Suzhou Weijing Automation Co., Ltd

POURING MACHINE

WHY SWITCH MANUAL TO AUTO POURING

POURING MACHINE

WHICH SCENARIOS YOU ARE

POURING MACHINE

UNIQUE FEATURES & VALUES

1. Only 2 m width and 1350 mm height required.
2. No foundation digging required.
3. Semi-auto and full auto are available to select.
4. Suitable for horizontal lines and vertical molding lines. (flask line: 40-120 molds/hour, boxless line: 50-200 molds/hour, vertical line: 120-300 molds/hour)

Vertical molding line

Horizontal molding line

POURING MACHINE

WHICH FUNCTIONS YOU WANT

Auto exchange station of ladle (optional)

POURING MACHINE

WIRELESS CONTROL POURING FOR AMF LINE

More close to check

More precise could be ensured

More molten iron saved

Less investment required

Less time to return

Less labor required

The best pouring solution for molding rate < 80 molds per hour

POURING MACHINE

SYNCHRONIZED POURING FOR FBO LINE

Molding rate required:
80-300 molds per hour

Pouring cup: ≥ 110 mm

Mold pushing speed:
120-160 mm/sec

Pushing force of
molds should be
stable and no return

Up to 20% probabilities, synchronized pouring can help you

POURING MACHINE

AUTOMATIC WEIGHING

Pouring weight
visualized

Pouring quality
guaranteed

Flow rate determines
casting precision

Pouring accuracy could be up to ± 0.75 kg

POURING MACHINE

AUTO LADLE EXCHANGE STATION

Only for molding rate
up to 120 molds/hour

Once ladle refilling
can save 45 seconds
at least

POURING MACHINE

POURING FOR DISA VERTICAL LINE

Mobility empowers
WEIJING machine to
“jump” over unready
molds to the next
ready mold

Save time
Save molten metal
Save money for
foundries

Can suit molding rate up to 300 molds per hour

POURING MACHINE

WHICH WEIJING PROVIDES

WEIJING will provide below items:

Pouring Machine: 1 set (including Control Cabinet) Ladle: 2 units

Hand-wheel hanger of ladle: 1 unit

Sliding cable hanger: 1 set (including cables, C rails, **excluding cable hanger brackets**)

POURING MACHINE

WHICH FOUNDRY SHOULD PREPARE

The foundry needs prepare below items:

1. Rails & pads
2. Brackets for sliding cable and rails
3. Platform for temperature measurement
4. Ladle refilling platform
5. Drain tank and Chute

WEIJING will provide the related drawings to the foundry, the foundry can make it according the drawings before the pouring machine arrival.

POURING MACHINE

MAIN PARTS OF WEIJING POURING MACHINE

- 1, Ladle
- 2, Ladle tilting device
- 3, Horizontal moving
- 4, Longitudinal moving
- 5, Lifting device
- 11, Electric cabinet

- 6, Auto weighing
- 7, Stream inoculation
- 8, Ladle lid opening & closing
- 9, Tapping detection
- 10, Control room

Semi auto solution has: synchronized stream inoculation, signal interlock, wireless manual control.
It suits molding rate from **50 molds - 80 molds/hour**.

Full auto solution includes all functions of Semi auto solution, and auto weighing, synchronized pouring.
It suits molding rate from **80 molds - 300 molds/hour**.

POURING MACHINE

DETAILS YOU MAY CARE

1. Ladle: capacity normally up to 1200 kg, big capacity could be customized
2. Ladle tilting: servo drive, 1/200° precision, tilting speed: up to 6°/s, tilted angle: up to +42°, pouring speed: up to 20 kg/s.
3. Machine horizontal movement: inverter motor drive, velocity up to 0.7 m/s, encoder location, ± 1 mm location precision, the moving distance up to 17 meters.
4. Machine longitudinal movement: variable frequency drive, distance up to 450mm, velocity up to 200 mm/s.
5. Ladle longitudinal moving speed: 100-200 mm/s
6. Ladle lifting device: raise or descend the ladle, distance: 0-280 mm, speed: 0-20 mm/s. (for horizontal molding lines)
7. Auto weighing: equipped with 4 American TRANCELL dynamic sensors, pouring accuracy up to ± 0.75 kg
8. Synchronized stream inoculant: speed is 2-7 g/sec, precision is ± 1 g per mold, 3 speeds to choose, adjustable input angle, touch screen to set parameters, capacity is 25 kg.
9. Ladle lid opening & closing device: inverter motor drive, speed is 20-30°C/s. (The lid of ladle for quick setup station is fixed)
10. Pouring location detection: precisely detected by infrared ray, avoid any misjudgment.
11. Tapping detection: precisely detected by infrared ray, timely feed back the current tilting angle, guarantee right tilting angle.
12. Control system
Components: MITSUBISHI QPLC, PROFACE Touch screen, MITSUBISHI Servomotor, MOELLER Time Breaker and Air Switch.
HMI: operating status and trouble shooting visualized, pouring data recording, formula saving, input pouring data.
13. Optional: auto ladle exchange station. Moving speed: 100-200 mm/s. Normally takes 45 s. Once ladle refilling can save 45 seconds at least.

POURING MACHINE

COMMISSIONING PROCESS

First Pouring

- Set the pouring data based on theoretical data.
- Use infrared ray to detect pouring cup precisely.
- Manually adjust the pouring volume to right level.

Data Getting

- Save the pouring data of first mold as reference for future auto pouring comparing automatically.
- Communicate with molding line for synchronized pouring.

Pouring Next

- Move to next mold automatically.
- Find out pouring cup automatically and pour to the right level.

POURING MACHINE

SALES PERFORMANCE

- **71** pouring machines sold
- Covers: China, Korea, Mexico
- Suits: SINTO, TOKYU, DISA molding lines.
- By **Sep 1st, 2024**.

By Aug 31th,WEIJING Tiling Pouring Machine have covered 3 countries

RIGHT PROCESS FOR RIGHT SOLUTION

POURING MACHINE

WEIJING

- **Established** in 2008, has two plants.
- **Weijing premises:** up to 9000 SQM in total.
- **What Weijing can make:**
 - **Casting Degating Machine:** Wedge Breaker, Runner Cutter, Sleeve Breaker, Degating Hammer.
 - **Auto Grinding Machine:** from 2 axis to 5 axis, capacity from 8 kg to 150 kg.
 - **Auto Pouring Machine:** tilting pouring machine with ladle capacity up to 1500 kg.
- **Mission:** providing the matchable machines to foundries worldwide with premium quality and excellent experience.
- **Culture:** positive action, honest communicating, transparent collaboration, is Weijing's Conduct Code.
- **Performance:** By Sep 1st, 2024, 1066 wedges, 58 cutters, 217 hammers, 236 auto grinders, 71 auto pouring and 17 auto transporter have been ordered by foundries worldwide and covers 26 countries.

POURING MACHINE

TWO FACTORIES

Suzhou premises

Yanzhou premises

POURING MACHINE

WHY WEIJING

WEIJING

As we firmly believe from the heart that the matchable is the best

POURING MACHINE

WEIJING FOUNDRY MACHINE, YOUR WISE CHOICE

POURING MACHINE
