS PUBLISHED BY PFIZER FROM THE LAW SUIT AGAINST DOD

10. As part of my investigation to determine if the only FDA approved biologic, Comirnaty, would be safe for service members and other patients, one must look at the ingredient list which is provided by the package insert (Exhibit B). The first 3 ingredients of Comirnaty are:

1. ((4-hydroxybutyl)azanediyl)bis(hexane-6,1-diyl)bis(2-hexyldecanoate) (alternative names ALC-0315, CAS No. 2036272-55-4)

2. 2-(polyethylene glycol 2000)-N,N-ditetradecylacetamide (Alternative names ALC-0159, CAS No. 1849616-42-7)

3. 1,2-distearoyl-sn-glycero-3-phosphocholine (Alternative name DSPC)

11. On August 24, 2021 the Secretary of Defense, Lloyd J. Austin III, issued guidance for mandatory Coronavirus Disease 2019 Vaccination of Department of Defense Service Members (Exhibit C).

12. The above listed chemicals are lipid-nanoparticles and the DoDI 6050.05 (DoD Hazard Communication Program) will apply for safe handling. The DoDI 6050.05 (Exhibit D) states:

▶ 24.06 / 1.02.46 ◀ 🔍 📄 📄 📄 rumble

THESE THREE INGREDIENTS ARE IDENTIFIED BY FDA AS NOT FOR MEDICAL USE, AND NOT TO BE USED IN ANIMALS. SEE THE CASE DATA. THESE SLIDES ARE FROM THE AFFADAVIT OF DR. SAM SIGOFF IN THAT LAW SUIT.

Dr. Sigoloff Opinion in the affidavit, first ingredient MSDS not for human use

Opinion

14. I have reviewed the Motion for Temporary Restraining Order which discusses the issue of prior immunity benefits outweighing the risks of using experimental genetic therapy Covid 19 Vaccines, together with proposed exhibits and materials cited therein. My opinion on this subject matter, I am drawing my own conclusions as an Army Physician and Medical Director of a Troop Medical Facility. I understand that I am willingly taking on enormous risk to my personal carrier as a physician, however it is balanced with the risk of potentially not stopping the intentional poisoning of our entire fighting force, as directed by the current Secretary of Defense Lloyd J. Austin III.

15. The first ingredient in the FDA approved Comirnaty biologic: ((4 hydroxybutyl)azanediyl)bis(hexane-6,1-diyl)bis(2-hexyldecanoate) (alternative names ALC-0315, CAS No. 2036272-55-4)

1. Two separate material safety data sheets (MSDS) both say that is for research use only and not for human use. (See Exhibit F and G)

SECRETARY AUSTEN, AS SHOWN IN THE ABOVE SLIDE, IS IN VIOLATION OF HIS LEGAL REQUIREMENTS FOR SAFETY IN THE WORK PLACE WITH MANDATING THE INJECTION OF 15. ABOVE, AS SHOWN IN THE MSDS DATA 1. NOT FOR HUMAN USE. THE FAA IS IN VIOLATION OF THEIR LEGAL OBLIGATION TO SAFETY IN THE WORK PLACE HERE, AS IS THE UNION PASS MANAGEMENT. THEY ARE IN VIOLATION OF ARTICLE 86 SAFETY IN THE WORKPLACE.

THE PROVIDED MSDS DATA SHEETS FROM PFIZER ARE INCOMPLETE. PFIZER HAS KEPT OUT THE TOXICOLOGY REPORTS. WHY HAS THE FDA RELEASED THESE COMIRNATY INJECTIONS WITH THE FIRST THREE INGREDIENTS DETERMINED TO “NOT BE FOR HUMAN USE.”

ALL THE TOXICOLOGY INFORMATION IS CURRENTLY CLASSIFIED AS PER THIS SLIDE: AND WHO IS DOING THIS?

- Acute toxicity - Classified based on available data
 - Skin corrosion/irritation – Classified based on available data
 - Serious eye damage/irritation – Classified based on available data
 - Respiratory or skin sensitization – Classified based on available data
 - Germ cell mutagenicity – Classified based on available data
 - Reproductive toxicity – Classified based on available data
 - Specific target organ toxicity - single exposure – Classified based on available data
 - Specific target organ toxicity - repeated exposure – Classified based on available data
 - Aspiration hazard – Classified based on available data
 - Additional information – This information is based on our current knowledge.
- However the chemical, physical, and toxicological properties have not been completely investigated.
- The product is for research use only and for experienced personnel. It must only

be prepared by specially qualified experienced scientists in appropriately equipped and

Dr. Sigoloff states that patent information taken from a simple patent search shows that the DSCP, patent in 2014, was found to cause problems with immune suppression, and problems with disseminated intravascular coagulation.

THE NEXT SLIDE SHOWS THE RESEARCH ON THE THIRD LISTED COMIRNATY INGREDIENT (DSPC) AND THE DETERMINATION THAT IT IS FOR RESEARCH ONLY, NOT FOR HUMAN OR VETERINARY USE.

17. The third ingredient in the FDA approved Comirnaty biologic: 1,2-distearoyl-sn-glycero-3-phosphocholine (Alternative name DSPC, see Exhibit J)

1. The material safety data sheet (MSDS) states:

Relevant identified uses: For research use only, not for human or veterinary use.

18. It is my opinion that the above stated chemicals listed on the package insert for Comirnaty render this product NOT safe to inject into service members nor any humans nor animals.

19. The Secretary of Defense, Lloyd J. Austin III, is in violation of DoDI 6050.05 (DoD Hazard Communication Program) and is choosing to willfully expose the entire United States Department of Defense to chemicals that are not approved for medical use and to a chemical that is not even approved for veterinary use, which may put the ability to defend this country from or foreign or domestic adversaries, in great peril.
