

Based on the player and team standings data, here is an analysis of the league performance.

The league data provides a good snapshot of player and team performance across 8 weeks, including summary scores, handicaps, and weekly results.

Key Takeaways

1. Dominant Performance by Team "Ham"

Team **Ham** is the clear leader in the league, exhibiting a significantly higher win rate than all other teams.

- **Highest Round Win Percentage:** Team Ham has a **77.5% Round Win Percentage**, which is a substantial lead over the second-place team, "1st Last Second," which has a 57.14% Round Win Percentage.
- **Most Rounds Won:** They have won **31 rounds**, outperforming all other teams, which indicates consistent success in their matchups.
- **Top Player Representation:** Two of the top five players by **Total Score** (Gareth Tyrany and Aaron Kotopka) and two of the top five players by **Net Score** are from Team Ham, suggesting their success is driven by high-performing individuals.

2. Player-Level Performance is Strong at the Top

The leading players show very high **Total Scores** and **Net Scores**, but their consistency in terms of participation varies.

- **Top Scorers:** **Gareth Tyrany** and **Aaron Kotopka** are the top two players by **Total Score** (10.945 and 10.4863, respectively).
- **Participation Disparity:** While Aaron Kotopka achieved his score across all **8 Weeks Played**, Gareth Tyrany's leading score was achieved with only **2 Weeks Played**, suggesting an extremely high average score but a lower overall contribution to the team's total points across the season.
- **Net Score Leaders:** **Gareth Tyrany** also leads in **Net Score** (9.625), followed by **Lindsay** (9.41667) from Team Eagle Fang and **Jack Fisher** (9.25), also from Eagle Fang.

3. Competitive Mid-Table and Low-Participation Teams

The remainder of the league shows a close competition among teams and a large number of players with limited participation, which impacts the overall standings.

- **Close Race for Second Place:** The teams "1st Last Second" and "Shark Bait!" are tightly contested for the second-place position, with Round Win Percentages of **57.14%** and **54.29%**, respectively.
- **Low-End Performance:** Three teams share the lowest performance, "Deep Pockets," "Safety," and "Furry Balls Plopped Meanacingly On The Table, INC.," all having a **40% or 42.86% Round Win Percentage** and 7 weeks played.
- **Player Participation:** The data shows **23 players** who have played **4 or fewer weeks** out of the maximum 8, indicating that player absences are a significant factor in weekly results.
