NTMA Golf League Scoring Rules

Point Assignments

1. All players present
    Same point scoring system as in the past. The team captains (denoted by asterisk) play against each other, the remaining players making up the 2nd match and the combined team net score making up the 3rd match. With the lower net score (actual score less league handicap) winning the point in all 3 matches. In case of a tie in any or all of the matches, a half a point is awarded to each team for each of the tied matches.

2. One player missing from one team
    The one player will play against both players on the opposing team with the lower net scores winning the points. For the team match, the missing player will be assigned the score of net 41 to be used in calculating the team score.

3. One player missing from each team
    Each missing player will be assigned a net score of 41; they will tie their match and each team will awarded half a point. The remaining two points will be played out with the 2 present players, the normal match and the team match. (Which would be their score and net 41 for each player)

4. Both players are missing from one team
    A net 40 or better is required by each present player in order to win all three points

5. One player for one team and both players missing from the other team
    A net 40 or better is required by the player to win his match and the team match. The other match is defaulted and no points will be awarded. The maximum number of points awarded is two points. The non present team can not win any points even if the one player shoots net 41 or higher

In addition to the standard weekly play, these point assignments will apply to both of the position nights as well as the year end tournament.
