1.12.080 STORAGE OF TRUCKS IN RESIDENTIAL ZONES PROHIBITED. The storage of more than one truck having a rated capacity of one and one-half tons (except farm trucks) and the storage of construction equipment such as bulldozers, graders, cement mixers, compressors, dump trucks, etc., shall not be permitted on any lot in any residential zone, provided that construction equipment may be stored on a lot during construction of a building thereon, but not to exceed one year.

1.12.090 STORAGE OF JUNK AND DEBRIS IN RESIDENTIAL ZONES PROHIBITED. No yard or other open space surrounding an existing building in any residential zone, or which is hereafter provided around any building in any residential zone, shall be used for the storage of junk, debris, or obsolete vehicles; and no land shall be used for such purposes, except as specifically permitted herein.

1.12.100 ADDITIONAL HEIGHT ALLOWED FOR PUBLIC BUILDINGS. Public buildings and churches may be erected to any height provided the building is set back from required building setback lines a distance of at least one foot for each additional foot of building height above the maximum height otherwise permitted in the zone in which the building is located.

1.12.110 ADDITIONAL SETBACKS FOR LARGE BUILDINGS REQUIRED. Side setbacks for large buildings in residential zones shall be not less than the length of the building wall measured along the side yard, added to twice the average height and divided by ten except that no dwelling shall be set back less than the minimum distance required in the zone.

1.12.120 MUTUAL GARAGES ACROSS LOT LINES. An accessory building such as a detached carport or garage may be constructed across a common lot line by written agreement between the two adjoining property owners when such agreement is recorded in the office of the county recorder.

1.12.130 MUTUAL DWELLINGS ACROSS LOT LINES. In zones in which two-family dwellings are permitted, a two-family dwelling may be constructed across a common lot line when separated on the line by a dividing wall, provided a written agreement between the two adjoining property owners is recorded in the office of the county recorder.

1.12.140 MINIMUM HEIGHT OF DWELLINGS AND FENCES. No dwelling shall be erected which has a ceiling height of less than one story above the average level of the grade on which the dwelling is located. No fence or wall shall be constructed higher than four feet above the grade in any required front or side yard that fronts on a street; provided, however, that fences constructed in side yards that front on streets may be constructed to a height of six feet when located more than fifty feet from the front property line.

1.12.150 CLEAR VIEW OF INTERSECTING STREETS. In all zones which require a front yard, no obstruction which will obscure the view of automobile drivers shall be placed on any corner lot within a triangular area formed by the street property lines and a line connecting them at points thirty-five feet from the intersection of the street lines.

1.12.160 LOCATION OF BARNs. No barn, corral, or coop shall be constructed, unless zoned for such construction.

1.12.170 DRAINAGE. Surface water from roof tops shall not be allowed to drain onto adjacent lots except after written agreement between the two parties.

1.12.180 EFFECT OF STREET PLAN. Wherever a front or side yard is required for a building, which building abuts on a proposed street which has not been constructed but which has been designated by the planning and zoning commission as a future street, the depth of such front or side yard shall be measured from the planned street lines.

1.12.190 EXCEPTION TO FRONT AND SIDE SETBACK REQUIREMENTS. The setback from the street for any dwelling located between two existing dwellings in any residential zone may be the same as the average for said two existing dwellings, provided the existing dwellings are on the same side of the street, and are located within one hundred fifty feet of each other.

1.12.200 CONCESSIONS IN PUBLIC PARKS AND PLAYGROUNDS. Concessions, including but not limited to amusement devices, recreational buildings, and refreshment stands, shall be permitted in a public park or playground when approved by the town council.

1.12.210 SEWAGE DISPOSAL. Where domestic sewage facilities are to be used which are not connected to a public sewer, approval of such facilities shall be obtained from the town manager before a building permit may be issued.

1.12.220 LOCATION OF GASOLINE PUMPS. Gasoline pump islands shall be set back not less than eighteen feet from any street line to which the pump island is vertical and twelve feet from any street line to which the pump island is parallel and not less than twelve feet from any residential zone boundary line. If the pump island is set at an angle on the property, it shall be so located that automobiles stopped for service will not extend over the property line. In no case shall pumps be set closer than twelve feet to any street line, nor closer than twelve feet to any side or rear property line. Lots from which gasoline is dispensed to customers at retail shall be not less than seventy-five feet in width nor less than one hundred feet in length.

1.12.230 OFF-STREET PARKING AND LOADING. The following regulations are established to increase safety and lessen congestion in the public streets, to provide adequately for parking needs associated with the development of land and increased automobile usage, to set standards for off-street parking according to the amount of traffic generated by each use, and to reduce on-street storage of vehicles.

A. Number of spaces. The following required off-street parking spaces for the particular use are minimum requirements:

1. a. Residential structures, not including boarding and rooming houses, shall have at least one off-street parking space per dwelling unit.

b. As a means of encouraging the occupants of multiple dwellings to use the required off-street parking space in preference to on-street parking space, entrances to buildings containing multiple dwellings shall be provided in locations that are as direct and convenient to the required off-street parking spaces as are the fronting streets;

2. Boardinghouses shall have one parking space for each two hundred square feet of floor space devoted to bedrooms or one space for each two persons' domiciles in the premises, whichever is greater;

3. Convalescent, nursing, and other such institutions shall have one visitor parking space per three patient beds, plus one parking space for each employee at work in the home during daylight hours;

4. Hotels and motels shall have one parking space per room or suite, plus one parking space for each employee at work on the premises during daylight hours;

5. Private clubs and lodge halls shall have one parking space per three members, based on the design capacity of the facility;

6. Churches shall have one parking space per five seating spaces in the main assembly room;

7. Theaters, auditoriums, sports arenas, and places of assembly shall have one parking space per two people based on the design of the structure;

8. Mortuaries or funeral parlors shall have twenty parking spaces or one space for each twenty-five square feet of floor space in all assembly rooms, whichever is greater;

9. Medical clinics shall have three parking spaces per staff doctor, plus one parking space for each nondoctor employee at work on the premises during daylight hours;

10. Restaurants, taverns, and lounges shall have one parking space per three hundred square feet of floor area;

11. Professional offices, except clinics, shall have one parking space per four hundred square feet of office floor area;

12. Government buildings shall have one parking space per each employee plus one space for each four hundred square feet of floor area in the building;

13. Retail stores and personal service shops and other business buildings not specifically mentioned elsewhere in this subsection shall have parking space at the rate of three spaces per one thousand square feet of floor area;

14. Drive-ins (retail) shall have at least twelve off-street parking spaces, or sufficient off-street parking spaces to accommodate all patrons or customers, whichever is greater. No patron or customer may be served in automobiles which are parked on public streets;

15. Industrial, manufacturing, and wholesale establishments shall have one parking space per two employees based on the largest shift;

16. Uses Not Mentioned. The required off-street parking for any building, structure or use of land of a type which is not listed in this subsection shall be determined by the board of adjustment under its power of interpretation. The board of adjustment shall be guided by comparison with the requirements for similar uses which are listed.

B. Location and Control of Parking Facilities. Off-street parking facilities required by this title shall be located on the same lot or parcel of land as the use they are intended to serve, except that in cases of practical difficulty for uses other than dwellings, the board of adjustment may approve a substitute location which meets the following conditions:

1. All or part of substitute location must be on an adjacent lot or within two hundred feet from the main use measured along or across a public street;

2. The substitute lot must be in the same possession as the use it is intended to serve and must be maintained as long as the use or structure exists. Such possession may be by deed or long-term lease (at least twenty years). Where parcels or tracts of land are not a part of the plot on which the principal use lies, the applicant shall submit with his application for a building permit an instrument duly executed and acknowledged, which subjects said parcels or tracts of land to parking uses in connection with the principal use for which it is made available. The applicant shall deposit the necessary recording fee, and upon the issuance of a building permit, the zoning administrator shall cause said instrument to be recorded in the office of the county recorder;

3. Not more than thirty percent of the area contained within a required front yard or side yard adjacent to a street in any residential zone may be used for driveways or for the parking of automobiles.

C. Computation of Required Parking Spaces. For the purpose of computing off-street parking spaces which are required by this title, the following rules shall apply:

1. "Floor area" means gross floor area, unless otherwise specified for a particular use;

2. In stadiums, sports arenas, churches, and other places of assembly in which benches or pews are used in place of seats, each eighteen inches of length of such benches or pews shall be counted as one seat.

D. Combined Parking Areas. The required off-street parking and loading facilities may be provided collectively for two or more buildings or uses, provided that the total number of parking spaces shall be not less than the sum of the requirements for each of the individual uses.

E. Mixed Uses. In the event that two or more uses occupy the same zoning lot, or parcel of land, the total requirements for off-street parking and off-street loading space shall be the sum of the requirements of the various uses computed separately.

F. Access to Parking Facilities.

1. Access driveways shall be provided for ingress to and egress from all parking and loading facilities. Each parking and loading space shall be easily accessible to the intended user;

2. Forward travel to and from parking facilities from a dedicated street or alley shall be required for all uses, except for parking which has been provided in connection with one and two-family dwellings. The parking area shall be adequate to facilitate the turning of vehicles to permit forward travel upon entering a street;

3. Access to all off-street parking facilities shall be designed in a manner which will not interfere with the movements of vehicular and pedestrian traffic.

G. Circulation Within a Parking Area. Circulation within a parking area shall comply with the following requirements:

1. Parking area with more than one aisle must be so arranged that a car need not enter the street to reach another aisle within the same parking area;

2. Directional signs shall be required to differentiate between entrances and exits to the street.

H. Location of Parking Facilities Restricted. Parking and loading facilities may be located any place on the premises except for areas that are required to be landscaped. Off-street parking space which is required in connection with a use shall be construed to be part of that use and shall not be located within another zone unless expressly permitted therein.

I. Lighting of parking Areas. Any lighting used to illuminate off-street parking facilities or vehicle sales areas shall be so arranged as to reflect the light away from the adjoining premises in any residential zone.

J. Continuing Obligation. The required off-street parking and loading facilities shall be a continuing obligation of the property owner so long as the use requiring vehicle parking or loading space continues. It is unlawful for an owner of any building or use to discontinue or dispense with the required vehicle parking or loading space without providing other vehicle parking or loading space which meets the requirements of this title.

K. Plot Plan Approval Required. At the time a building permit is requested for any building or structure, or at the time the use of land is changed which requires additional off-street parking space, a plot plan shall be submitted showing the location and layout of such required space along with access aisles, roadways, curbs and curb cuts. The zoning administrator shall disapprove such plans if he finds that the required spaces are not usable for standard sized automobiles or do not comply with the requirements for off-street parking as set forth in this title.

L. Landscaping Required. Except in commercial zones, all off-street parking lots for five or more vehicles shall be bordered by a curb and hedge as directed by the zoning administrator. A landscaped strip at least three feet in width may be substituted in lieu of a hedge.

M. Off-street Loading Space Required. For every building having a gross floor area of five thousand square feet or more to which goods, material, merchandise, or supplies are received or distributed by vehicle, there shall be provided at least one off-street loading space. One additional loading space shall also be provided for each additional twenty thousand square feet of gross floor area of such building or for each vehicle which must be loaded or unloaded at the same time, whichever requirement is greater. Each required off-street loading space shall be not less than ten feet in width, twenty-five in length, and fourteen feet in height.

1.12.240 MOTOR VEHICLE ACCESS. Access to all lots and parcels of land having frontage on a public street shall be controlled as follows:

A. Access shall be by not more than two driveways from any one street;

B. Driveways shall be not closer to each other than twenty feet unless a greater distance is required elsewhere in this title;

C. Each driveway shall be not more than thirty feet in width in any commercial or industrial zone measured at right angles to the centerline of the driveway, except as increased by permissible curb return radii. In residential zones, driveways shall be not more than twenty feet in width, except as may be approved for a large-scale development;

D. On corner lots, no driveway shall be closer than twenty-five feet to the point of intersection of the front property line with the side property line which abuts upon a street;

E. Where there is no existing curb and gutter or sidewalk, a curb or fence may be required by the town.

1.12.250 LANDSCAPING REQUIRED. Front yards and side yards of all dwellings which front on public streets must be landscaped except for the area which is devoted to driveways and off-street parking space.

1.12.260 INTENT OF LANDSCAPING REQUIREMENTS. A. The purpose of the landscaping requirements in this title shall be to enhance, conserve, and stabilize property values by encouraging pleasant and attractive surroundings and thus create the necessary atmosphere for the orderly development of a pleasant community. Landscaping also contributes to the relief of heat, noise, and glare through the proper placement of green plants and trees.

B. Required landscaping areas shall be maintained in a neat, clean, orderly, and healthful condition. This includes proper pruning, mowing of lawns, weeding, removal of litter,

fertilizing, replacement of dead plants and the regular watering of all plantings. All landscaped areas for multiple-family dwellings shall be provided with piped water lines terminating in an appropriate number of sprinklers or hose bibs to insure a sufficient amount of water to sustain plants within the landscaped areas, except as otherwise permitted by the zoning administrator;

B. Landscaped screening shall consist of evergreen shrubs, closely spaced and maintained at substantially the specified height. Screening shall consist of mature shrubs and shall be maintained at a height of from four to six feet, unless otherwise permitted;

C. Where landscaping is required in this title, a planting plan showing the location and name of plant materials, or other materials, and watering system shall be submitted to the zoning administrator, except that a planting plan shall not be required for one-family dwellings. The same plot plan used to show parking layout or other requirements for the issuance of a building permit may be used to show landscaping, provided all proposed landscaping is detailed adequately on said plot plan. The zoning administrator may disapprove such plans if he determines that they are not consistent with the intent of this title;

D. Any use of property, which, on the effective date of the ordinance codified herein, is nonconforming only as to the regulations relating to landscaping may be continued in the same manner as if the landscaping were conforming.

1.12.270 SIGNS. Advertising signs shall be regulated as follows:

A. Signs in Residential Zones. No advertising signs of any kind shall be permitted in any residential zone, except signs pertaining to the sale or lease of residential property, and except for name plates or signs indicating the existence of a home occupation. Temporary signs pertaining to the sale or lease of residential property shall not exceed thirty-six square feet. Name plates and/or signs used in connection with a home occupation shall not exceed two hundred twenty-six square inches;

B. Setback. All signs or parts thereof shall be set back from public streets a distance at least equal to the distance that buildings are required to be set back within the zone in which said signs are located;

C. Free-standing Signs. All free-standing and accessory signs which are not attached to main buildings shall be maintained in accordance with town standards;

D. Signs Restricted. All nonaccessory signs which are located within six hundred sixty feet from the right-of-way of any federal or state highway must first be approved

by the State Highway Department before a permit therefor shall be given by the zoning administrator. This regulation shall not be construed to affect the use of signs which are not visible from such highways.

1.12.280 TEMPORARY USES AND STRUCTURES. The following regulations shall govern the operation of certain transitory or seasonal uses:

A. Application for a temporary use permit shall be made to the zoning administrator, and shall contain the following information:

1. A description of the property to be used, rented, or leased for the temporary use, including all information necessary to accurately portray the property;

2. A description of the proposed use;

3. Sufficient information to determine the yard requirements, sanitary facilities, and availability of parking space to service the proposed use.

B. The following are temporary uses and are subject to the following specific regulations and time limits, in addition to the regulations of any zone in which the use is located:

1. Carnival or Circus. When authorized by the town council, a temporary use permit for a carnival or circus may be issued in any zone, for a period not longer than fifteen days;

2. Christmas Tree Sales. A temporary use permit, when authorized by the town council, may be issued for the display and open-lot sales of Christmas trees for a period not longer than forty-five days;

3. Contractor's Office and Equipment Sheds. In any zone, a temporary use permit may be issued for a contractor's temporary office and equipment sheds incidental to a construction project. The permit shall be valid for not more than one year but shall be renewable for one year. The office or shed shall be removed upon completion of the construction project;

4. Real Estate Sales Office. In any zone, a temporary use permit may be issued for a temporary real estate sales office in any new subdivision or large scale development which has been approved in accordance with town regulations. The permit for such office shall be valid for not more than one year but is renewable for up to three years. The office shall be removed upon completion of the development. A model home may be used as a temporary sales office.

1.12.290 TRAILER HOUSES OR MOBILE HOMES PROHIBITED--EXCEPTIONS. No occupied trailer house or mobile home shall be placed on any lot or parcel of land within the town except in compliance with one or more of the following conditions:

A. When temporarily located on a lot on which a building is being constructed, but not to exceed one year, provided that a bond or a mortgage on the trailer house or other property in the amount of two hundred dollars shall first be posted with the town guaranteeing the removal of the trailer house from the lot within one year from date of permit;

B. When placed in an approved mobile home park or travel trailer court;

C. When placed in an approved mobile home subdivision;

D. When located in the R-3-A and R-3-M zones and all of the regulations of the R-3-A and R-3-M zones are complied with pertaining to area and width of lot, size of yards and height and size of buildings.

1.12.300 PERMIT HOME OCCUPATIONS. The board of adjustment may grant a permit for a home occupation subject to the following conditions:

A. A home occupation is permitted in the zone;

B. The home occupation is conducted entirely within a dwelling and is carried on in the dwelling only by members of the residing family;

C. The home occupation does not involve the use of any accessory buildings or yard space for storage or activities outside the dwelling not normally associated with residential use;

D. No commercial vehicles are used except for one delivery truck which does not exceed three-fourths ton rated capacity;

E. The home occupation is clearly incidental and secondary to the use of the dwelling for dwelling purposes and does not change the character of the building from that of a dwelling;

F. Signs are limited to one sign not larger in area than two hundred twenty-six square inches;

G. Not more than the equivalent of twenty-five percent of the ground floor area of the dwelling is devoted to the home occupation;

H. The home occupation is registered with the town license division or department;

I. Entrance to the home occupation from outside shall be the same entrance normally used by the residing family, except when required otherwise by regulation of the State Health Department or other public agency;

J. The physical appearance, traffic and other activities in connection with the home occupation is not contrary to the objectives and characteristics of the zone in which the home occupation is located and does not depreciate surrounding values as determined by the board of adjustment.

1.12.310 UTILITY BUILDINGS AND STRUCTURES PERMITTED IN RESIDENTIAL ZONES. Utility buildings and structures such as water, sewer and electric buildings and structures may be constructed in all residential zones only after approval by the board of adjustment. The board of adjustment may require conditions which are reasonably necessary to protect surrounding property values and residential amenities.

1.12.320 DWELLING SITES TO HAVE FRONTAGE ON A PUBLIC STREET. At least one side of each lot used as a dwelling site shall abut upon a public street which will provide access to the dwelling, except in large scale developments, and the length of such abutting side, measured at the required setback line shall be at least as great as the width required for dwelling sites in the zone in which such building site is located. The board of adjustment may permit a dwelling to be built upon a lot which does not front upon a street subject to the following conditions:

- A. The entire front of the building can be viewed from a public street;
- B. The building is constructed at least twenty-four feet from the nearest building on the same or adjoining lot;
- C. The development will not cause undue concentration of population;
- D. In the opinion of the board of adjustment, values in the area will be safeguarded adequately.

1.12.330 USES PROHIBITED IN ZONES UNLESS EXPRESSLY PERMITTED. Uses of land which are not expressly permitted within a zone are expressly prohibited therein, except as may be permitted by action of the board of adjustment pursuant to express authority given under the terms of this title. Where the board of adjustment determines a use to be similar to other uses permitted in the zone, such use shall thereafter be deemed to be permitted just as if it were listed therein on the effective date of the ordinance codified in this title.

1.12.340 MOVED BUILDINGS. A. No permit shall be issued for the moving of any residential, commercial, or industrial building, which has had prior use, from one site within the town to another site within the town or from a site outside of the town to a site within the town, without first filing an application with the zoning administrator.

- B. The following information shall be filed with the zoning administrator at the time the application is made:
- 1. Location and address of the old and new site;
  - 2. Plot plan of the new location showing adjacent lots on all sides of the property;

3. Plans and specifications for the proposed improvements at the new location, including plans for landscape treatment.

C. The application shall then be submitted to the board of adjustment for approval.

D. Before the board of adjustment may approve an application for the moving of a building onto a lot within the town, it must find:

1. That the building will have no appreciable detrimental effect on the living environment and property values in the area into which the structure is to be moved;

2. That the building and the lot on which the building is to be located will conform to the requirements of this title and building code;

3. That all required dedications and improvements for streets and other facilities shall be provided in conformity with town standards.

E. The building and grounds shall be brought up to the standards required of new buildings before being occupied.

F. Before a permit to move a building may be granted, the applicant shall post a bond or other assurance as determined by the board of adjustment to cover costs of bringing the buildings and grounds up to standard. In the event of failure to comply with conditions required by the board of adjustment, the town council may declare the bond or other assurance forfeited and use the proceeds therefrom in performing the work.

G. The bond shall also cover the costs involved in cleaning up the vacated site and restoring it to a safe and sightly condition.

1.12.350 PERMIT REST HOME. The board of adjustment may permit a rest home in zones in which such uses are permitted, provided the lot is at least one hundred feet wide, contains at least one-half acre of land; the building is located at least fifty feet back from the front lot line; and in the opinion of the board, will not depreciate surrounding values.

1.12.360 REQUIRED BUFFER. Any new commercial development (H-1, CC-1, CC-2, GC-1, I-1, and I-2) on property adjoining a residential zone (R-1, R-2, R-3-A, and R-3-M) shall provide a sight-obscuring fence and/or other satisfactory buffer, and landscaping to insure compatibility with and provide protection to the neighboring residential zone. The buffer and landscaping which the developer proposes shall be clearly indicated on the building permits application, and shall be reviewed and approved by the planning and zoning commission before construction can begin.

- I-2 Industrial Zone
- RR-1 Recreational Residential Zone

1.20.020 OFFICIAL ZONE MAP. A. The location and boundaries of each of the zones are shown on the official zone map of the town and the map is declared to be an official record and a part of this title and the official zone map and all notations, references and other information shown thereon shall be identified by the signature of the mayor and attested to by the town clerk and shall be as much a part of this title as if the matters and other information set forth by said map were fully described therein.

B. Whenever amendments or changes are made in zone boundaries such amendments or changes shall be made on the official zone map promptly. No amendment or change shall become effective until after it has been properly noted and attested to on the official zone map.

C. No changes of any nature shall be made in the official zone map except in conformity with the procedure set forth in this title. Any unauthorized change of whatever kind by any person or persons shall be considered a violation of this title and punishable as provided in this title.

D. Regardless of the existence of purported copies of the official zone map which may from time to time be made or published, the official zone map which shall be located in the office of the town manager shall be the final authority in determining current zoning status.

1.20.030 BOUNDARIES OF ZONES. Where uncertainty exists with respect to the boundaries of various zones, the following rules shall apply:

A. Where the intended boundaries on the official zone map are approximately street or alley lines, said street or alleys shall be construed to be the zone boundaries;

B. Where the indicated boundaries are approximately lot lines, said lot lines shall be construed to be the zone boundaries unless otherwise indicated;

C. Where land has not been subdivided into lots, the zone boundary shall be determined by the use of the scale of measurement shown on the official zone map;

D. Where other uncertainty exists, the board of adjustment shall interpret the official zone map.

1.20.040 REGULATIONS WITHIN ZONES. Within each of the zones, the use, location, height, and size of buildings and structures, the use of land and size of lots, yards, courts, and other open spaces and the density of population are regulated as set forth in the following chapters of this title.

CHAPTER 1.16

GENERAL LAND AND BUILDING PROVISIONS

SECTIONS:

- 1.16.010 Intent.
- 1.16.020 Nonconforming building and uses.
- 1.16.030 Nonconforming lots of record.
- 1.16.040 Amendments to title and map.

1.16.010 INTENT. The intent of this chapter is to accumulate provisions applying to all land and buildings within the town into one chapter rather than to repeat them several times.

1.16.020 NONCONFORMING BUILDINGS AND USES. A. In view of the fact that no further development or change in use can be undertaken contrary to the provisions of this title, it is the intent of this title that nonconforming uses shall not be increased nor expanded except where a health or safety official, acting in his official capacity, requires such increase or expansion. Such expansion shall be no greater than that which is required to comply with the minimum requirements as set forth by the health or safety official. Nevertheless, a nonconforming building or structure or use of land may be continued to the same extent and character as that which legally existed on the effective day of the applicable regulations. Repairs may also be made to a nonconforming building or to a building housing a nonconforming use.

B. A nonconforming building or structure and a building or structure occupied by a nonconforming use which is damaged or destroyed by fire, flood, or other calamity or act of nature, may be restored, and the building or structure or use of such building, structure, or part thereof may be continued or resumed, provided that such restoration is started within a period of six months from the date of destruction and is diligently prosecuted to completion. Such restoration shall not increase the floor space devoted to the nonconforming use over that which existed at the time the building became nonconforming;

C. A nonconforming building or structure or portion thereof or a lot occupied by a nonconforming use which is, or hereafter becomes abandoned or is discontinued for a continuous period of six months or more shall not thereafter be occupied, except by a use which conforms to the regulations of the zone in which it is located;

D. Any nonconforming use or nonconforming building which has been changed to a conforming use or building

shall not thereafter be changed back to a nonconforming use or building;

E. A nonconforming use of a building or lot shall not be changed to another nonconforming use whatsoever. Changes in use shall be made only to a conforming use;

F. The provisions pertaining to nonconforming uses of land and buildings shall also apply to land and buildings which hereafter become nonconforming due to an amendment in this title;

G. Notwithstanding the issuance of a permit therefor, no building which becomes nonconforming upon the passage of the ordinance codified in this title or which becomes nonconforming due to an amendment to this title shall be built unless construction has taken place thereon to the extent of at least five hundred dollars in replaceable value by the date on which the ordinance codified herein or said amendment becomes effective. "Replaceable value" means the expenditure necessary to duplicate the materials and labor at market prices.

1.16.030 NONCONFORMING LOTS OF RECORD. Notwithstanding any other provision of this title, a one-family dwelling may be constructed on any lot of record in any zone in which dwellings are permitted, even though such lot fails to meet the area or width requirements for one-family dwellings within the zone. Where two or more contiguous lots of record, having continuous frontage, are owned by the same person at the time of the passage of the controlling ordinance, the land included in the lots shall be considered to be an undivided parcel and no portion of said parcel shall be used as a dwelling site or sold which does not meet the area and width requirements of the zone in which the lot is located. Yard dimensions and other requirements not involving area or width shall conform to the regulations of the zone in which the lot is located.

1.16.040 AMENDMENTS TO TITLE AND MAP. A. This title, including the map, may be amended, but all proposed amendments shall be submitted first to the planning and zoning commission for its recommendations, which recommendations shall be submitted to the town council for its consideration within a reasonable time.

B. Any person seeking an amendment of this title or map shall submit to the planning and zoning commission a written application on forms furnished by the town designating the change desired and the reasons therefor, and shall pay a filing fee of fifty dollars to the town. Upon receipt of the application and the payment of the filing fee, the planning and zoning commission shall consider the request and shall certify its recommendations to the town council. Failure on the part of the planning and zoning commission to

certify its recommendations to the town council within thirty days from receipt of the petition shall be deemed to constitute approval unless a longer period is granted by the town council. The fee required herein shall not be returned to the applicant. The planning and zoning commission, manager, or town council may also initiate amendments to this title without payment of the filing fee;

C. All amendments to this title shall be made in accordance with the comprehensive plan of land use. It is public policy that this title shall not be amended unless it can be shown that changed or changing conditions make the proposed amendment reasonably necessary to the promotion of the purposes of this title;

D. Amendments to this title may be adopted only after a public hearing in relation thereto before the town council at which parties in interest and citizens shall have an opportunity to be heard. A notice of the time and place of such hearing shall be published in a newspaper of general circulation within the town as required by law.

The primary objectives in establishing this zone are to separate industrial uses from residential and related uses and to promote the economic well being of the people. In an effort to protect surrounding residential and commercial uses, certain types of industrial uses have been excluded, such as industries which are hazardous or which are offensive due to excessive odors, vibration, dust, or other emissions. Hotels, schools, churches, dance halls, liquor dispensing

establishments and certain other uses have been excluded from the I-1 industrial zone because of the adverse effects upon such uses when they are allowed to commingle.

for the care and keeping of domestic animals located on the rear part of the lots. In an effort to protect the health of the inhabitants and to prevent the emission of excessive odor and dust, limitations as to number of domestic animals and proximity of such pens and stables to dwellings have been imposed. Even so, it can be expected that a certain amount of odor and dust will be present in the zone, and people who construct dwellings or live therein should bear this in mind.

B. In order to accomplish the objectives and purposes of this title and to stabilize and protect the essential characteristics of this zone, the following regulations in this chapter shall apply in the RR-1 recreational residential zone.

B. All barns, coops, and feeding facilities for the care and keeping of animals and fowl shall be located on the back one-third of the lot. All corrals, pens or other fences shall be located on the back one-half of the lot. All animals and fowl and facilities for their care and keeping shall be subject to the rules and regulations of the town health officer.

B. The tract shall contain not less than five acres. Density shall not exceed ten units per acre;

C. Pavement widths for roadways within the camp shall be not less than twenty-four feet where on-street parking is prohibited, or thirty feet where on-street parking is permitted. Pavement widths of all travelways that serve twenty or more parking spaces shall be not less than twenty-four feet;

D. Open space between two paralleling or nearly paralleling buildings shall be not less than the sum of the lengths of the two buildings added to twice the average heights, divided by ten, except that no two residential buildings shall have any point less than twenty feet apart;

G. All farm labor camps shall conform to the requirements set forth by the Arizona State Health Department. They shall also conform to the codes which have been adopted by the town;

H. Property development standards in excess of the minimum standards herein specified may be imposed where it is determined by the town council that such increased standards are necessary in order to insure that the development will mesh harmoniously with adjoining or nearby uses of property and are necessary to accomplish the intent of farm labor camps. In the event that a developer does not desire to comply with the requirements of this chapter in obtaining approval of his camp, he may develop his land in accordance with the requirements of the surrounding zone in which the camp is located.

1.88.140 PLANNING AND ZONING COMMISSION REVIEW. The planning and zoning commission shall review the preliminary plan of any large scale development. In considering the plan, the planning and zoning commission shall make sure:

A. That the development is consistent with the comprehensive plan for the town;

B. That the development will constitute a living environment of sustained desirability and stability;

C. That the development will not produce a volume of traffic beyond the capacity of the surrounding street system;

D. That requirements for utilities, off-street parking, traffic circulation and other public requirements will be adequately met; and

E. That the design criteria and intent of this chapter shall be adequately complied with.

#### 1.88.150 APPROVAL OR RETURN OF PRELIMINARY PLANS.

Within sixty days from the date of submission, the planning and zoning commission shall review the preliminary plan and documents and shall either approve as submitted or shall refer them back to the developer for one or more of the following reasons:

A. The development has been found to be inconsistent with either this title or the comprehensive plan;

B. The planning and zoning commission requires that certain specific changes be made in the plans;

C. The plans or documents have not been completed.

#### 1.88.160 RECOMMEND CHANGE OF ZONE.

Upon approval of the preliminary plan of a large scale development, the planning and zoning commission shall recommend to the town council that the zone map be amended. The town council shall then hold a public hearing thereon in accordance with Section 1.16.040 of this title.

#### 1.88.170 DURATION OF PRELIMINARY PLAN APPROVAL.

In the event that the town council approves a change in the zone map covering the territory described in the large scale development, approval of the preliminary plan shall be valid for one year unless changing conditions require said approval to be rescinded by the town council in which case notice of such actions shall be given to the owners of the property. If a final plan covering all or part of the territory covered in the preliminary plan has not been submitted within one year from the date of preliminary approval, the development will be deemed to be abandoned. Thereupon, the planning and zoning commission shall recommend that the territory included in the original plan be rezoned.

#### 1.88.180 STAGE CONSTRUCTION PERMITTED.

Development may be carried out in progressive stages in large scale developments in which event each stage shall be so planned that the requirements and intent of this title shall be fully complied with at the completion of each stage. No

final plan for the initial stage shall cover less than minimum area required.

1.88.190 FINAL SITE PLAN AND DOCUMENTS. A. Within one year after approval of the preliminary plan, the developer shall submit to the planning and zoning commission a final site plan of either the entire large scale development or the first stage of such development. Such plan shall:

1. Conform to the approved preliminary plan;
2. Include all appropriate dimensions;
3. Include a landscape plan;
4. Contain all of the information required by this

title, as well as all applicable information and plans required by the subdivision and building code ordinances of the town.

B. Properly signed documents shall also be presented with the final site plan.

1.88.200 BUILDING PERMIT. No building permit shall be issued within said large scale development until final plans have been approved by the planning and zoning commission and the final documents filed in the office of the county recorder and until the bonds required under Section 1.88.210 shall have been posted. One copy of the final plan shall be retained in the office of the planning and zoning administrator.

1.88.210 GUARANTEES AND SAFEGUARDS. A. In order to insure that large scale developments will be constructed and maintained in an acceptable manner, developers shall post a bond, or mortgage or other valuable assets with the town, acceptable to the town manager, in an amount equal to the estimated cost of constructing and installing:

1. All required landscaping;
2. Street improvements, and hardsurfacing including automobile parking areas;
3. Curbs;
4. Parks and playgrounds;
5. Water, sewer and gas lines as shown on the approved final site plan. Estimates of cost shall be determined by a registered engineer and construction of all required improvements shall be completed within two years from date of final site plan.

B. In the event the developer defaults or fails or neglects to satisfactorily install the required improvements within two years from the date of approval of the plat by the town council or to pay all liens in connection therewith, the town council may declare the bond or other assurance forfeited and the town may install or cause the required improvements to be installed using the proceeds from the collection of bond or other assurance to defray the expense thereof.

C. The developer shall be responsible for the quality of all materials and workmanship. At the completion of the work, or not less than ten days prior to the release date of the bond or other assurance, the town engineer shall make a preliminary inspection of the improvements and shall submit a report to the town manager setting forth the conditions of such facilities. If conditions thereof are found to be satisfactory, the town manager shall release the bond or other assurance. If the conditions of material or workmanship show unusual depreciation or do not comply with the acceptable standards of durability, the town council may declare the developer in default.

D. In order to insure continued maintenance of a large scale development, the developer shall record both the declaration of management policies and the agreement between the town and the developer in the office of the county recorder.

1.92.020 PLANS REQUIRED. A careful record of such application and plans shall be kept in the office of the zoning administrator for a period of two years from the date of receipt thereof. Plans of large scale developments shall be kept for the life of the project.

1.92.030 PERMITS TO COMPLY WITH TITLE. From the time of the effective date of the ordinance codified herein, permits shall not be granted for the construction or alteration of any building or structure or for the moving of a building or structure onto a lot or for the change in use of any land, building, or structure, if such construction, alteration, moving, or change in use would be a violation of any of the provisions of this title, nor shall any sewer or water service line or gas utility be installed to serve the premises if such use would be in violation of this title.

1.92.040 LICENSE TO COMPLY WITH TITLE. No license shall be issued by any official or employee vested with the duty and authority to issue licenses which would not be in conformance with the provisions of this title. Any license so issued shall be null and void.

1.92.050 PERMITS REQUIRED. No building or structure shall be constructed, reconstructed, altered, or moved, nor shall the use of any land be changed, except, after the issuance of a permit for the same by the zoning administrator or other authorized officer.

1.92.060 CONSTRUCTION AND USE TO COMPLY WITH APPLICATION. Building permits or certificates of zoning compliance issued on the basis of plans and specifications approved by the zoning administrator authorizes only the use, arrangement, and construction set forth in such approved plans and applications, and no other use, arrangement, or construction. Use, arrangement, or construction at variance with that

authorized shall be deemed to be a violation of this title.

1.92.070 CERTIFICATE OF ZONING COMPLIANCE REQUIRED.

A. It is unlawful to use or occupy or permit the use or occupancy of any building or premises, or to change the occupancy of any building or premises until a certificate of zoning compliance shall have been issued therefor by the zoning administrator, stating that the proposed use of the building or land conforms to the requirements of this title. No nonconforming structure or use shall be changed or extended until a certificate of zoning compliance shall have been issued by the zoning administrator. The certificate of zoning compliance shall state specifically wherein the nonconforming use differs with the provisions of this title.

B. The zoning administrator may permit the occupancy of a building prior to the completion of all required work provided a bond or other assurance has been posted with the town clerk in an amount equal to the cost of completing said required work as determined by the zoning administrator. The zoning administrator shall maintain a record of all certificates of zoning compliance for a period of two years, and a copy shall be furnished upon request to any applicant.

C. Failure to obtain a certificate of zoning compliance shall be a violation of this title.

1.92.080 ZONING ADMINISTRATOR APPOINTED. The building inspector appointed under the building code of the town, is designated as the zoning administrator who shall be charged with the administration and enforcement of this title. The town manager may also appoint other officers to assist in the administration and enforcement of this title.

1.92.090 POWERS AND DUTIES OF ZONING ADMINISTRATOR.

A. It shall be the duty of the zoning administrator to inspect or cause to be inspected all buildings in the course of construction or repair. He shall enforce all of the provisions of this title, entering actions in the courts when necessary; and his failure to do so shall not legalize any act in violation of such provisions.

B. Upon appeal to the board of adjustment of any matters on which said board is required to pass, the zoning administrator shall forthwith transmit all papers, records, and other pertinent data pertaining to the appeal to said board of adjustment as required by the terms of this title. The zoning administrator shall also refer matters to the town manager, planning commission, and town council, or other agency as required by the terms of this title.

1.92.100 BOARD OF ADJUSTMENT---CREATED---MEMBERS---TERMS.

There is created a board of adjustment which shall consist of five members, each to be appointed by the town council for a term of three years, provided that the terms of the members of the first board so appointed shall be such that the term of one member shall expire each year. At least one member of the planning and zoning commission shall be a member of the board of adjustment. Any member may be removed for cause by the town council upon written charges and after a public hearing, if such public hearing is requested. Vacancies shall be filled for the unexpired term of any member whose term has not been completed.

1.92.110 ORGANIZATION---MEETINGS---RECORDS. The board of adjustment shall organize and elect a chairman and adopt rules in accordance with the provisions of this title. Meetings of the board shall be held at the call of the chairman and at such other times as the board may determine. The chairman or, in his absence, the acting chairman shall conduct all meetings and may administer oaths and compel the attendance of witnesses. All meetings of the board shall be open to the public. The board shall keep minutes of its proceedings showing the vote of each member upon each question or, if absent or failing to vote, indicating such fact, and shall keep records of its examinations and other official acts, all of which shall be filed immediately in the office of the board and shall be a public record. Robert's Rules of Order shall be followed in the conducting of meetings wherever applicable.

1.92.120 POWERS AND DUTIES OF THE BOARD OF ADJUSTMENT.

A. The powers and duties of the board of adjustment shall be limited to three general types, as follows:

1. It shall have judicial power to interpret the provisions of this title;
2. It shall have administrative power to grant variances;
3. It shall have the administrative power to grant special exceptions or conditional uses.

B. Interpret Ordinance and Map. It is the intent of this provision to provide a way whereby applicants who think that the zoning administrator is in error, or does not interpret the provisions of the zoning title correctly, may obtain relief from such error in an expeditious and inexpensive manner without having to resort to the courts. It is also the intent of this title to empower the board of adjustment to decide, upon appeal in certain zones, whether uses which are not listed therein are, in fact, similar to those which are listed. Accordingly, the board of adjustment shall hear and decide appeals where it is alleged by an

appellant that there is error in any order, requirements, decisions, or refusal made in the enforcement of this title. The board of adjustment shall also interpret the zone map and the boundaries thereof in cases of dispute or disagreement and shall determine the similarity or dissimilarity of uses which are not listed as permitted uses in the various zones. Before the board of adjustment shall declare a use to be similar to other uses permitted in the zone, it must find that the requested use will be:

1. Consistent with the objectives and characteristics of the zone in which the use is to be located,
2. Similar to permitted uses as to function, service, and traffic demands and the emission of smoke, dust vibration, light, etc.

C. Grant Variances. It is the intent of this provision to provide a way whereby an applicant can use his property to the same extent as other properties in the same zone. Accordingly, the board of adjustment may authorize, upon appeal, variances from the terms of this title whereby reason of exceptional narrowness, shallowness or shape of specific piece of property at the time of the enactment of the regulation, or where by reason of exceptional topographic condition, a literal enforcement of the provisions of this title would result in unnecessary hardship upon the owner. Before any variance may be granted, however, the board of adjustment must find that all of the following conditions are present:

1. Having to adhere strictly to the letter of the title will cause difficulties and hardships upon the petitioner which are unnecessary in order to carry out the purposes of this title,
2. Special circumstances attach to the property covered by the application that do not apply to other property in the same zone,
3. That because of said special circumstances, property covered by the application is deprived of privileges possessed by the other properties in the same zone; and that the granting of the variance is essential to the enjoyment of a substantial property right possessed by the other properties in the same zone,
4. That the difficulties and hardships were not created by any act of the appellant subsequent to the effective date of the regulation appealed from.

D. Grant Certain Special Exceptions or Conditional Uses. There are certain uses which are not permitted within particular zones unless they are made to comply with conditions which make them compatible with other uses in the same zone. Accordingly, the board of adjustment shall hear and decide requests for special exceptions or conditional uses, but only when authorized to do so under the terms of this title. In deciding whether or not to grant a special

exception or conditional use, the board shall be guided by the following conditions set forth, which shall be deemed to be the minimum requirements that must be complied with.

1. Small Lots. Where a parcel of land at the time of the adoption of the ordinance codified herein is at least one and eight-tenths times as wide and one and eight-tenths times as large in area as required for a lot in the zone, the board of adjustment may permit the division of a parcel into two lots, provided:

a. Such division will not cause undue concentration of population,

b. The characteristics of the zone in which the lot is located will be maintained,

c. In the opinion of the board of adjustment, values in the area will be safeguarded adequately.

2. Transitional Uses. Uses which are permitted on either portion of a lot, which lot is divided by a zone boundary line, may be permitted to extend to the entire lot, but not more than one hundred feet beyond the boundary line of such zone in which such use is permitted. Before a permit for such a use may be granted, however, the board of adjustment must find that a more harmonious mixing of uses will be achieved thereby.

3. Adjust or Reduce Off-street Parking Requirements. The board of adjustment may approve substitute parking locations and may reduce the amount of off-street parking required provided:

a. It can be shown that the time of use of the buildings or uses will be at different hours or days so that each use will have the amount of off-street parking available when the building or use is occupied, or

b. Sufficient off-street parking is readily available within the vicinity, or

c. Acquisition of land for such use is unnecessary in order to carry out the purposes of this title.

4. Other Special Exceptions or Conditional Uses. The board of adjustment may grant other special exceptions which it has been specifically authorized to grant under the terms of this title, subject to the conditions expressed therein.

1.92.130 MAY ATTACH REASONABLE CONDITIONS. The board of adjustment, subject to the provisions and restraints of this title, may attach other reasonable conditions or requirements to the grant of a variance, exception, or conditional use which the petitioner must comply with as a condition of the grant or approval. The granting of a variance or the approval of a special exception or conditional use shall run with the land. However, a time limit of one year shall be attached to the exercise or nonexercise of any grant unless specifically extended by action of the board.

1.92.140 MAY REVERSE OR AFFIRM ZONING ADMINISTRATOR. In performing the duties and powers as set forth herein, the board of adjustment is empowered to reverse or affirm, wholly or partly, or may modify the order, requirement, decision, or determination of the enforcing officer and may make such order or requirement as ought to be made; provided, however, that in interpreting and applying the provisions of this title, the requirements contained herein shall be deemed to be the minimum requirements for the purpose set forth.

1.92.150 AUTHORITY LIMITED. The powers and duties of the board of adjustment are limited to judicial and administrative matters as set forth in this title. The board of adjustment shall not have the authority to amend this title nor to correct what it may consider to be an unwise requirement. Nevertheless, the board of adjustment shall have powers and duties as set forth in this title and within the limitations and intent of the provisions of this title shall perform its duties and shall have the power to perform those acts as herein set forth.

1.92.160 VOTE. The concurring vote of three members of the board shall be necessary to decide on any matter on which it is required to pass.

1.92.170 APPLICATION TO APPEAR BEFORE THE BOARD OF ADJUSTMENT. Any citizen or person, or any officer or department of the town may appeal to the board of adjustment by filing a request in writing with the zoning administrator, and with the application the applicant must have the signatures of all property owners in a distance of one hundred fifty feet from his property line. These signatures are not meant to endorse or show disapproval of the matter in question but to show that the owners have been notified of the request before the board of adjustment and the date of the public hearing; and by paying a fee of twenty-five dollars, provided such appeal is made within thirty days from the grant or refusal of a building permit by the zoning administrator. The request to appear before the board of adjustment shall be made on forms furnished by the zoning administrator at least ten days prior to the date of the hearing on the appeal.

1.92.180 PROCEDURE. Upon receipt of the application, the zoning administrator shall forthwith transmit to the board of adjustment all papers constituting the record upon which the action appealed from was taken. The appeal shall stay all proceedings in the matter appealed from, unless the officer from whom the appeal is taken certifies to the board that, by reason of the facts stated in the certificate, a

stay would, in his opinion, cause imminent peril to life or property. In such case, proceedings shall not be stayed, except by a restraining order granted by the board, or by a court of record on application and notice to the officer from whom the appeal is taken.

1.92.190 HEARING. A. The board of adjustment shall fix a reasonable time for the hearing of the appeal, give public notice thereof by publication, as required by law, and shall decide the same within a reasonable time.

B. The intent in requiring a hearing is to enable the board of adjustment to obtain facts surrounding the case which may not be evident, or which may not be shown in the record as submitted to the board. The decision of the board shall be based upon the facts and not upon expressions of support or protest, or lack of support or protest, which may be made at the hearing. Any party may appear at the hearing in person or by agent or by attorney.

1.92.200 ACTION OF THE BOARD OF ADJUSTMENT. The board of adjustment shall make determinations in harmony with the provisions of this title; shall notify the town manager and the petitioner of the action taken; and shall file its decision in the office of the board.

1.92.210 RECOURSE FROM DECISION OF BOARD. Any person, taxpayer, or municipal officer aggrieved by any decision of the board of adjustment may at any time within thirty days after the filing of the decision in the office of the board, petition a writ of certiorari for review of the board's decision. Allowance of the writ shall not stay proceedings upon the decision appealed from, but the court may, on application, on notice to the board, and for good cause shown, grant a restraining order, and on final hearing may reverse or affirm, wholly or partly, or may modify the decision reviewed.

1.92.220 POWERS AND DUTIES OF THE PLANNING AND ZONING COMMISSION. The planning and zoning commission shall have the following powers and duties with respect to zoning in the town:

A. The planning and zoning commission shall hear and decide requests for amendments to this title. The planning and zoning commission may also act on its own initiative in considering and recommending amendments to this title. Before a favorable recommendation is given, however, it must be shown that:

1. The amendment will not be contrary to the land use plan,

2. The amendment will not militate against the fulfillment of any other provisions of the comprehensive plan,

3. The amendment will not decrease nor adversely affect the health, safety, convenience, morals or general welfare of the public,

4. The amendment will more fully carry out the intent and purpose of this title,

5. Balancing the interest of the petitioner with the interest of the public, both interests will be served better by adopting such an amendment.

In considering a request for an amendment to the zoning title or map, the planning and zoning commission may submit a recommendation for or against the request or it may recommend an alternate amendment;

B. To hear request for permits to construct mobile home parks, travel trailer courts, farm labor camps, group dwellings and planned unit development subject to the standards set forth in this title pertaining thereto;

C. Any other duty imposed on the planning and zoning commission under the terms of this title.

#### 1.92.230 POWERS AND DUTIES OF THE TOWN COUNCIL.

A. The town council may amend, change, or modify any provision of the zoning title or map provided:

1. The proposed amendment shall be first submitted to the planning and zoning commission for its recommendations;

2. A public hearing is held thereon as required by law;

3. The amendment will not be contrary to the comprehensive plan.

B. No substantial change in or departure from the recommendations of the planning and zoning commission can be made after such public hearing, unless the change or departure be first resubmitted with comments to the planning and zoning commission for its reconsideration and recommendations. Upon receiving the reconsidered recommendations from the planning and zoning commission, the town council may overrule the planning and zoning commission.

Any such architect, builder, contractor, or other person doing or performing any such work without a permit having been issued shall be deemed guilty of violating this title in the same manner and to the same extent as the owner of the premises or the person for whom the use is established, or for whom such buildings are erected or altered, and shall be subject to the penalties herein prescribed for a violation.
