

FAQs - Cosmetic Tattoo or Permanent Makeup

How does it work?

Our cosmetic tattoo artist gently deposit color pigments under the skin with a tattoo needle.

Does it hurt?

Topical anesthetics will be used during the procedure to numb the treated skin area; therefore, any discomfort you feel is minimal.

When will I see results?

Results are immediate. However, it takes a couple weeks for the pigment color to fully settle under the skin.

How soon can I go back to work?

Down time with cosmetic tattoo is minimal. Swelling and redness are typically mild and most people can return to their normal activities within 24 hours.

Who is Cosmetic Tattoo ideal for?

- Difficulty applying makeup
- Busy schedules
- Makeup allergies
- Active, sporty lifestyle
- A desire to look their best at all times
- Hair loss from chemo or radiation therapy
- Sparse or thinning eyebrows
- Undefined lash lines
- Fading or pale lips
