D1.5, D1.6, and D1.8.**

**ASME BPVC Sect IX, ABS, AISC,
API, and Government Contracts**

Our knowledgeable inspectors, technicians, and specialized professionals have earned us a top-ranking reputation in the welding and fabrication industry for welding inspection and problem solving.

By offering a wide range of innovative, cost-saving solutions and training programs, we help bridge the gap from the beginning stages of production to the successful completion of projects.

We can solve your quality control, quality assurance, and procedure development issues and assist your company in meeting code and contract requirements.

Who We Are...

About Us

Industrial Inspection & Services (II&S) is a group of highly-skilled AWS Certified Welding Inspectors, educators, consultants, and ASNT NDT (Non-Destructive Testing) professionals. Our mission is to assist metal fabricators develop their businesses through improved quality management and efficient, cost-effective fabrication methods.

Let us assist your company with compliance to national standards and codes, weld testing, welding inspection, quality assurance services, quality control management, welder training, quality system compliance, welding management assistance, and PQR/WPS procedure development.

Ultrasonic Inspection

Our Products and Services

- Level II & III services for ASNT SNT-TC-1A and ANSI/ASNT CP-189 NDT
 - Visual (VT)
 - Ultrasonic (UT)
 - Magnetic Particle (MT)
 - Liquid Penetrant (PT)
- Planning and management of Procedure Qualification Records (PQR)
- Writing and reviewing Welding Procedure Specifications (WPS)
- Welder Qualification Testing
- Quality assurance services
- Training: Bolting, welding, NDE, quality systems, and quality control
- Welding planning quality control
- Destructive testing and failure analysis
- Evaluation and solutions for reject rates
- Inspection of field welding and bolting
- Quality Management Systems - manuals, procedures, forms, compliance, and certification assistance
- Professional reports and documents
- Access to a network of professionals for advanced services.
