Follow up to yesterday's Doctors Call (4/22/2020) regarding Healy potential contraindications:

**Contraindications:**

Microcurrent treatment must not be performed when metallic foreign bodies are in the area of treatment, pacemakers or implanted defibrillators are present, bleeding, risk of bleeding or embolism are present. Treatments must not be performed on areas of the skin which have been treated radiotherapeutically or have a sensory disorder or if the user has a fever.

- Not for use by pregnant women
- Not for use by those with epilepsy
- Do not place the electrodes directly on the eyes, covering the mouth, on the front of the neck (especially the carotid sinus), or on the chest and the upper back or crossing through the heart.

Consult a medical professional before using if you have any of these contraindications. Within the framework of holistic healing approaches, certain interactions (e.g., strengthening of the body's own mechanisms) are possible through frequency applications. Therefore, we recommend checking the following issues before the first application:

- If amalgam fillings are present in the teeth, the application can lead to a mobilization of heavy metals in the cells of the body - not directly from the dental fillings themselves - and thus to a temporary deterioration of the state of health. We therefore recommend that you drink plenty of water in addition to the application and take appropriate measures to support the removal of heavy metals.

- If you are taking medication at the same time, we recommend that you have the dose checked by your doctor at least once a month, especially if you are taking the following medications:
  - Blood thinners
  - Antidiabetics
  - Blood pressure lowering medication
  - Hormones (especially thyroid hormones)
  - Beta blockers

Healy and its applications are only suitable for adults. Too little data is available for the treatment of minors. Any treatment of minors is the responsibility of the parents or legal guardian or of the attending physician.
