

Best Solutions For Bats

Lights do not work for long. The lights will attract the bugs which then attract the bats. Quickly bats become used to the lights. Our downward dimmer lights have even a less affect on the bats in our area.

Ultrasonic Sound: This Ultrasonic Bat Repellent works on a biological level by sending out ultrasonic waves to send bats. For a professional sonic sound (one that works), it will cost \$300.00 - \$500.00

And now we have '**Batman**'. Inexpensive and here is a caption from their website of what they do:

- Arizona Bat & Bird Solutions gives you the solutions to rid your house of bat & bird mess (droppings/feces/guano/urine).
- Clean & paint to remove staining from bat/bird droppings and urine.
- We can install netting to interrupt flight path to perch area.
- We can also install electronic chasers to interrupt their flight path so they do not perch on your home.

Here is their information:
