SUSTAINABLE PIECES FOR CONSCIOUS WOMEN

We pay tribute to the majestic and unique natural fibers, which are delicately transformed to create vibrant and timeless summer pieces, empowering a woman deeply conscious of the environment, who wants to rediscover herself in every adventure, in a simple but elegant lifestyle, and always in harmony with nature.

WE CARRY OUT THE DESIGN, PATTERN MAKING AND TAILORING PROCESSES IN OUR WORKSHOP IN THE MUNICIPALITY OF GUATEQUE – BOYACÁ IN COLOMBIA.

From here, we are generating jobs, creating each piece with our hearts, because we believe that it is possible to make a change from the rural areas of our country. We are committed to empowering and training the women of the region, who leave their mark on each garment.

OUR WORK WITH THE ARTISAN COMMUNITIES OF COLOMBIA.

We work with artisans from different regions of the country, men and women who develop the artisan pieces that we incorporate into our garments. With them, we carry out a process of research, testing and co-creation of pieces, respecting the processes of each natural fiber and the transformation techniques inherited for generations.

We use fashion to restore the wiring between the alpha and the omega: *We are all one Earth.*

We are going through a moment of internal struggle, we live in virtuality but we take care of the connection with ourselves and with all beings on the planet.

We dress to embark on the path of transformation and find balance as one: between strength and delicacy, between the sun and the moon, between the feminine and the masculine... between the alpha and the omega.
