

# MAHER

Factory of the factories

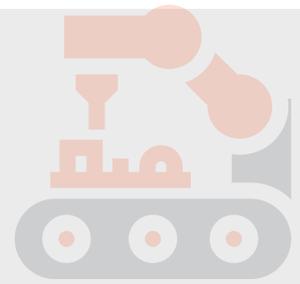

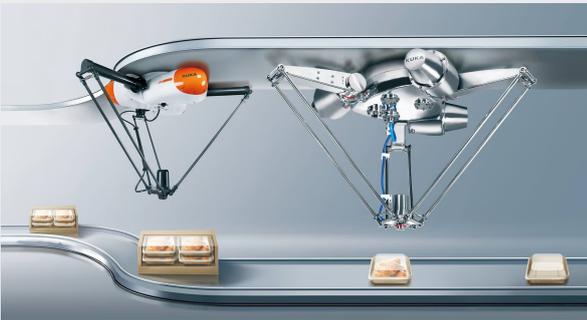

## Company Profile 2024

## Conveying

- Wide range of conveyor systems and applications; using the high-quality materials and design from FlexLink.
- All our conveyors are food grade either Aluminum or SS304.
- We also have pallet conveyor system with the possibility of complete automation system integration.

## Industrial Automation

- We update your machine from the old system to the latest automation solutions.
- We even can provide a complete and new automation solution for manpower reduction.
- Our team has long experience in field of automation in plastic, food and beverages, steel, petrochemicals, and more.

## Packaging solutions

- We provide the suitable packaging solution using the latest technology in vision systems. We use KUKA Delta robot with PickControl software. This allows our solution to be fast in “Pick & Place” and suitable for most of the products. With short cycle time we can reach up to 120 pieces per minuet.
- With a smart solution in carton erecting and sealing leads us to have a very small figure print for our machine.

- Since we love high quality, all our chassis is made from SS304. and we have chosen the top-quality brands, this is to ensure that our machine will sustain for long.

## Palletizing Solution

- We provide single-in/single-out palletizing line for weight up to 15Kg, using KUKA KR40 PA.
- We also provide double-in/double-out palletizing system for total weight up to 120 Kg, using KUKA KR120 to KR240 R3200 PA.
- We provide pallet conveying system, with wrapping machines.
- We have our recommended solution, using AGVs for pallets weight up to 1500 Kg.

**Our factory:**

Al-Adabiah Free Zone, Suez, Egypt.

**Our offices:**

6th of October, Cairo, Egypt.  
Al-Fayha, Riyadh, Saudi Arabia.v
