

Overhead Crane Solutions

Our expert technicians and project managers bring many years of experience, skill, and trade knowledge of overhead industrial crane systems to assist you with your material handling needs.

We are committed to providing a comprehensive and high level of service to keep your equipment operating safely and at its full potential.

Our services are competitively priced, and we can assist you with compliance to the latest OSHA safety regulations.

About Us

Established in 2012, Industrial Inspection & Services is licensed in both Oregon and Washington. Our mission is to offer high quality material handling solutions at competitive prices.

Our services include inspections, preventative maintenance, repairs, equipment sales and installations, modifications, operator training, and safety compliance assistance on overhead bridge, gantry, jib, and monorail crane systems.

We service all major hoist and crane brands and provide professional, full-color inspection reports. We stand behind our work and offer the industry's most competitive rates.
