

Get up and running with !Observe Prime

User's Manual

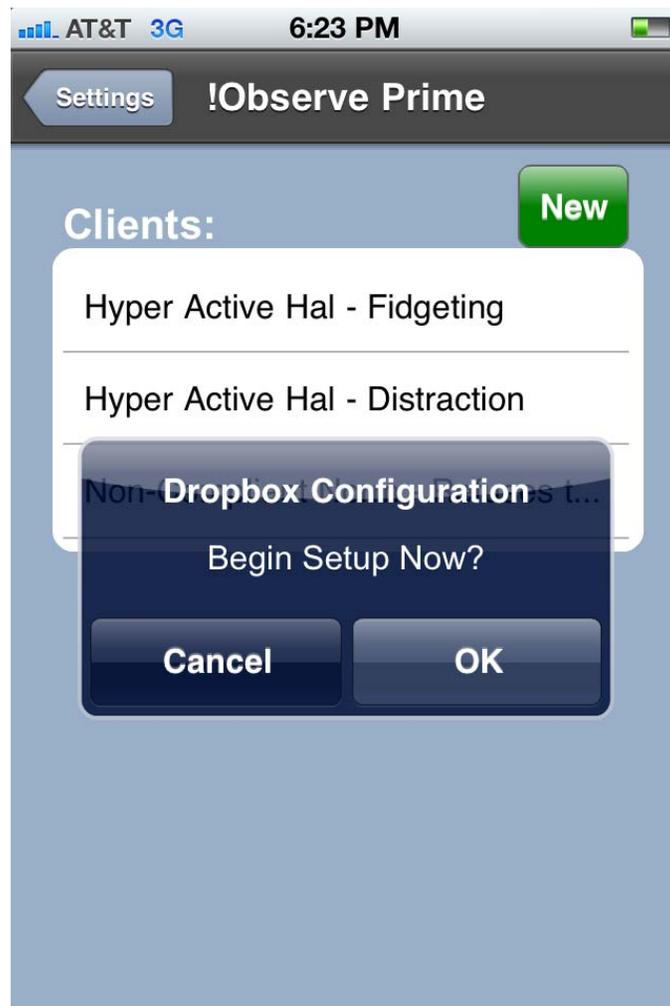

STEP 1 - Create Password

The screenshot shows a mobile application interface for 'User Login'. At the top, the status bar displays 'AT&T 3G' and '6:22 PM'. The app title 'User Login' is centered in a dark header. Below the header, the text 'Create a password.' is displayed. There are two text input fields: the first is labeled 'Enter Password' and the second is labeled 'Re-enter Password'. A 'Save' button is positioned below the second input field. At the bottom of the screen, a standard QWERTY keyboard is visible, including keys for numbers, space, and return.

After the Psychsoft Screen, you will see the login screen where it will ask you to “Create a Password”. This is a security measure to protect your data.

STEP 2 - Link Dropbox with !Observe

Before we introduce Program details, we would like for you to set up Dropbox, which will enable you to send material to your desktop for printing and keep your data safely backed up in the Cloud.

Please tap "OK"

STEP 3-Dropbox Setup Continued

When this screen appears, it will alert you that you will be sent to Dropbox.com, please tap “Continue”.

To do this, !Observe Prime will need to close in order to take you to Dropbox.com to setup an account and link it to the application. *Please note that !Observe Prime will close, but you will need to return to it immediately after finishing the Dropbox setup.

STEP 4 - How to Register a Dropbox

AT&T 12:01 PM 100%

Log in

www.dropbox.com/m/coi Google

 Log in to Dropbox

A Dropbox app wants to link with your account.
[Need a Dropbox account?](#)

Email address

Password

Remember me

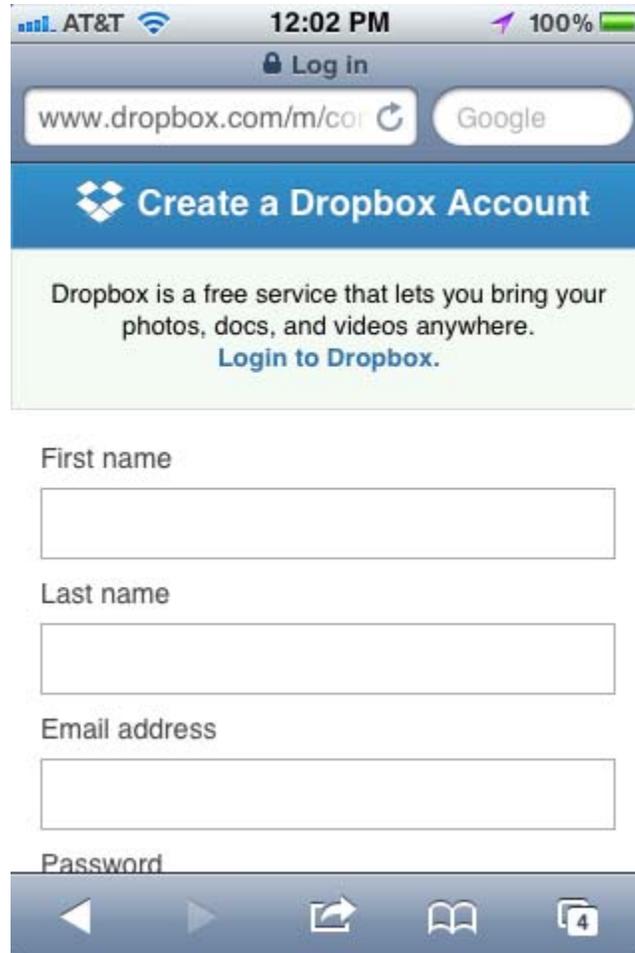

Log in

Desktop version English

Once you tapped “Continue”, you will be taken to Dropbox registration.

If you already have a Dropbox account simply Log in and your account will be automatically linked with !Observe Prime. If you do not already have an account click the “Need a Dropbox Account?” link at the top of the page.

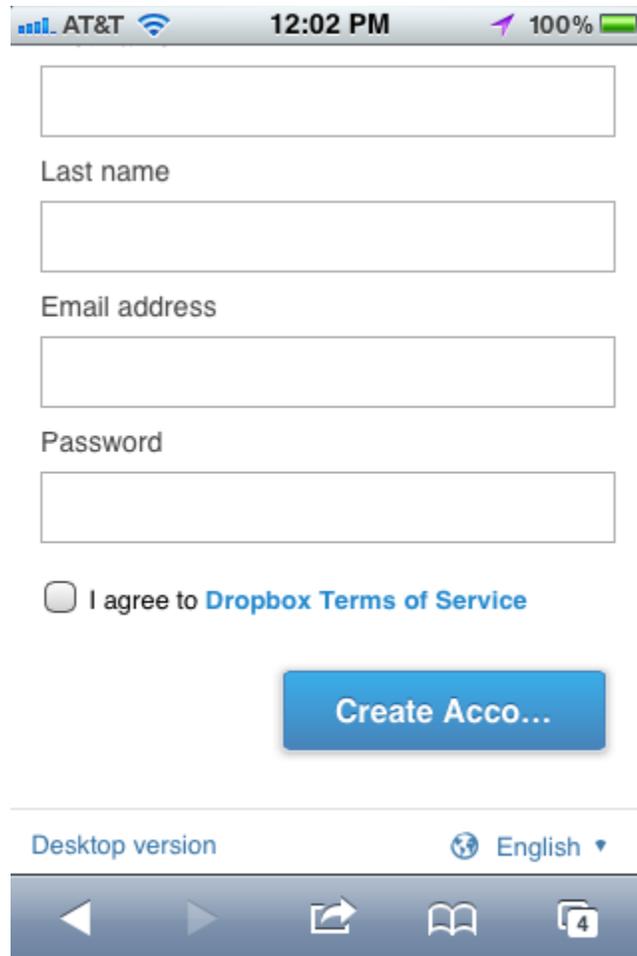

How to Register Dropbox- Continued

The screenshot shows a mobile browser interface for the Dropbox registration page. At the top, the status bar displays 'AT&T', signal strength, Wi-Fi, the time '12:02 PM', and a 100% battery level. Below the status bar is a 'Log in' button. The address bar shows 'www.dropbox.com/m/cor' with a refresh icon and a 'Google' search button. A prominent blue banner features the Dropbox logo and the text 'Create a Dropbox Account'. Below this, a light green box contains the text: 'Dropbox is a free service that lets you bring your photos, docs, and videos anywhere. Login to Dropbox.' The registration form consists of four input fields: 'First name', 'Last name', 'Email address', and 'Password'. At the bottom, a navigation bar includes back, forward, share, bookmarks, and tabs icons.

You are now on the Registration page. You will only be asked to provide First/Last Name, valid email address, and a password to setup an Account.

How to Register Dropbox- Continued

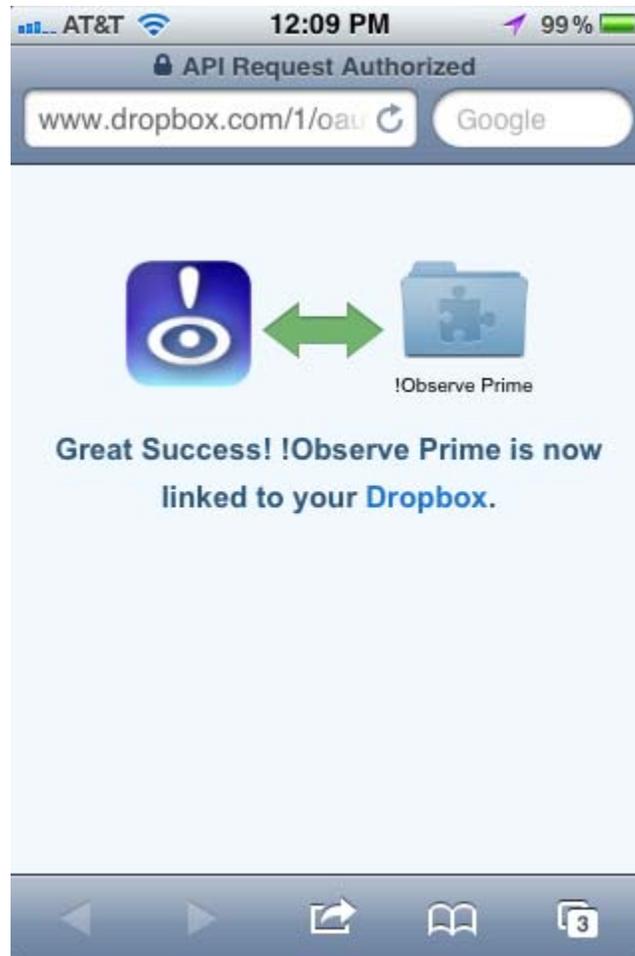

The screenshot shows a mobile device interface for the Dropbox registration process. At the top, the status bar displays 'AT&T', signal strength, Wi-Fi, the time '12:02 PM', and a 100% battery level. Below the status bar are four input fields: 'Last name', 'Email address', and 'Password'. Below the 'Password' field is a checkbox labeled 'I agree to [Dropbox Terms of Service](#)'. A blue button labeled 'Create Acco...' is positioned below the checkbox. At the bottom of the screen, there is a navigation bar with 'Desktop version' on the left and 'English' with a dropdown arrow on the right. Below the navigation bar is a dark blue bar with icons for back, forward, share, bookmarks, and tabs (showing 4 tabs).

You will then need to to click and agree to the Dropbox Terms of Service.

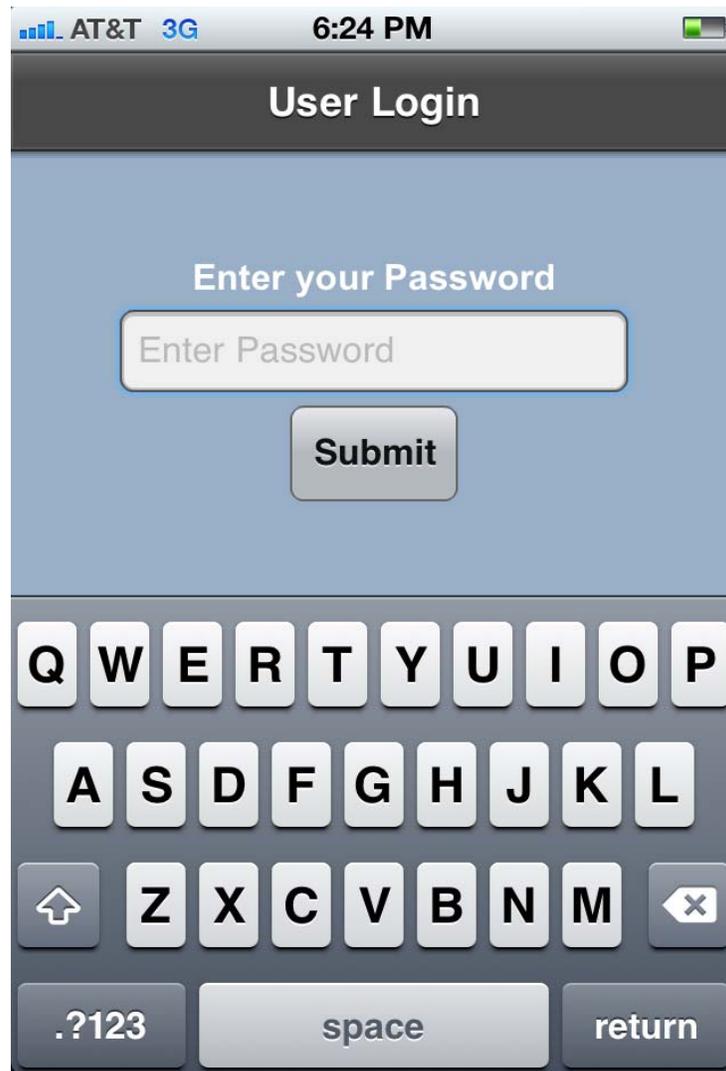

Click the Create Account button to finish registration.

How to Register for Dropbox- Continued

!Observe is now linked to your Dropbox account. It is very important that you return immediately to the !ObservePrime application by closing the browser and re- launching !Observe from the icon on your home screen.

STEP 5 - Re-launch and Login to !Observe Prime

AT&T 3G 6:24 PM

User Login

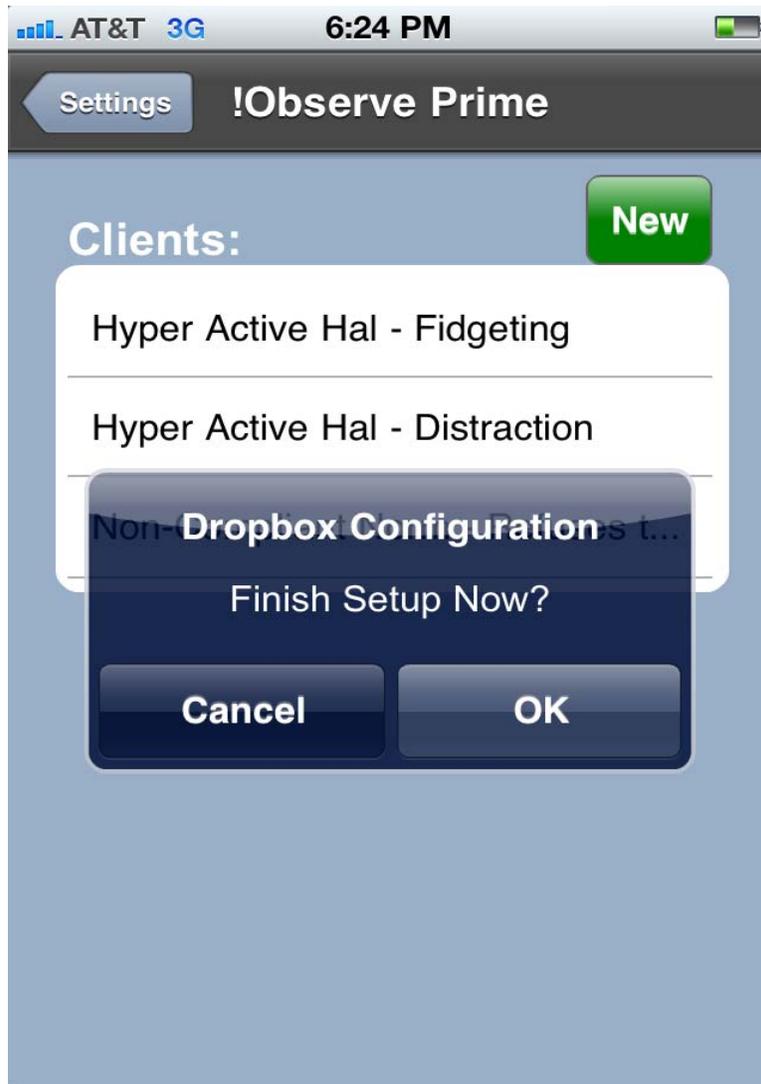

Enter your Password

Submit

Q W E R T Y U I O P
A S D F G H J K L
↑ Z X C V B N M ↵
. ? 1 2 3 space return

On this Screen, enter your password and click the Submit button

STEP 6 - Complete Dropbox Setup

You will immediately be prompted to finish the Dropbox setup, please tap "OK"

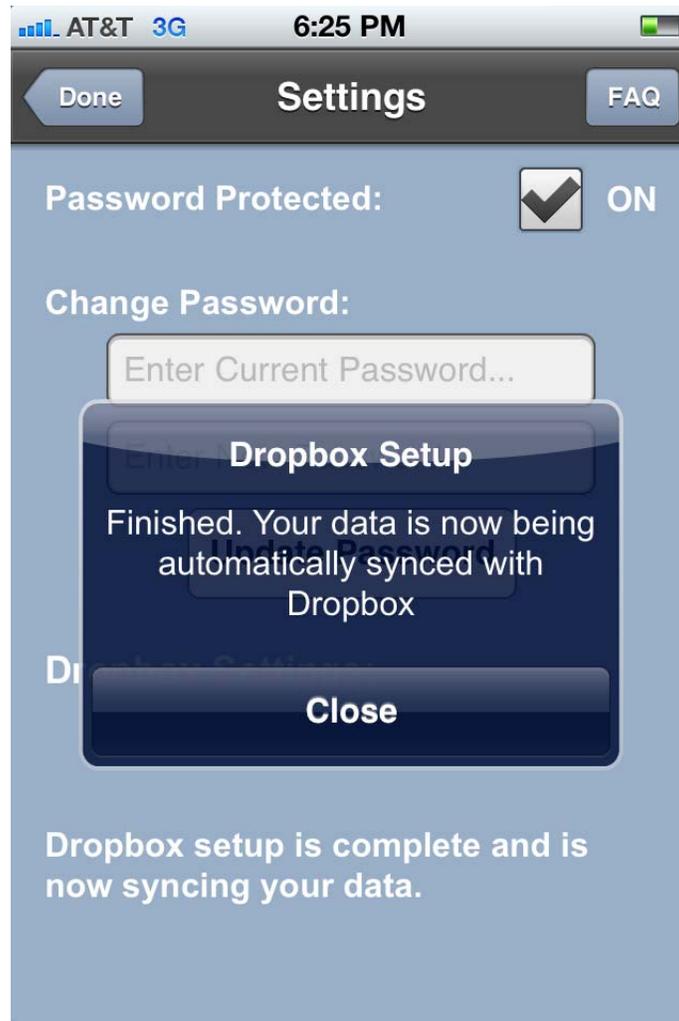

STEP 7-Complete Dropbox Setup and Sync Data

If this is the first time you are installing !Observe click Continue.

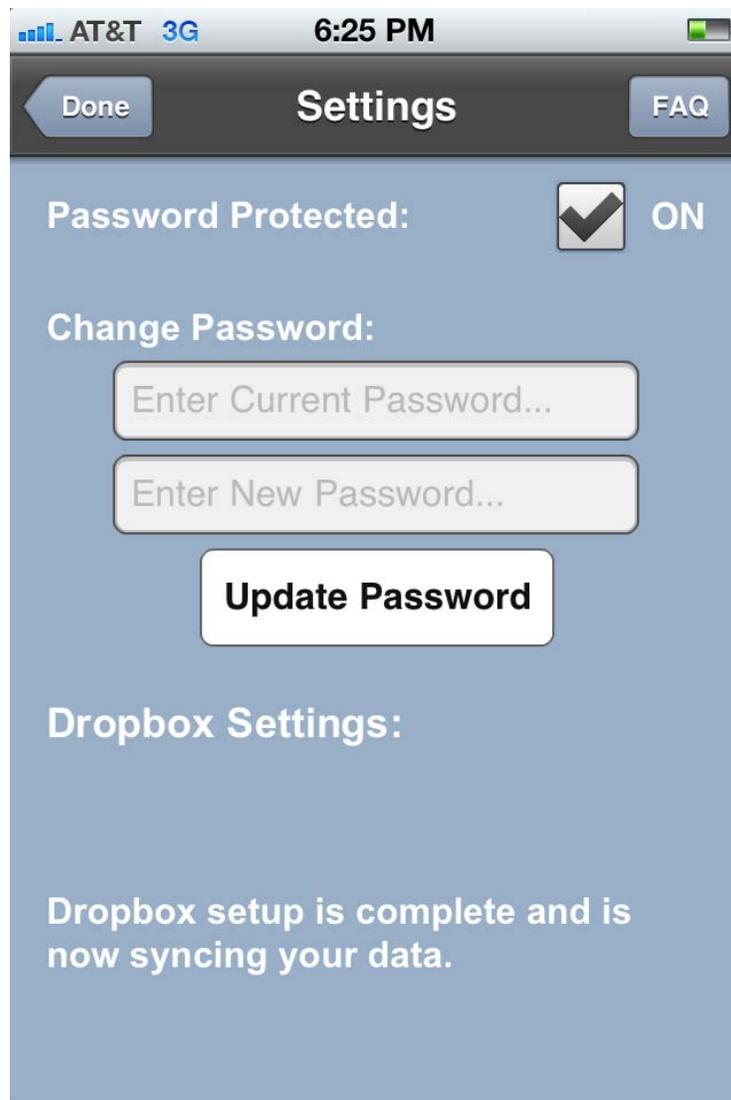

Warning: if you are re-installing !Observe **any** changes you made to your data before setting up Dropbox will be lost. That is why it is a best practice to immediately setup Dropbox should you need to re-install, in order to keep data synced properly.

STEP 8- Finishing Up Data Sync

The Dropbox Setup is complete. Your data is now being backed up to your Dropbox account and you can successfully export charts, graphs, and tables to your computer. You may now tap “Close”

STEP 9 - Settings

On this screen, you have the option of changing some of the application settings.

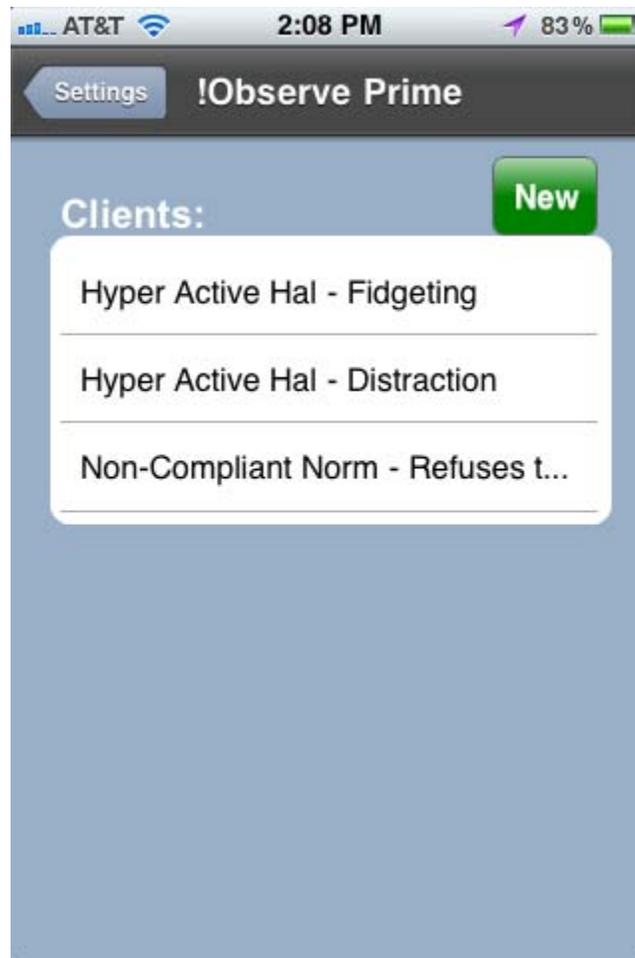

You can choose to disable the password protection feature which asks for your password each time when launching the app. If you would like to disable having to enter a password, uncheck the password protected option.

You can also on this screen change the password if you would like to set up a different one.

Unless you want to change your Password or turn off the Password Protection feature (enabled by default to protect your data), tap "Done".

!Observe Prime is now setup and ready to use. We are now going to do a quick demo and walk you through the basics of using the application.

Step 10- Application Demo

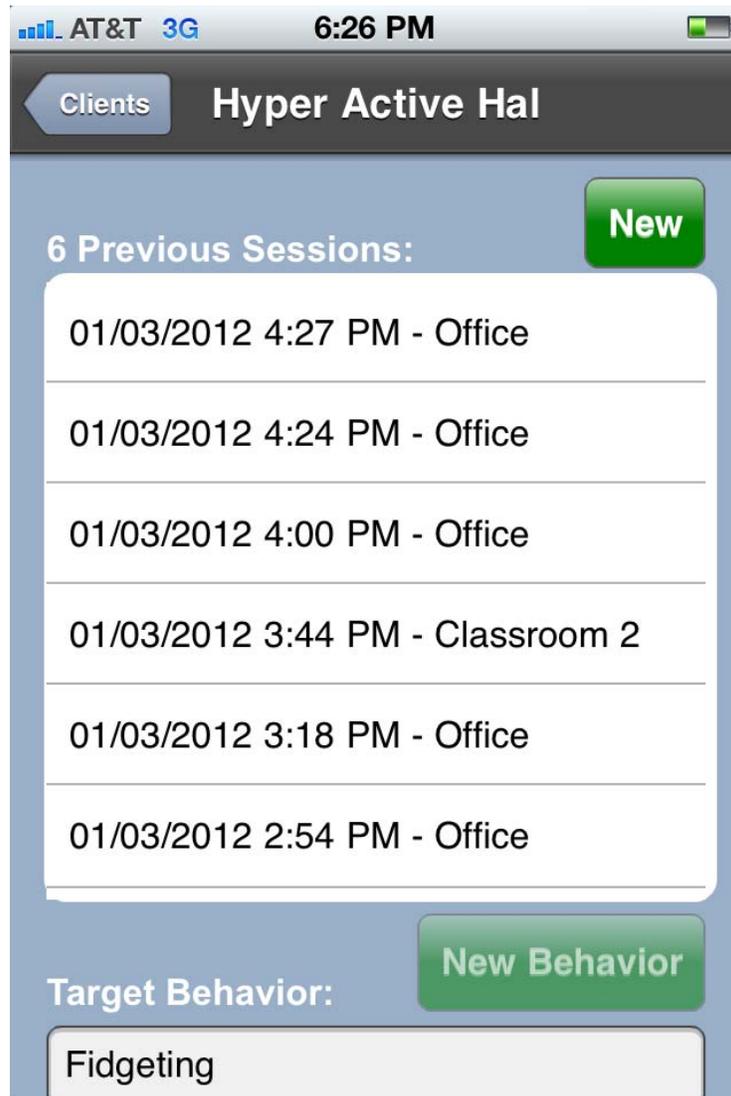

You will be presented the Client screen after you login. It will come loaded with 2 demo clients (Hyper Active Hal and Non-Compliant Norm).

Note: Hyper Active Hal has two Target Behaviors (Fidgeting and Distraction).

Tap on the demo, Hyper Active Hal - Fidgeting entry in the list.

STEP 11 - Using !Observe Prime Demo

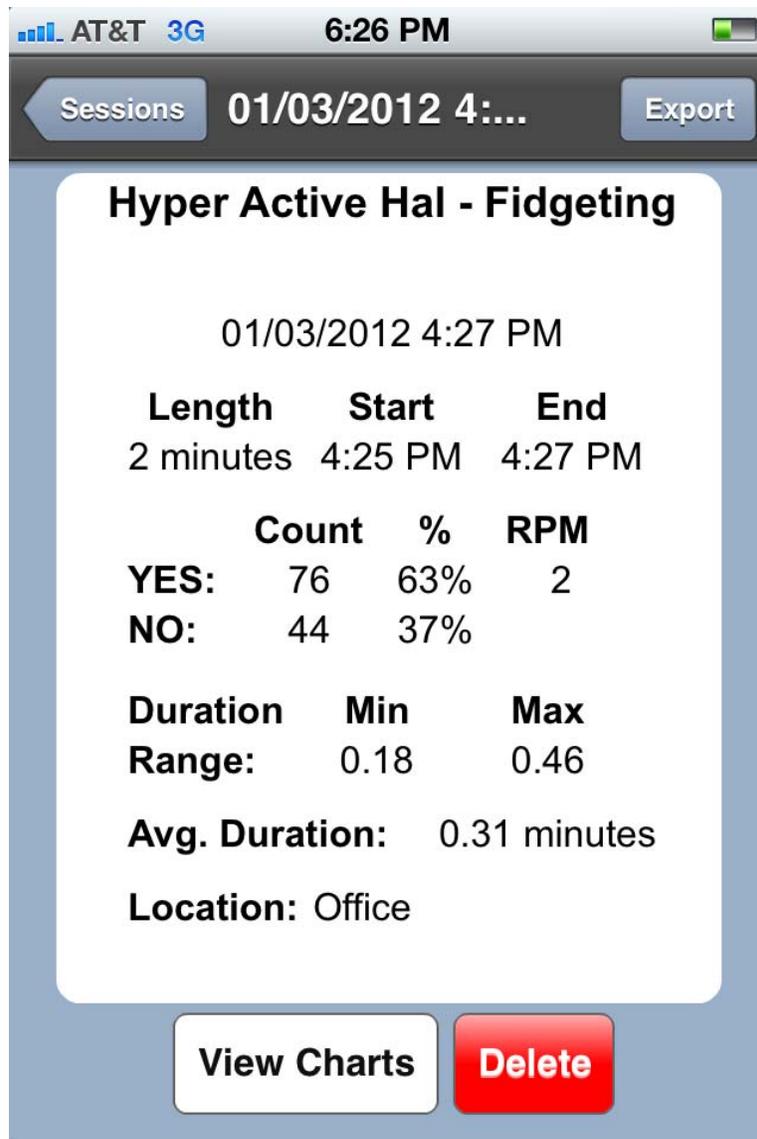

The screen will show that Hyper Active Hal has been observed in 6 previous sessions.

It will show 5 sessions in the Office and 1 in Classroom 2.

His Target behavior is "Fidgeting"

Tap the first session on the list

STEP 12- Using !Observe Prime Demo

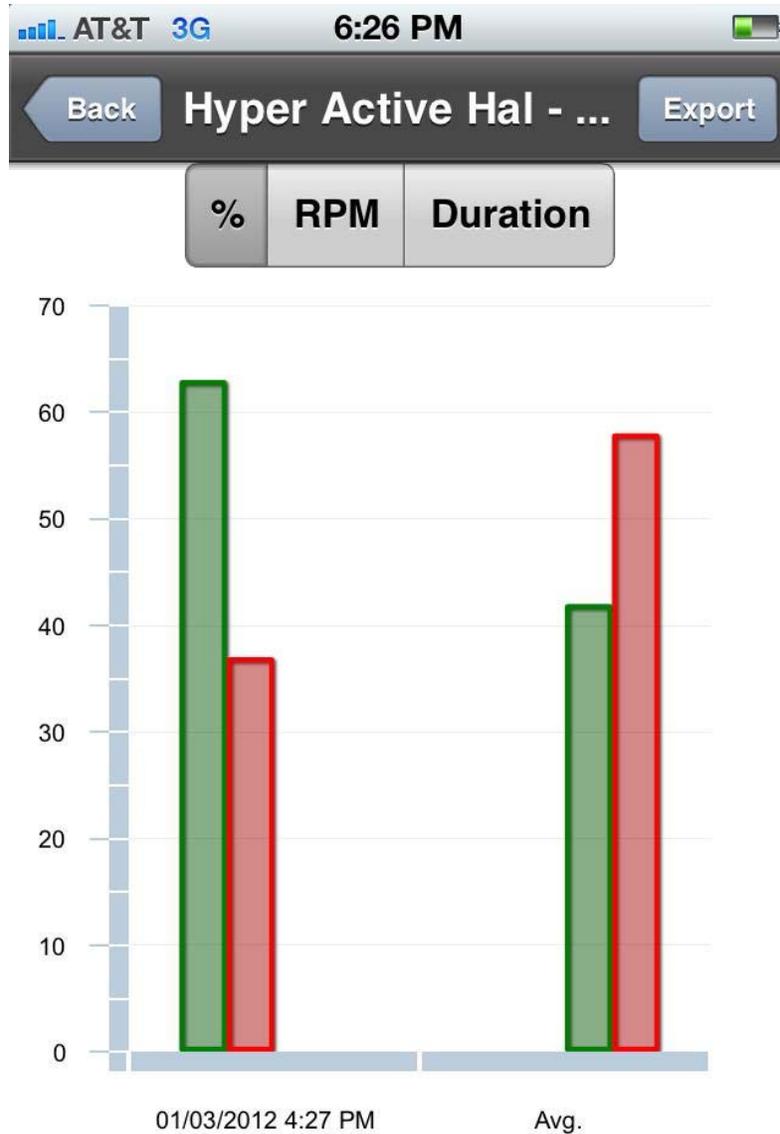

We have tapped on the first session shown- 01/03/2012: 4:27 and the Table above appears. It contains the following information:

1. The observation was 2 minutes total
2. Hal "fidgeted" 63 percent of the observation
3. He averaged 2 per minute
4. The avg duration of his "fidget" was .31m
5. His "fidgets" took place in the Office

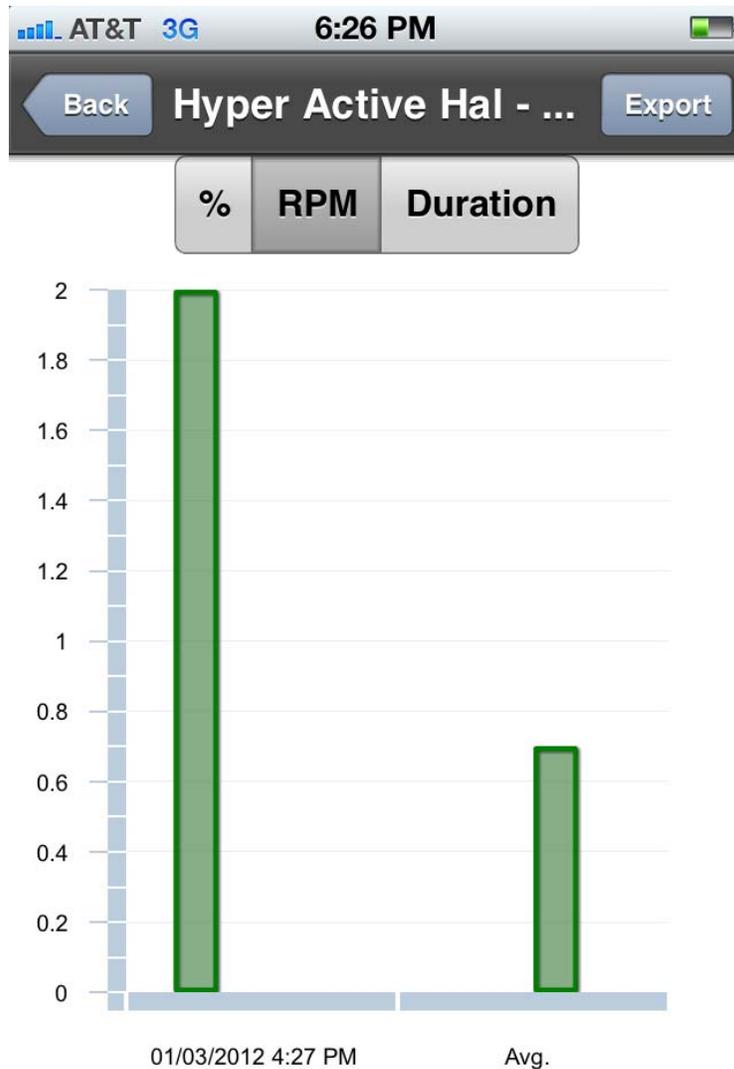

We can now Export this data to Dropbox and/or view them in Chart form.

STEP 13- Using !Observe Prime Demo

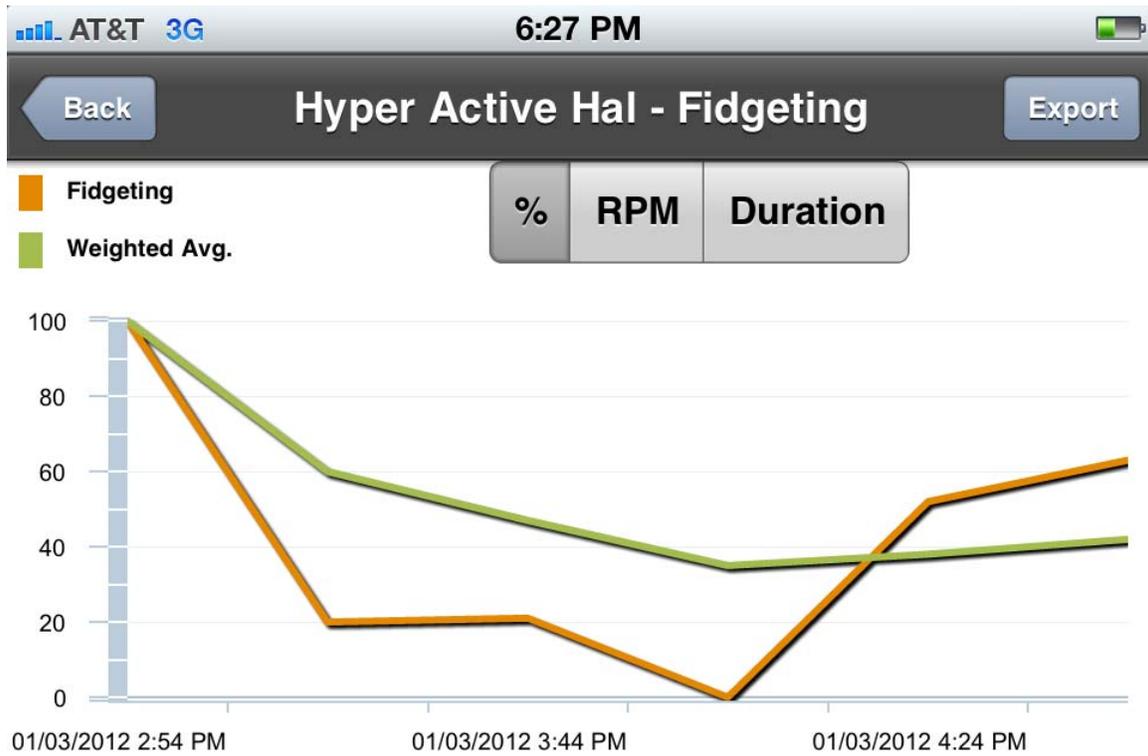

Here is the Histogram Chart of Hal's "fidgeting" shown by Percentage. The histogram on the left shows data from the observation session on 01/03/2012, which is the most recent of the 6 observations done. The histogram on the right hand side of the Chart, shows the running average over the 6 observations. The Chart displays that on this most recent observation, Hal "fidgeted" almost 65% of the time; whilst his average is 20 percentage points lower. Looks like he had a bad day!

STEP 14- Using !Observe Prime Demo

Checking Hal's Rate (or Event) per Minute count for the observation session on 01/03/2012 reveals 2 "fidgets" per minute. Hal's average over the 6 observations is around .7

STEP 15 - Using !Observe Prime Demo

While in the Chart Mode, rotating your device to the right or left will put !Observe into the LANDSCAPE POSITION which creates a GRAPH of all observations completed for Hal to date. We have all 6 data points for "Fidgeting". We have chosen to look at Percentage but could also call up Rate Per Minute, or Duration.

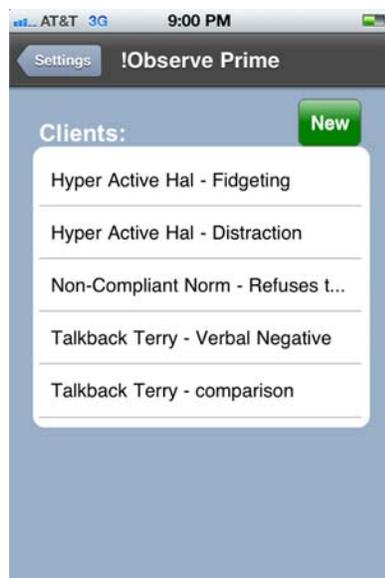

Data for individual sessions is displayed in Orange, the Running Average is shown in Green.

Of course all Tables, Charts, and Graphs can be exported to your computer.

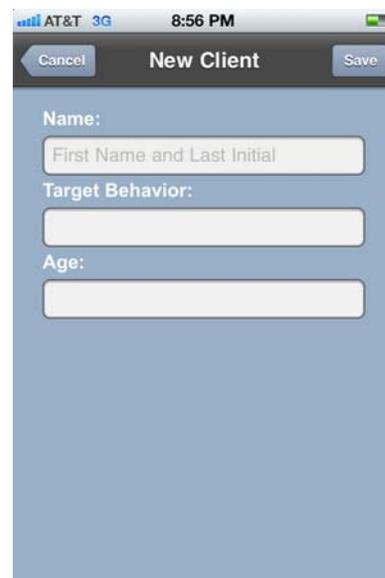

Common Questions and Answers

Question :
How Do I Start a new client?

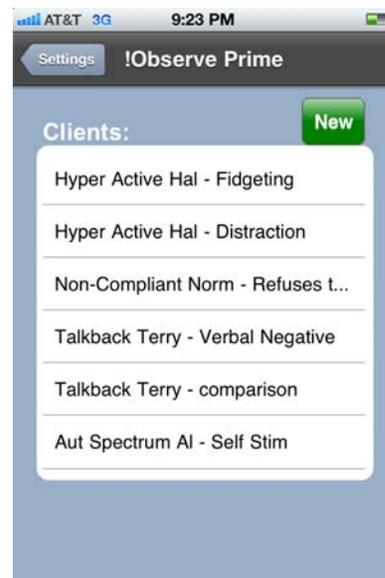

Answer:
1. Go to your list of clients, and tap on “New”, and a new client screen will pop up.

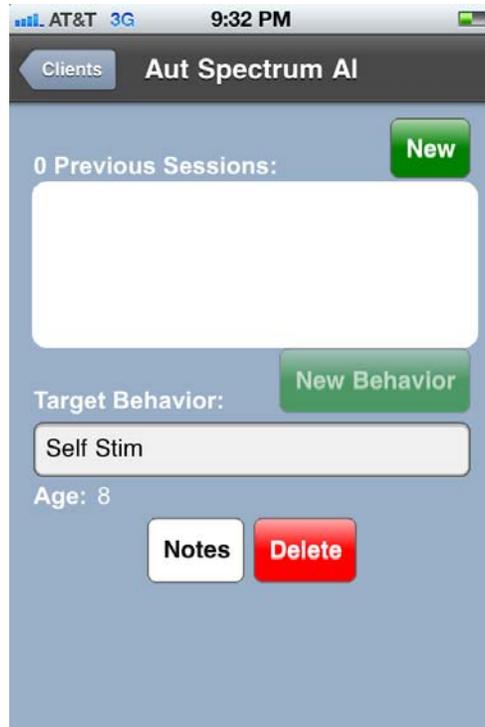

Above: Client Screen

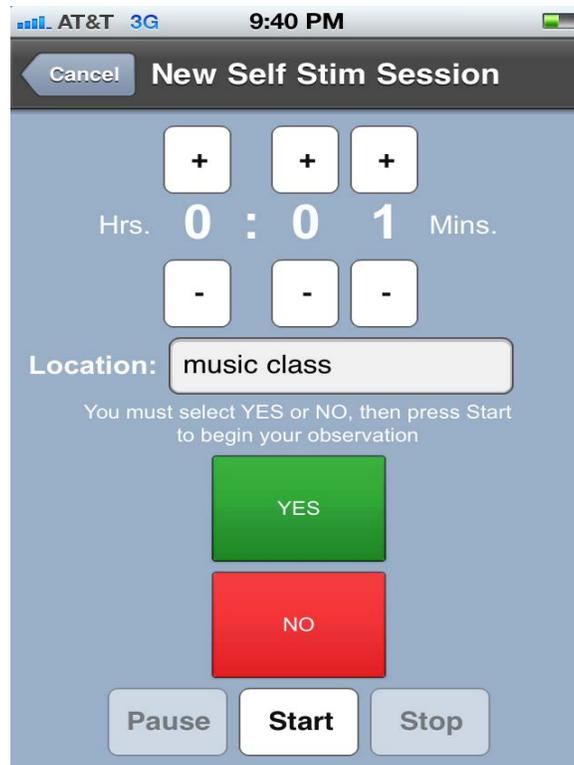

Above: New Client Screen

2. Fill in details of your new client. Here we used Aut Spectrum AI with Target Behavior Self Stim and made his Age 7. Hit save and your new client now appears on the List of Clients screen. Go ahead and tap on your new client.

3. After you tap on AI, the above screen appears. The Sessions window is blank because this is your first session with this client. The Target behavior “Self Stim” appears in the Target Behavior window. You have the ability to add new Target behaviors, and we will discuss this later. Now that you are ready to begin observing, tap “New” button in the upper right hand corner, designating that you are beginning a new session.

4. You have now reached the data entry screen. Your first decision is the length of the observation session. We will choose a 1 minute observation by selecting the “+” sign above the 0 furthest to the right. (Alternatively, if we wanted to do a 30 minute observation we would have selected the “+” sign above the middle 0 three times.)

Next you fill in the location where the observation will take place. Here we put music class. !Observe Prime will automatically save the last location used for each client’s target behavior. So the next time you setup an observation for Aut Spectrum AI - Self Stim the location box will automatically show music class (or whatever you entered there).

During an observation, you enter data via two buttons. The Green or Yes Button indicates the Target behavior is present; the Red or No button indicates the Target behavior is not present.

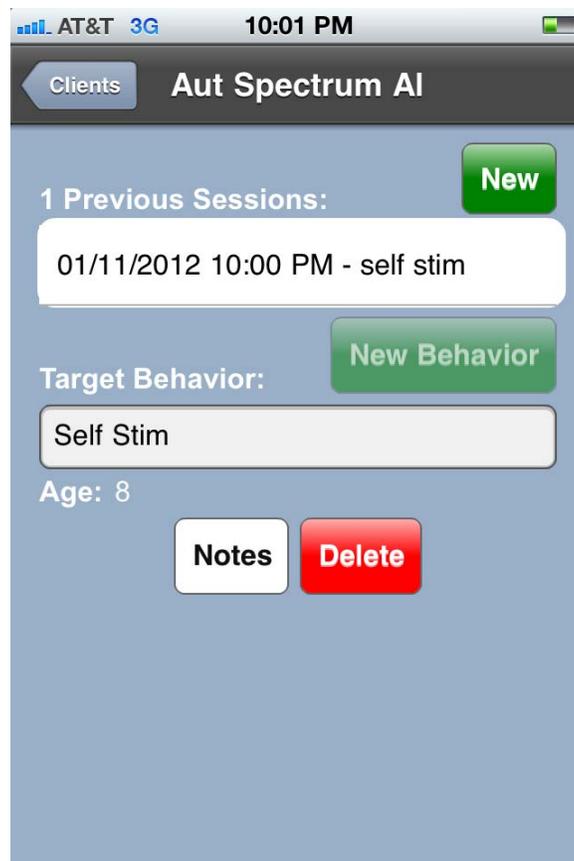

To begin an observation, you are required to indicate whether the behavior is present or not before hitting the Start button. You can stop or pause the observation at any time using the appropriate buttons. When the observation is complete, or when you push the Stop button, the Data Summary Table automatically appears. Pausing is used to stop all functions, so they may be resumed without affecting issues of %, RPM, or Duration

Question :

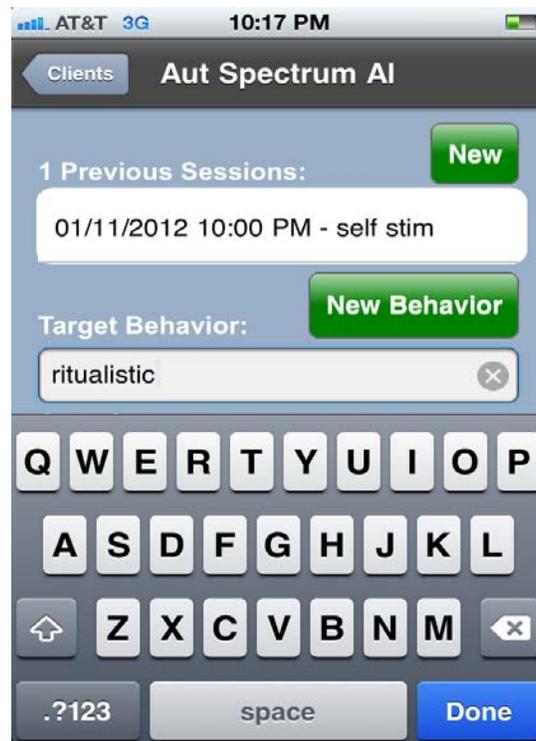

How do I observe multiple behaviors? My referral seems to have more than one problem.

Answer:

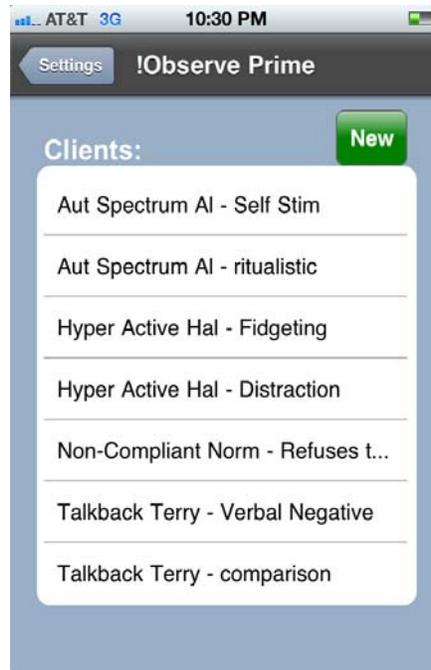

Apparently, Aut Spectrum AI has more than a self stim problem. He is also engaging in ritualistic behaviors that need to be addressed.

1. Go to the list of clients and tap on AI, and the following screen will appear. We see that one observation has been completed, and data available for the Target behavior “Self Stim”. But now we need to look at “ritualistic” behavior.
2. Tap on the Target Behavior box an “x” will appear. Clear it by tapping the “x”. Now type in “ritualistic”.

3. Click “Done” on the keyboard and then tap “New Behavior”. This will create a new client entry with specified Target Behavior. To verify this click Clients button at the top left of the screen which will take you back to the list of clients, and you will see a second entry for AI, you can start gathering data.

Question :

I always like to observe a comparison individual during an observation. Can I do this with !Observe Prime?

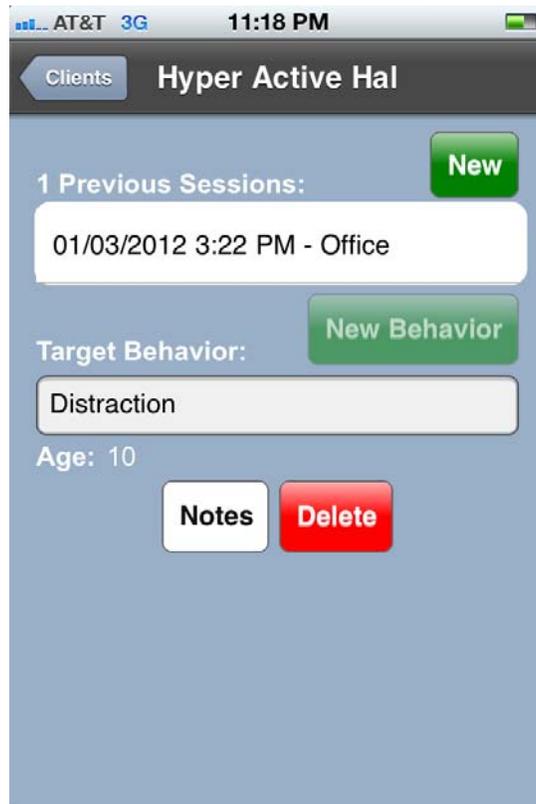

Answer:

Yes you can! Let us go to Hyper Active Hal, as an example. We've been tracking "Distraction", and are interested in how he compares to someone else in his class.

1. Go to the client list and tap on Hyper Active Hal-Distraction, you will see the following screen with "Distraction" listed in the Target Behavior screen. (See previous screen, and Figure below).
2. Tap on "Distraction" and a small x will appear in the box. Tap on the x and "Distraction" will disappear. Now type in "Comparison".
3. Tap "Done" on the keyboard, and then "New Behavior".
4. Go to the Client list and find Hyper Active Hal- Comparison. (Fig 2)
5. You can now observe Hal-Distraction for a designated amount of time; and then go to Hal-Comparison for a designated

- amount of time within the same observation window as Hal-Distraction. Alternate your comparisons.
6. Export your output via Dropbox and compare Hal with his Comparison.
