

Quick guide irFFB

Here's a quick guide for IRFF:

Basic Setup

1. Enable IRFF in your sim racing game.
2. Set global gain to 50-70%.
3. Adjust damping and spring to 20-50%.

Advanced Tuning

1. Adjust FFB gain for steering, acceleration, and braking.
2. Fine-tune FFB filtering to reduce unwanted vibrations.
3. Adjust centering spring to control wheel return force.

Game-Specific Settings

1. Assetto Corsa: Adjust FFB gain and damping in options.
2. Project Cars: Adjust force feedback settings in options.
3. iRacing: Adjust force feedback settings in options.

Troubleshooting

1. Weak FFB: Check global gain and FFB gain.
2. Unwanted vibrations: Adjust FFB filtering.
3. Centering issues: Adjust centering spring.

This quick guide should help you get started with IRFF and improve your sim racing experience! Download IRFFB at github.com
