

**\$0** Go Solar With **&** \*12 Months  
**NO Upfront Cost** **No Interest**  
**No Payments**

**Solar Energy Saves Money Plain and simple**, solar energy makes sense. Once the panels are on your roof, they will produce free electricity for you to use for decades to come. There is nothing for you to do except enjoy the savings. It's just a matter of how you pay for your equipment:

- Zero money down financed purchase
- Cash purchase

In both cases, you can save money, lots of money. The typical solar energy system can save you tens of thousands of dollars over the next 20 years.

### Benefits of Going Solar:

- You can dramatically reduce or even eliminate your monthly electric bill
- Shield yourself from future energy rate increases by municipalities
- Take advantage of solar rebates and 30% federal tax credits
- Gain independence from your utility company
- Increase the value of your home without increasing property tax
- Create local jobs in the merging energy market
- Protect the environment
- Electricity production for 25+ years
