COLOR GUIDE

LIST OF MOST POPULAR JR COLORS

Color Code	Synthetic fiber	Heat Resistant Fiber	Human Hair
12FS8 , multi-tonal blend of colors: 12 (light brown), 24B (golden blonde), 102 (platinum, cool), shaded with 8 (med. Brown) at root	More contrast, cooler tone	Warmer, more gold showing with a softer root	Brighter, lighter highlights, less contrast; softer shaded root
4 , dark brown	Less dimension then HD and HH	Slightly warmer then synthetic	(4RN) warmer than synthetic (more gold tones are present), due to lightening process; no textile-like dyes are applied to the hair, therefor the natural warmth is not cancelled out
6 , natural medium brown	Cooler, darker than human hair	Warmer, slightly lighter than synthetic	(6RN), much warmer than synthetic color 6, due to lightening process; no textile-like dyes are applied to the hair, therefor the natural warmth is not cancelled out
8 medium brown	Cooler, darker than human hair	Warmer, slightly lighter than synthetic	(8RN) much warmer than synthetic color 8, due to lightening process; no textile-like dyes are applied to the hair, therefor the natural warmth is not cancelled out
4/33 , equal blend of dark brown and dark red	More contrast, red appears more as a highlight throughout	Warmer than synthetic, more contrast, red appears more as a highlight throughout	Color is more blended than synthetics, appears as more of a dark auburn/red color all over
6/33 , equal blend of medium brown and dark red (auburn)	Red appears more as a light highlight and blended throughout	Warmer than synthetic, red appears more as a highlight throughout	Color is more blended than synthetics, appears as more of a dark auburn/red color all over
8/30 , equal blend of medium brown and medium light red/gold	More contrast, golden/red appears more as a lighter highlight throughout	Warmer than synthetic, more contrast, red appears more as a highlight throughout	Color is more blended than synthetics, appears as more of a light auburn/red color all over
