Short-Lived Effects  
Messy Ointments  
Not Convenient  
Use Chemicals  
Can Be Costly

# Moskinto, Itch-Relief patches were invented in Germany in 2016 by husband & wife team, Andi & Davina Jetter.

As an avid outdoorsman, Andi would get attacked by mosquitoes. As an entrepreneur in the kinesiology space, Andi understood the science of body mechanics. By creating an adhesive patch using his unique grid-shaped design, Andi and Davina suddenly had a functional prototype that relieved itching in seconds and without any chemicals!

Fast-forward, and Moskinto has been sold across major retailers across the world with over 26 million units sold.

# Moskinto, The Original Itch-Relief Patch

Our patent-pending technology gently lifts the outer layer of the skin to allow the lymphatic system to do its work by draining itchy substances left behind by mosquitoes.

**Instant Itch-Relief**

**Long-Lasting**

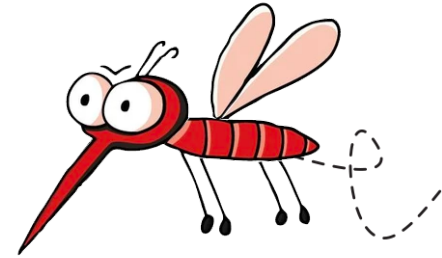

**Waterproof**

**Chemical-Free**

Moskinto patches are applied directly on the bite. Relief begins almost immediately. The patch can remain on the skin for 4-7 days. By that time, the bite beneath the patch has generally healed.

## Over 12,000+ Reviews Trust Us

★★★★★ 5/5 rating

Kinda miraculous. I used to have a really bad reaction to mosquito bites. Pain, swelling. First thing I found that really works. I bought 5 boxes! Brilliant product!

- DEMI

★★★★★ 5/5 rating

Finally! Something that works! Last summer was absolutely brutal and we were devoured by the bloodsucking bastards. These little patches are much nicer on the wallet than another brand I'd get from Australia but work just as well. I sent the link to other vampire victims and everyone fell in love. You just put a patch on and forget about it because it calms the itch so well.

- SHOEGAL

★★★★★ 5/5 rating

This is the most amazing product EVER!! It does what it says it will do AND promotes healing if a bite has scabbed over. Just place it, forget it, and POOF!! It's gone! The product name has changed since I last purchased and almost didn't find it again. I bought 2 packages this time so by the time I need it again, I hope it hasn't morphed into something else by then. 5 stars for sure.

- ELLIE

# "Water-Blended" Formula

- Unrivaled "**water-blend**" formula: Experience **superior efficacy and comfort** with our innovative water-soluble ingredient blend for smooth, non-greasy, and non-alcoholic application.
- **Skin-loving benefits:** Indulge in our **moisturizing**, pleasantly scented formula free of harmful chemicals, leaving your skin refreshed and protected.
- Water-resistant agent **increases** observed protection time by **20 to 25%**.
- Our "water-blend" technology allows for **gradual release of our active ingredient**, Picaridin, ensuring long-lasting protection against **mosquitoes, ticks, sandflies, and midges**.

## MOSKITO CARE FORMULA

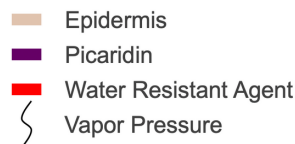

Reduced vapor pressure = slower evaporation

**The formula is protected from elements**

Less active ingredients are used to get the same protection time

**No Toxicity Risk**

## Other Formulas

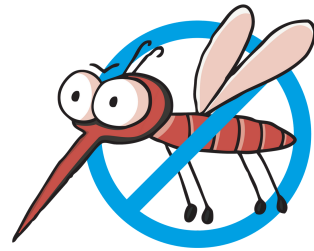

High vapor pressure = **fast evaporation** (accelerated by the solvent or alcohol)

**No protection of the formula** against elements - sweat, rain.

Good protection times are obtained by increasing the active ingredient doses

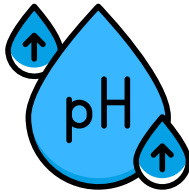

**Toxicity Risk**

# MOSKITO CARE

## INSECT REPELLENT

pH regulators maintain the optimal pH balance of Moskito Care's formula, ensuring stability and effectiveness of active ingredients for consistent and long-lasting protection against insects.

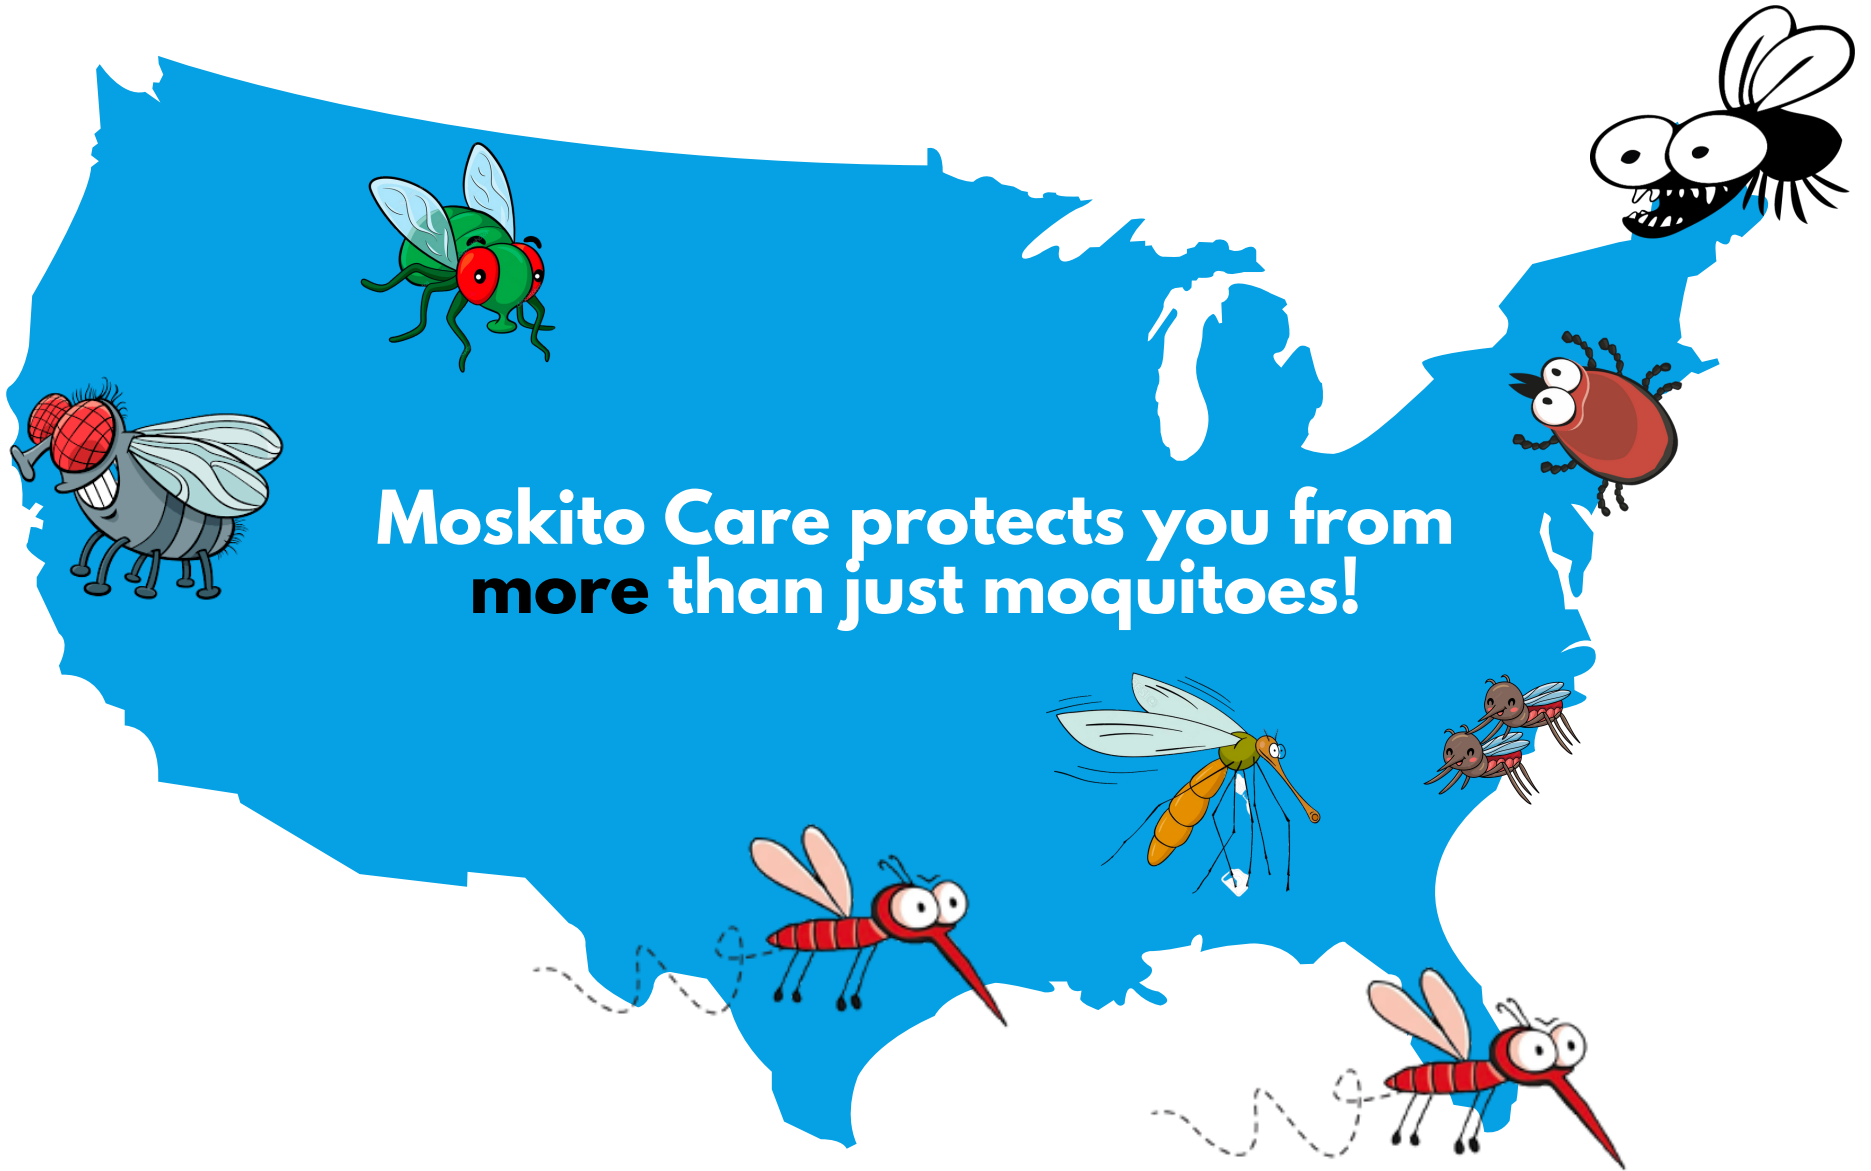

Moskito Care 14hr Moisturizing Insect Repellent is safe for use by pregnant women and their developing fetuses.

Wildlife & Environmentally-friendly and compatible with a wide range of materials.

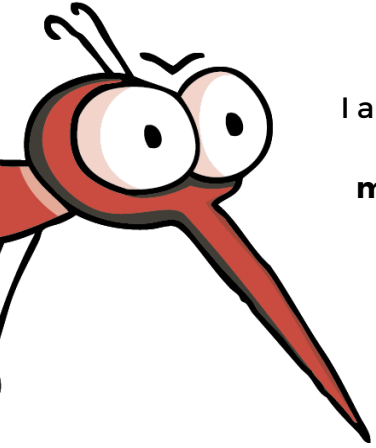

Won't damage fabrics, plastics, or synthetic materials

**Moskito Care protects you from  
more than just mosquitoes!**

## **United States of Mosquitoes!**

No-See-Ums, Biting Flies, Horse Flies, Stable Flies, Black Flies,  
Gnats, Chiggers, Biting Midges, Green Backs, Sand Flies & More!

## What Mosquitoes?

I am a huge fisherman and my biggest enemy are mosquitoes. I ran across this product and had to give it a go. I am very happy that I did. I was pleasantly surprised **not to be bombarded by mosquitoes my last fishing trip**. I definitely recommend giving this a try you can thank me later. The mosquitoes disapprove this message...

## Works Great!!

"I get horrible reactions to mosquito bites. I've been spraying OFF many times a day. The joke at work is that I'm practically flammable! Then I found Moskito Care totally by accident. It's long lasting, smells pretty good, isn't sticky and **WORKS WORKS WORKS!** I've kept the swelling, itching, up-all-night madness at bay since using it. Highly recommend for those of us that mosquitoes love to bite".

## It Works!

Ours is more of a **biting fly problem**, as we raise alpacas. Whenever I was in their corral or pasture, I was constantly swatting flies on my arms, hands, around my neck and face. Now, a couple sprays on those areas, and the **flies stay away completely!** I am thrilled with this product, and hope they make a similar one I can use on the alpacas, who are still suffering.

## Keeps The Bugs From Biting

The **no-see-ums** think I'm dinner! When I apply this, they don't bite! I love this product!

# PICARIDIN BASED INSECT REPELLENTS ARE CLEARLY THE BEST CHOICE FOR MOSQUITO PROTECTION

Active Ingredient	Hours of Protection	Feel on Skin	Safe for Children	Potential Health Effects	Scent, Odor	Effect on Fabrics
<b>Picaridin, 20%</b>	12+ (Moskinto 14+)	Non-oily/non-sticky	Yes	None	No chemical odor	No damage
<b>DEET, 20%</b>	4-8	Oily, sticky	Only less than 10%	Neurological, eye irritant	Chemical odor	Damages fabrics
<b>IR3535, 20%</b>	7-10	Non-oily/non-sticky	Yes	Irritating to eyes	No chemical odor	Possible damage
<b>Oil of Lemon Eucalyptus, 30%</b>	4-6	Oily	Unknown	Skin reactions	Lemon scent	Possible staining
<b>Organic Oils</b>	Varies	Potentially sticky	Unknown	Skin reactions	Varies	Possible Staining

EPA Approved

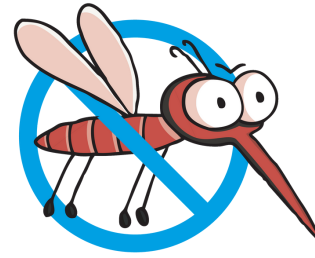

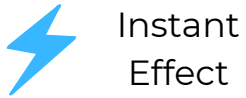

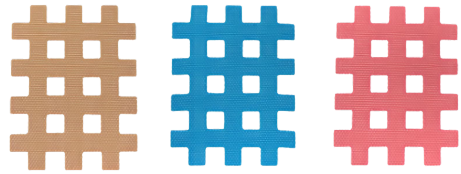

Recommended

Health Canada  
Recommened

Picaridin is a highly effective insect repellent that can provide long-lasting protection against a wide range of pests, including mosquitoes, ticks, and flies. Unlike some other repellents, picaridin has been shown to be just as effective as DEET, without the same potential for skin irritation or damage to synthetic materials. According to the Centers for Disease Control and Prevention (CDC), picaridin is a recommended alternative to DEET for insect repellency, and has been found to be effective against a variety of disease-carrying insects, including the *Aedes aegypti* mosquito which spreads Zika, dengue, and chikungunya viruses.
