

Quantum Medical Innovations

Capability Statement

CAGE: 89R65 | www.qmillc.com | **DUNS:** 091003489

With over 100 years of combined experience, Quantum Medical Innovations LLC offers a team of professionals that focus on product development, prototype definition of new medical devices, and other markets that require equivalent precision or manufacturing discipline. A few of the fields that we specialize in include; plastic injection molding, precision CNC, wire EDM and Diamond Point Turning, sheet metal forming and tubing bending, sterile packaging, a full metrology support lab, and a paperless Quality System to maintain control. For more information on our services and federal contracting abilities, contact us today!

Core Competencies

- Ultra-thin wall injection molding
- 20T Sodick micro-molding machine w/ Robot Picker
 - 55T Roboshot Milacron
- Sheetmetal Fabrication & Tubing Bending
 - Full toolroom capabilities
 - Wire EDM & EDM Sinker
 - 4-axis CNC Milling Machine
 - Manual Mill & Lathe
 - Surface Grinder
 - Lapping Machine
- Sandblasting & Bead Blast Stations
 - 3-D Design and Programming
 - SolidWorks
 - OptiCam
- Metrology Lab w/ Micro-precision inspection
- Diamond Point Turning Machine w/ ultimate precision flatness & finish

Differentiators

- 100 years of combined experience
- Capable of creating many items w/ machinery
- FDA registered shop is guided by an ISO 13485 compliant Quality Management System
- Professional engineer certification
- Senior tool & die maker certification
- SolidWorks design of prototype concepts, prototype fabrication, & evaluation, & product scale-up, from concept, through clinical trials, to early-stage manufacturing
