

# Pasture Revitalization Options

## Pre-Season Soil Treatment - \$19/A

### HyprCycle, Worm Casting Tea - Enhanced

- HyprCycle unlocks tied-up nutrients, recycle them into plant available forms, and also offers biostimulation
- Worm Casting Tea adds large amounts of beneficial fungi and bacteria, acts as a force multiplier for HyprCycle, and adds Humic Acid which conditions the soil, regulates pH, and improves the uptake of water and nutrients

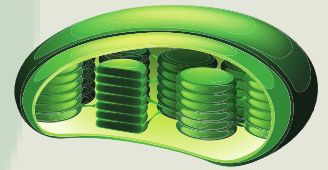

## Planting - In-Furrow & Seed Treatment - \$30/A

### HYPERGERM MAX Seed Treatment, aRISE Microbial Inoculant, Hi-Energy Fish, HyprGrow, Worm Casting Tea-Enhanced

- HYPERGERM MAX creates a biome around the seed to increase germination rates, consistency, and overall plant health in the early stages of growth
- aRISE Microbial Inoculant
- Hi-Energy Fish acts as dense microbe food that with high Volatile Fatty Acids that results in increased biological activity for your new crop and also enhances pathogen resistance
- HyprGrow stimulates biology to support Carbon and Nitrogen cycling in the soil and increase photosynthesis

## Biostimulation - Foliar Application - \$23.50/A

### HyprGrow, Worm Casting Tea - Enhanced, Hi-Energy Fish

- HyprGrow stimulates biology to support Carbon and Nitrogen cycling in the soil and increase photosynthesis
- Worm Casting Tea adds large amounts of beneficial fungi and bacteria, acts as a force multiplier for HyprCycle, and adds Humic Acid which conditions the soil, regulates pH, and improves the uptake of water and nutrients

## Burn Down - Nutrient Recycling - \$15/A

HyprCycle (see description above)
