RTC|EPC Contractors Al Raya Towers Group is a general contracting company registered under the laws of Saudi Arabia in 2004, primarily to cater for the developing requests of the industrial tasks. The ambition of leadership and the passion for excellence makes us in a constant quest to be the best in the size and quality of our investments, armed with the constant development of our performance in line with our aspirations, and the diversification of our services in line with the desires of our customers to strengthen our competitive capabilities in all the activities that we work with.

We deserve responsibility in front of society and we have a history of careful planning and management of safe work sites committed to the time factor and achieving quality and excellence in performance.

We will probably surpass the desires for each customer by offering exceptional client care, expanded adaptability, and more prominent worth. Our partners are recognized by their practical and specialized aptitude joined with their hands-on understanding, in this manner guaranteeing that our customers get the best and expert assistance. We invest heavily in conveying quality items and our ability to give you the best quality of specialized help along with the most serious citations for tasks and tenders. We are a powerful substance that has effectively acclimated to the ever-changing and developing needs of our clients and business network individuals; continually enhancing customers' needs and necessities.

Our clients include some of the leading companies in the Kingdom, including ARAMCO, National Guard, National Steel Products, Arab Steel, and ABB

Contracting, ABB Switzerland, United Gulf Steel, Al-Binali and Sons, Daralriyadh, Isolux, Saudi Electricity Company, Tamimmi Group etc.

The magnitude and variety of works speak clearly of The ARTC technical lead in Electrical & Electromechanical, Tower Erection, Telecommunication Infrastructure, and Civil Construction work. The company is able to leverage human resources trained in the state-of-the-art technology in its fields of involvement. Thus, the company is fully prepared to deliver to its clients with professional ease despite the technical challenges.

The ARTC is a financially sound group and is capable of sustaining the cash flow required for major works as demonstrated by the projects ongoing. The group today is comprised of the following component divisions:

- ⇒ Civil construction & Maintenance Division
- **⇒** Electrical and Electromechanical Division
- ⇒ Heating Ventilating & Air Conditioning Division
- **⇒** Telecommunication Installation & Erection Division
- ⇒ Heavy and Light Equipment Division
- **⇒** Construction of CARGO HANGER building
- **⇒** Construction of commercial and residential buildings
- **⇒** Construction of roads and access roads
- **⇒** Construction of cellular tower foundations, columns and erection
- **⇒** Construction of trenches for cable and pipes
- **⇒** Sewerage system and piping
- ⇒ Maintenance & renovation
- **⇒** Fire Fighting Installation
- **⇒** Earth Moving projects

- ⇒ Temporary Facilities
- **⇒ Destruction Work**
- **⇒** Support Services Division

Each of the divisions specializes in a specific field in order to achieve a level of excellence. The electrical division has the capability to execute the projects on turnkey basis, emphasizing to construct the range of BSP & substations along with industrial electrical & electromechanical work and residential electric projects.

The Civil Construction Division has specialized in the field of civil works, with a particular emphasis on infrastructure and earth work, building construction, Substation construction, SVC etc., Destruction, Renovation and maintenance.

The Telecom Division specializes in the installation, erection, OFC networking and upgrade, maintenance GSM sits.

The ARTC provides quality services to the Electrical & Electromechanical, civil construction, Telecomm and industrial sectors across the Kingdom, Led by a team of seasoned and dedicated professionals with a quality conscious approach to work, the Company takes pleasure in a first-rate status with its customers and competitors.

The ARTC has an excellence to providing Catering & Facility Management services in the most remote areas of the kingdom. We have our own high quality moveable material which can be mobilized anywhere anytime.

Since 2005, we have served hundreds of customers all over the Kingdom and enjoyed good reputation and reliable service records. It is our great pleasure to serve you at your entrance.

The ARTC at present supports main contractor and clients with our qualified staff and pool of equipment in different fields; Civil, Mechanical, Electrical, Instrumentation, Construction & Maintenance works.

The ARTC owns permanent camps within the vicinity of its offices to accommodate its staff and personnel to cope with clients' requirement.

We are proud to be an integral part of the Kingdom's fast infrastructure development and we have met successfully the challenge through our personal time honored and work quality commitment. We look forward to serve your construction requirements in the near future.

King Salman bin Abdul Aziz Al Saud

"One day, I have said that I am not calling for shiny business but for real works that serves our country and our citizens, takes into ac-count our realities and is based on sound foundation to encourage national capital and other capital that shares our experiences to work in our country"

Mohammed bin Salman bin Abdulaiz Al Saud

"What we have committed ourselves to in Saudi Arabia is to make sure there is no shortage of supply. So we are working with our OPEC allies and non - OPEC countries to make sure we have a sustainable supply of oil, that there is no shortage, and that there is a good demand, which will not create problems for consumers, their plans and their development."

Chairman's mes<mark>sage</mark>

First of all, I am pleased to take this opportunity to extend my deep thanks and gratitude to all our partners in success who have contributed to the development and progress of the Arraya Towers Contracting Group, our clients, suppliers, consulting companies, contractors and others, starting from its humble beginnings in the year 03/28/1425 AH, and over a short period of time. The Arraya Towers Group was able to study and identify the changes and trends that occurred in the contracting markets in the Kingdom according to a new philosophy in project management and adopted by modern concepts in construction so that it was able, within a short period and with hard and painstaking work aimed at meeting the needs and requirements of customers in a way that guarantees their satisfaction and comfort, through our commitment We provide our services in accordance with the highest quality standards in force and in accordance with the regulations in force by the rulers and the foundations based on them, to promote our product and complete our work with quality and professionalism in accurate dates for project delivery to the fullest and according to the aspired requirements.

And after God helped us achieve these commitments, we gained the trust of our customers, and we are still now achieving that accelerated growth by providing that distinguished mix of qualified administrative, technical and engineering cadres in addition to the use of administrative and technical methods and modern engineering technologies.

Dr. Abdullah Mohammed Al-Dawad Chairman of Board of Directors

ARTC | EPC Contractors Al Raya Towers Group is a general contracting company registered under the laws of Saudi Arabia in primarily to cater for the developing requests of the industrial tasks. The ambition of leadership and the passion for excellence makes us in a constant quest to be the best in the size and quality of our investments, armed with the constant development of our performance in line with our aspirations, and the diversification of our services in line with the desires of our customers to strengthen our competitive capabilities in all the activities that we work with.

To be one of the first contracting and construction companies in the Kingdom of Saudi partners Arabia, clients must see us as an integral part of their success process, as the the company has expertise, skill and resources to meet the challenge of the conditions of the contracting business and therefore we expect their needs and fulfill all our obligations towards them.

Our Goal is to concentrate on giving our customer the best work and wellbeing quidelines in our field to achieve their full satisfaction in terms of

- Honesty & Trust
- Excellence
- Accuracy of appointments
- Quality

We make progress toward greatness in all that we do through straightforwardness, trustworthiness and a drive consistently to surpass the desires

Code of ethics

The ARTC is convinced that Ethical Conducting of business and management of one's activities and internal and public relations are essential tools for building the company's image and reputation and achieving its strategic goals and therefore attaining success.

The Code of Ethics is therefore the formal expression of the value in which the company believes and the rules that all **ARTC** employees and associates are required to follow in the context of their functions and responsibilities.

The basic ethical principles characterizing The ARTC code of conduct may be summed up as follows:

- ✓ **LEGALITY:** compliance with regulations and legislation in effect in the areas in which company works, the company's instructions and customers specific instructions, where applicable.
- ✓ **Loyalty:** keeping one's word and the terms of the agreement.
- ✓ **Integrity:** correct behavior in all activities and decisions (it's not admissible to take advantage of another's position of weakness ignorance or to give misleading information).
- ✓ **Transparency:** completeness, uniformity and timeliness of information provided within and outside the company, within the limits of protection of the company's privacy and confidentiality.
- ✓ **Quality:** compliance of products and services to the quality requirements set forth in regulations, company standards and the applicable contractual specifications.
- ✓ **Safety and Environment:** safeguarding human health and safety and the environment.
- ✓ Privacy: protection of personal data of individuals, legal entities, organizations and associations.
- ✓ **Confidentiality:** compliance with the secrecy of companydata and information which is not in the public domain.
- ✓ Respect for human dignity: respects for people's rights, assurance of identical opportunities and absence of discriminatory behavior, on the bases of religion, race, nationality, age, health etc.

uality of life is governed by concerns for health, safety and environment of our employees, our clients and our society. Work safety is not only a priority it is a value, and from the top to down we take our values seriously.

The ARTC considers these to be of utmost importance in its entire works, the company ensures that all employees adhere to safety measures and practices. Appropriate gear and tools are used to ensure the safety of employees working in all areas.

From upper management to our newest employee we continue to train and update our work safety program ensuring the protection of our team and clients. Our commitment to our employees and clients alike continues to grow in promoting safety and health.

Company ownership and the board of directors throughout our entire team, work safety is a value that will not be compromised.

Our record is living proof that we will continue to do our best at preventing unforeseen incidents that we all know can cause an immense amount of suffering and loss.

All engineering design – particularly of Substations, towers caters to the safety aspect of all future users. These include proper railings, rest platforms, ladders, ladder supports, lightning protection, earthing/grounding, aircraft warning lights, etc.

In addition, the company provides insurance cover for all vehicles and property owned by the company, and caters to workmen's compensation. All debris from construction sites is disposed-off in a proper manner so as not to damage the environment in any way.

Any metal parts that are unused or made unusable are then recycled through proper scrap dealers.

Precaution is taken against polluting underground water resources, and all wastewater is disposed-off in a proper manner through sewage treatment. We hope that our small efforts will have some impact in educating the masses for a cleaner and healthier environment.

Competence, technical capability, professional and careful management of works, have allowed us to improve competitiveness and satisfy CUSTOMERS.

Our business environment – highly competitive – pushes us to constantly improve **Quality** to obtain higher performances. Our personnel are committed to comply with scheduled times, to overcome inefficiency and/or obstacles in organization interface to provide services fully suitable to Customers' expectations.

Executive summary

The ARTC is managed by a well-balanced group of knowledgeable professionals who are committed & the company's mission.

As a team, they bring several years of experience in the development, operation and successful management of technology businesses.

.At present, the company currently employs over 130 professionals

Time Gone By

Since 2004 **ARTC** has been a principal provider of services and continues to thrive as a leading professional and quality service provider of the Electrical & Electromechanical, Civil Construction, and HVAC, maintenance, Telecom industry and Manpower supply services.

Our company scope & expertise ranges from demolition to complete raw land, construction and even includes upgrading that old structure that has no hope. The ARTC is a true contracting services Provider Company from the word go, and from our start in 2006 till the present, although many have come and gone, we are still here and ready to serve your needs.

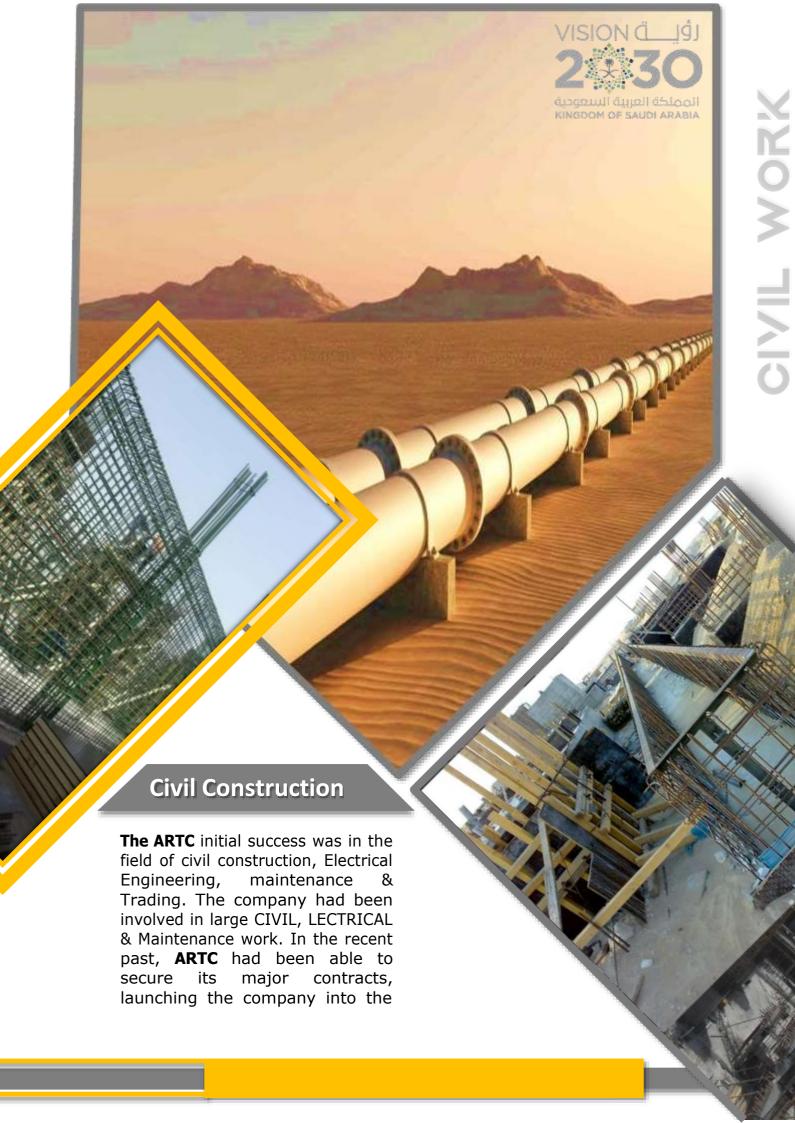

If you have a need for a required site, we're your company to call. Our seasoned management team and crew members are standing by - ready to serve you today!

Our Goal

The ARTC goal is to be recognized as one of the most reputable, safest and efficient professional companies in the civil construction, electrical and electromechanical, maintenance, HVAC, cell phone tower erection business and supply of quality manpower supply.

Development and site installation

The ARTC crews excel at meeting your project timelines, from the bidding process, construction phase, in delivering the close out documents; we are prepared to meet the most stringent requirements. We employ the staff and techniques that maximize efficiency and are responsive to your time constraints. Our crews are certified in the technical aspects of installations, equipment testing, as well as being trained in the practical aspects of site installations. Since we employ cross-trained personnel that encompass civil workers as well as technical staff, we are confident that we can meet your project installation goals "from the ground up"!

major league. As a contractor for civil works, **ARTC** is capable of taking on total turnkey responsibilities, including:

- √ Feasibility studies
- ✓ Engineering design
- ✓ Planning
- ✓ Procurement & Supply
- ✓ Project Management
- ✓ Construction
- ✓ Maintenance

The ARTC had started its first operation with civil construction and maintained the quality

service to develop the company into a diversified engineering company and proved it to carry out the turnkey projects in civil contraction with excellent remarks from the clients for the completion of projects with perfection.

The civil department is well organized by highly professional Managing staff and well equipped with latest equipment to implement solutions that insure the completion of projects within budget and time. We are pioneering force now in planning, design and implementation of developing projects in the kingdom of Saudi Arabia. To enhance our construction skills we have initiated programs to build up the professional attitude of our staff. We provide training in management, construction, safety and other disciplines.

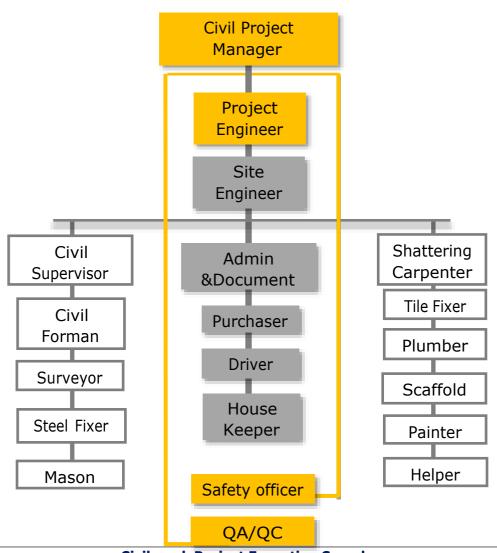

The ARTC is specialized and well equipped to execute short term & long term turnkey projects in the civil works mainly in the following disciplines.

- 1- Construction of Substation building
- 2- Construction of SVC Electrical building
- 3- Industrial Construction

 - Electrical buildings
- 4- Construction of commercial and residential buildings
- 5- Construction of roads and access roads
- 6- Construction of cellular tower foundations, columns and erection
- 7- Construction of trenches for cable and pipes
- 8- Sewerage system and piping
- 9- Maintenance & renovation
- 10- Destruction Work

Ur experience, coupled with our innovative and resourceful staff guides our company through the fluctuations, and changes of the tower installation, telecommunications and electrical & electromechanical industry. **"From the ground up"** is not just a good motto, but also explains our core business. We are prepared to take your plans and turn them into reality from the initial phone call or meeting, through the successful completion of your project.

The ARTC has full-fledged capability in the fields of electro-mechanical erection works allied with telecommunications and industrial developments. The company has the capability to undertake the following:

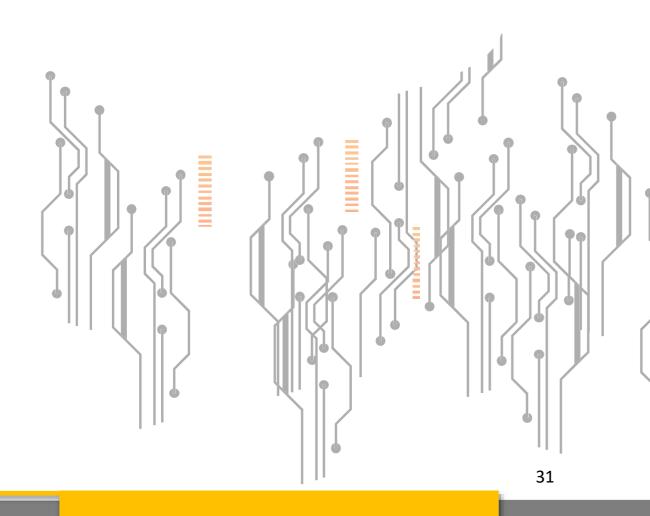

- Supply, Design, fabrication, installation and commissioning of MV/LV/HV substation / transformers / control panels / PLS panels, Cables laying / dressing / termination, Switchgear, MCC, cable tray / ladder systems include ducting and transmission lines.
- Survey, planning and installation of optic fiber cable systems, including laying of underground optical fiber cable, jointing, testing and commissioning and installation of optical transmission equipment.
- Target markets include SCECO, ABB, Mobil, Motorola, Alcatel-Lucent, mobile telephone operators, telecom companies, and its contractors, other government agencies, and small to medium sized industries and power plants.

- Design, fabrication, installation and foundations of towers and mobile telephone BTS stations (self-supported & guyed).
- Design, fabrication and erection of electrical transmission towers.
- Generator rooms, repeater huts, radio rooms, and other structures.
- Survey, design and complete installation of telephone outside plant including laying of underground system, construction of manholes / Handholds, laying of underground primary and secondary cables, jointing, testing and commissioning of telecom cables.

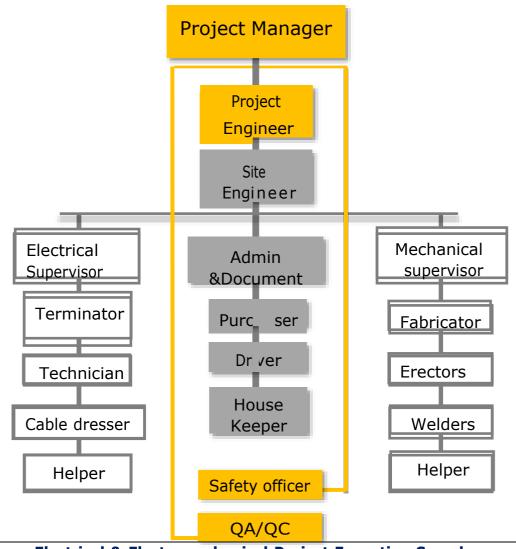

The ARTC constantly seeks out new innovative methods, passing on greater economic savings to our customers. Simply stated, when you contact our company, we will handle your business in-house and your work will not be hired out to a lower tier contractor with a different set of values.

SVC OVERVIEW

Mechanical division

The mechanical division is fragmentation that continuously serves in Saudi Arabia since 2004. A wide and varied scope of industrial construction activities is carried out and managed by professionals and experts in the field by giving high importance to the satisfaction of the client. Specializing in design/build, design/assist, conceptual budgeting, and value engineering of the plan and specific projects to assure that they are within budget. The team at ARTC brings a wealth of knowledge, understands code requirements, and keeps on top of alternate materials choices with current pricing along with many years of experience in the industry.

Prides itself in doing business based upon honesty and integrity. Our philosophy is to be selective in the work we contract so we can assure the owner of excellent quality and performance. As a result, most of our work is secured through reputation or by repeat customers. We are specialized and well equipped to execute short term & long term turnkey projects in the mechanical field mainly in the following disciplines:

- Pipeline Construction.
- RTR Pipeline installation.
- Steel Pipeline.
- Steel structure Construction.
- Generator and Fuel Tanks installation.

Ludud ก็หญิงสาในเ

- HVAC System Installation.
- Fabrication & Welding.

The ARTC has full-fledged capability in the field of telecommunication networking with a commitment to deliver outstanding service that consistently exceeds customer expectations.

The ARTC affords its customer consolidation, opportunities and has ability to deploy a well-equipped, professionally trained and experienced workforce capable of meeting needs anywhere in the Kingdom.

The ARTC offers a wide range of services in Telecom and we are proud of our Installation Technicians and Operational Support Teams who meet our strict pre-employment and on-going safety and quality control criteria and, we reward their outstanding performance with competitive pay, bonus programs, paid training, career development programs and safety certifications

The ARTC will expand its operations and continue to project a positive image to our customers and their communities. We believe in a professional, consistent appearance of our Technicians, servicing our customers with fully trained Dispatch Teams and Field Supervision.

The company is fully capable to provide our extended services to our customers in the field of telecom networking implementation services which are briefly described below;

- * Design and complete installation of telephone outside plant including laying of underground system, construction of manholes / Handholds, laying of underground primary and secondary cables, jointing, testing and commissioning of telecom cables.
- * Survey, planning and installation of optic fiber cable systems, including laying of underground optical fiber cable, jointing, testing and commissioning and installation of optical transmission equipment.
- * Installation of 24 core outdoor FOC, single mode patch Cord 10FT LC-LC, FOC shelf, Adapter Cartridge, Connector E LC single mode, Termination, Testing, and Labeling & Documentation.

Microwave Link Installation

Microwave link installation includes the installation of Microwave transmission Equipment's which consisting of an Out-door unit, In-door unit and cabling

Major tasks

Delivery of Microwave transmission Equipment to site
Microwave Antenna's installation
Mounting of Outdoor Unit
Installation, power connection and earthling of indoor Unit Preparation
of IF connectors & IF cable lay out
Test of site and report including conditions
LOS reports are checked with radio signaling tests

Link Commissioning

Link Commissioning covers the work required to align the Out-door unit and set and measure all parameters correctly. In addition, checking inter-radio signaling, inter BTS (all types) link parameters and interference checking and testing.

BTS (Base Transceiver Station) Installation

Installation of Base Transceiver Station and its accessories (Including Indoor and outdoor; etc.)

Major Tasks

- BTS Installation
- Power connection and grounding of BTS
- Installation of feeder and jumper
- Preparation of feeder & jumper connectors
- PCM cable rooting and Alarms termination in BTS,

BATB and **DDF**

- All GSM, DCS and 3G Antenna assembling & installation
- RF test and site survey results

BTS Commissioning

- Major tasks as necessary
- Download of BTS software
- TRE & COMBINER installation and integration
- Sector mapping
- Drive testing as specified by the customer
- Perform BTS Reconfiguration
- Perform Standard Operation & Maintenance Procedure
- Load new revision software to BTS
- On Site BTS Commissioning and Network Integration
- Implement transmission plans and configuration
- Checking Alarms and fault clearance or fault notification

Antenna Installation

This service includes installation of antennas and Feeders (coaxial cables), connectors, ground kits, feeder fixation (clamps) and jumpers between BTS rack and a remote location. Antenna installation includes mounting of antenna system, provisioning of related cabling (feeders & jumpers), installation of Tower Mounted Amplifiers (TMA) and testing of cabling.

Major tasks

- Transport of materials to the site
- Mounting, alignment of antenna and physical tilt setting
- Mounting of TMAs
- Power provision for TMAs
- Provision and earthling of feeders
- Connection or sealing of feeders
- Radio Frequency (RF) testing of feeders
- Provision and connection of jumpers
- Grounding cables and kits
- Clamping and connecting

Operation & Maintenance Services

This service covers parts of the Operation and Maintenance (O&M) activities Such as regular visits to sites and monitoring of different network elements from a central location.

Major tasks

- Trouble shooting of transmission equipment's
- Preventive maintenance of BTS and transmission link
- Routine maintenance of Power units, base station, Transmission and Microwave Equipment
- Routine maintenance of Alarm System, alarm handling, trouble reports
- Network Surveillance

Rigging

Riggers provide assistance in RF optimization group for works like antenna Installation, Tilting, Fixation of jumpers and TMA's connections.

Major tasks

- Antenna Tilting
- Installation of antennas
- Site Audit

Guyed Wire Towers

- Guy wire Lattice
- Guy wire Pols
- Guy wire Anita Mast
- Guy wire radio mast
- Guy wire utility mast

Fire protection and security system

The ARTC Fire & Security provides all types of Fire Protection and Fire Detection Systems, as well as state-of-the-art Security and Integrated Telecommunications Solutions to a wide range of market sectors such as Oil & Gas, Commercial, Aviation, Telecommunication, Transportation Facilities, Industrial, Power & Water and Marine. Our portfolio of solutions and services include:

- Fire & Gas Detection Systems
- VESDA Detection Systems
- CCTV Systems
- Intruder Alarm
- Access Control Systems
- Physical Integrated Security Management (PSIM)
- FM200 Gas Extinguishing System
- Water spray and Sprinkler Systems
- Water mist Systems
- Skid-mounted Fire Protection Equipment
- Fire Pumps
- Fire Alarm Systems
- Integrated Systems
- CO2 Systems
- Fire Monitor Systems (Water and Foam)
- Fire Fighting Equipment
- Portable Extinguishers

PIPING:

The ARTC is an all-around contractor for pipeline construction activities and especially for the Oil & Gas Industry including Jacketed & Non Jacketed pipe works and necessary process piping as per the industry requirements.

MECHANICAL & STRUCTURAL WORKS

The ARTC is fully capable of Fabrication and construction of Structural Building, Fence works, Pipe Racks, Tanks, Tool Box, Mud Tank, Frac Tank, ISO Tanks, Portable Cabins, Construction and Fabrication of Full capacity Camp Facilities and Maintenance Works. Etc.

HVAC & THERMAL INSULATION

From design to testing and commissioning and maintenance of all type of DX systems – Roof Top Package units, Central Split units, Concealed ducted Split units, VRV Systems, Free standing units, Mini Split Units, Decorative Split units etc.

All type of chilled water system (Air Cooled or Water Cooled) including chilled water piping networks and all related works complete with testing and commissioning and maintenance.

MAINTENANCE WORK

When it comes to choosing a service provider company for your site development and maintenance issues, look no further than ARTC.

We have repeatedly sought out new innovative methods, passing on greater economic savings to our clients.

Site Maintenance is one segment of our industry that is crucial to project owners realizing the full value of their investment capital and maximizing their profit margins. The ARTC staff stands ready to assist you in every aspect of your site's specific needs. Keeping your site and equipment performing at its best is our goal. Our staff and crews are experienced in evaluating and correcting your site deficiencies, allowing you to extend the life of your properties and equipment.

DESTRUCTION WORK

MAINTENANCE WORK

Like every part of life, structures come to an end. Let this ARTC Company show you the safest and most cost effective way of removing your structure.

When your structures are approaching the end of their lifespan, let our team evaluate the safest and most cost effective method of removing your structure, and other site improvements as needed.

From removal and replacement of the tower or complete removal and restoration of the site, this ARTC is your answer.

We have the training and personnel with the experience to safely execute your project to an economic conclusion. Our key personnel have been involved in the industry form its inception, which allows this company to minimize your at risk issues.

The ARTC also offers years of on-hand experience in site erection capabilities for steel structure, plate works and tanks, which extend our services beyond steel fabrication and allow us to offer our clients a complete solution package for even the most complex site requirements.

We ARTC is satisfied to deliver a wide range of professional facility management system to the companies.

Facilities management encompasses a range of disciplines and services to ensure the functionality, comfort, safety and efficiency of a built environment buildings and grounds, infrastructure and real estate.

It includes

Operations and maintenance.

The end goal for any business is to cut cost, improve staff productivity and increase Return on Investment.

An effective facilities management process is vital to an organization.

This is because it covers almost all the business aspects, and their role in strategic planning helps a company achieve their business objectives.

Facilities management is responsible for the security, maintenance and services of work facilities to ensure that they meet the needs of the organization and its employees.

Facilities management essentially look after all of the services that helps a business or other organization do its work.

There are two major types of facilities management, Hard Facility Management and Soft Facility Management.

Hard FM refers to services relating to the actual structures and systems that make a facility work, and can include fire safety, plumbing, structural, and elevator maintenance

Workplace and facilities professionals are responsible for services that enable and support business performance.

Roles cover management of a wide range of areas including: health and safety, risk, business continuity, procurement, sustainability, space planning, energy, property and asset management.

e deserve responsibility in front of society and we have a history of careful planning and management of safe work sites committed to the time factor and achieving quality and excellence in performance.

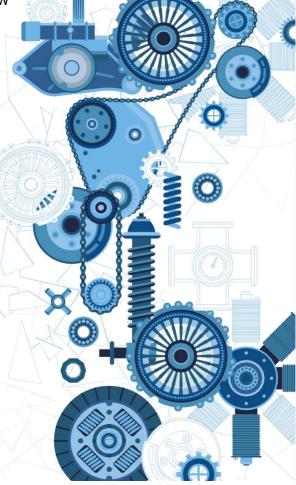

> Our strength

- Managed by the industry's most experienced and well-trained staff.
- Frequently updated data bank

 Continuous monitoring & upgrading of new Project development.

> Our selection process

- An initial phone screening to determine Employment eligibility.
- Skill-based testing.
- An in-depth face to face interview.

Rental division

The following machinery is either self-owned or can be made available at a short notice, depending on the nature of the work. Additional machines and equipment are also available in the market on hire basis.

General Services

Implementation of construction projects.

Implementation and maintenance of electromechanical projects.

Implementation and maintenance of air conditioning and refrigeration projects.

Implementing projects and operations of rehabilitation & restoration of buildings.

Implementation and maintenance of fire systems projects.

Projects, operation and maintenance of buildings.

Customs leeway is the demonstration of taking merchandise through the tradition's position to encourage the development of payload into a nation (import) and outside the nation (send out). Additionally, the traditions freedom implies a report gave by the power of the tradition to a transporter showing that the total of what obligations have been paid and the transporter's merchandise is cleared for send out.

Our strength

- Managed by the industry's most experienced and well-trained staff.
- Frequently updated data bank.
- Continuous monitoring & upgrading of new project development.

> Our selection process

- An initial phone screening to determine employment eligibility.
- Skill-based testing.
- An in-depth face to face interview.

ARTC is a leading provider of janitorial & building maintenance services. We have been offering cleaning solutions to commercial & residential buildings, financial institutions & city government, industrial & manufacturing clients, national & multinational corporations & entities. As the market leader in the cleaning industry, our success has originated from our unwavering commitment to our clients. We are committed to 100% satisfaction with our trained, experienced, committed & professional staff.

Technical Resources

In addition to hub of multidisciplinary engineering contracting work, the division provides a broad range of technical services according to project needs.

These services include computer aided engineering (CAE), computer aided drafting (CAD/CAM), document control systems, estimating, procurement, accounting, project management, materials control/inventory management, quality assurance (all of which are computer based and integrated) and specialized engineering software packages.

A total project package may cover initial feasibility studies, front end and detailed engineering design, procurement, construction, commissioning and preliminary startup services, or it may only entail operator and plant hire to suit a particular client's needs.

In order to meet the complete range of client and project requirements,

The ARTC employs professionally qualified engineers from requisite disciplines, supported by a team of experienced draftsmen, estimators, procurement officers, planners, safety supervisors, industrial relations supervisors, quality assurance supervisors, and accounting systems and administrative personnel.

The ARTC team has up-to-date knowledge of applications of modern information systems and technology in the construction industry.

The ARTC employs experienced quality assurance professionals and inspection staff to ensure that the quality management principles are followed on all
