

RemoteVac Packaged Loading System

EQUIVALENT DISTANCE

First Calculate the equivalent distance of the **longest run**. Equivalent distance is used to determine the energy needed to overcome the resistance caused by tubing and fittings.

ITEM	QTY,	CALC.	TOTAL
VERTICLE '			
HORIZONTAL '			
90 D. ELBOWS			
FLEX HOSE			

EQUIVALENT FEET	
-----------------	--

SYSTEM RATE

Add the pounds per hour of all the current and future chambers

--

SYSTEM LOADING STATIONS

Number of current and future loading stations

--	--	--

SELECT PUMP

- RemoteVac - up to 800 pounds per hour or 60 cycles per hour.
- RemoteVac Regenerative, 3.4 HP up to 2000 pounds per hour
