

Did You Know?

Risk Management Is Everyone's Responsibility!

Did you know that risk management isn't just the responsibility of the National Sergeant-at-Arms? Every member plays a role in protecting our sorority.

Risk management means recognizing and preventing situations that could negatively impact our members or the organization. This includes:

- Preventing hazing in all forms.
- Following organizational policies and procedures.
- Promoting respectful communication and conflict resolution.
- Protecting the physical and emotional well-being of every Soror.
- Always representing Lambda Kappa Omega with professionalism.

When every member understands and practices risk management, we create a stronger, safer, and more united sisterhood.

Challenge of the Month:

Ask yourself, "**How can I help create a safer and more welcoming environment for my Sorors?**" Small actions make a lasting impact!

Please include a response.
