

REAL-WORLD INCOME SNAPSHOT

Real families. Real Results. Flexible rewarding work

Here's what two actual weeks looked like for our mobile lice removal business — real numbers from September 2025.

The image displays two side-by-side screenshots of a booking app interface. Each screenshot shows a 'Date Range' section with a gear icon and the text 'Change default reporting times'. Below this, there are links for 'Today', 'Yesterday', 'Last 7 days', and 'Last 30 days'. The 'Start' and 'End' date and time fields are filled in, and a 'Search' button is visible below them. Below the date range section is a 'Successful Payments Summary' box with a light green background. The summary for the first week (Sep 16-22, 2025) shows 5 payments totaling \$1,325.00, a tip total of \$87.00, and zero for taxes, fees, service charge, and additional charges. The summary for the second week (Sep 23-29, 2025) shows 11 payments totaling \$3,695.00, a tip total of \$190.00, and zero for taxes, fees, service charge, and additional charges.

One week we treated 5 families and brought in \$1,325, plus \$87 in tips. The next week, we treated 11 families and earned \$3,695, plus \$190 in tips.

These numbers reflect two of us working — some appointments together, some solo. This is our combined total.

That's \$5,020 total in two weeks — about \$314 per visit on average.

Some weeks are slower, some busier — that's part of what makes it so flexible and family-friendly.

These are real screenshots from two consecutive weeks of our booking app (Sept 2025). Together, we treated 16 families in 2 weeks, totaling just over \$5,000 in income — that's an average of about \$314 per visit. That represented about 31 total hours of work (average about \$160 per hour worked).

Results vary based on your area, pricing, and schedule. We've been doing this since 2012 and built a strong word-of-mouth reputation with 390+ Five Star YELPS) — so please use this as a general snapshot, not a guarantee.
