

NEW THIS SEASON!

Be sure to check out our NEW user-friendly website at har-bervillage.com and click on the EDUCATION tab to find out information about our home school offerings and details about visiting. The registration form is featured at the bottom of the education page so it is easy to access and easy to submit!

You might also find the NATURE tab to be informative about the Village's Nature Activity Room and Nature Trails—both of which would make great learning experiences!

The main story

Thanks to those of you who attended our first home school event and filled out an evaluation form. We spent time reviewing the data and comments you gave us. Because of that information we are now implementing several changes in the 2019 season. If you indicated that you would be willing to volunteer on that form, we will be in contact once we reopen for the new season.

We will be offering two home school event days in 2019 so there will be smaller numbers at each event and the learning stations (and our parking lot) will be less crowded. Some of you were unable to attend on a Friday so our spring event will be on Thursday, April 11, and our fall offering will be on Friday, September 13, 2019. Details are still being worked out for these dates, but it is not too early to get them on your calendar!

April 11, 2019
9:00 a.m. - 2:00 p.m.

The theme for this event will be Ecology and Environment. We have the perfect location to focus on this theme with our new Nature Trail, the Natural History Activity Room, and our beautiful grounds overlooking Grand Lake. Area agencies such as Blue Thumb, Bernice State Park, and Cherokee Nation Environmental agency will be here to interact with and teach ecology lessons in a fun way.

September 13, 2019
9:00 a.m. - 2:00 p.m.

The theme for this event will be the Arts. So many lessons can be learned in a new and different way by including the arts in our teaching. Experiences may include art, music, literature, quilting, and/or theater. And of course, we will include STEAM challenges in the activity offerings.

NEW Interactive fun for families!

The "Har-Ber Village Mining Company" is a mining sluice where our visitors can pan for gems and minerals. We expect this new addition to be open in late April. Additional fees will be needed to purchase the mining "rough." Thank you to Corkle Family Foundation and Grove Rotary Foundation for sponsoring this project!
