

GBF SentryLink Smart Intercom For Multi Tenants

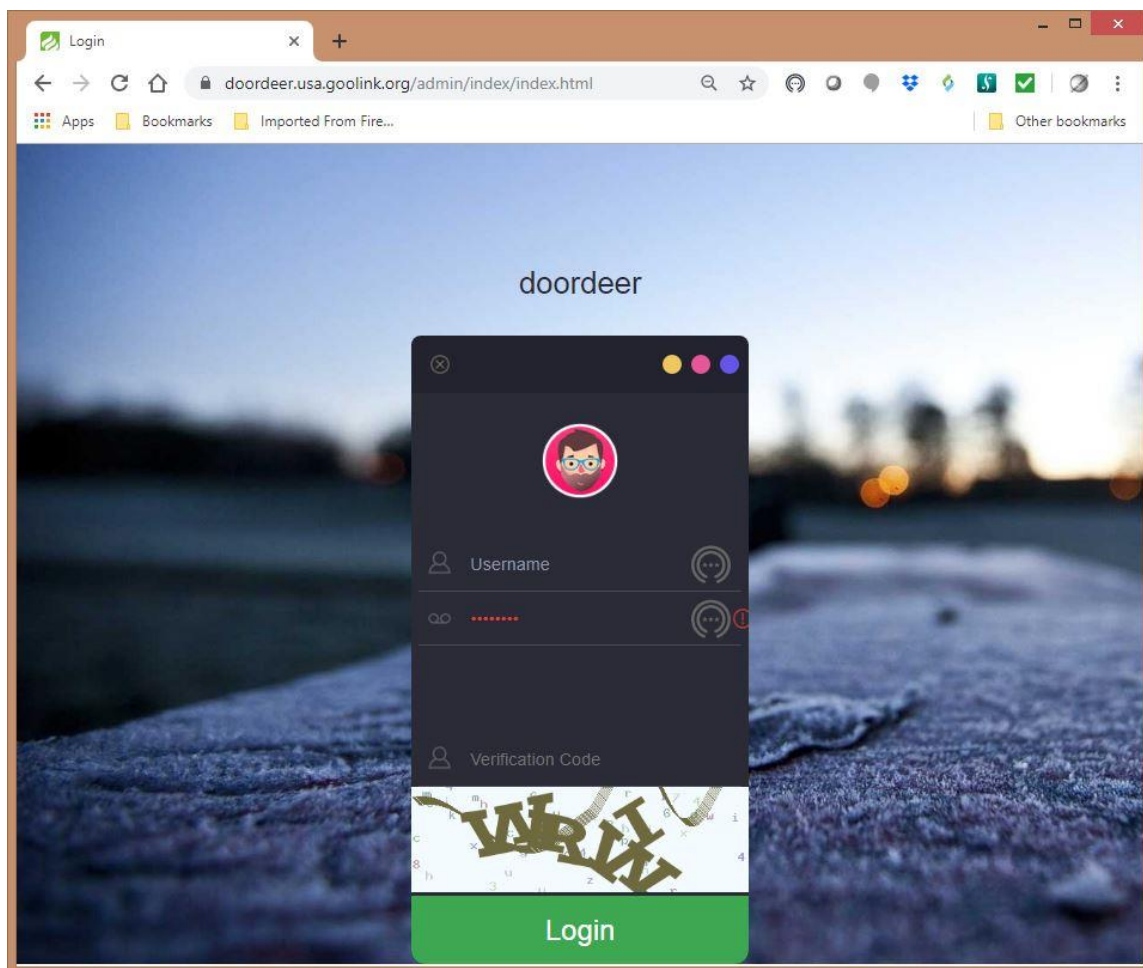

USER MANUAL

GBF™

Administrator/Property Manager Login Account:

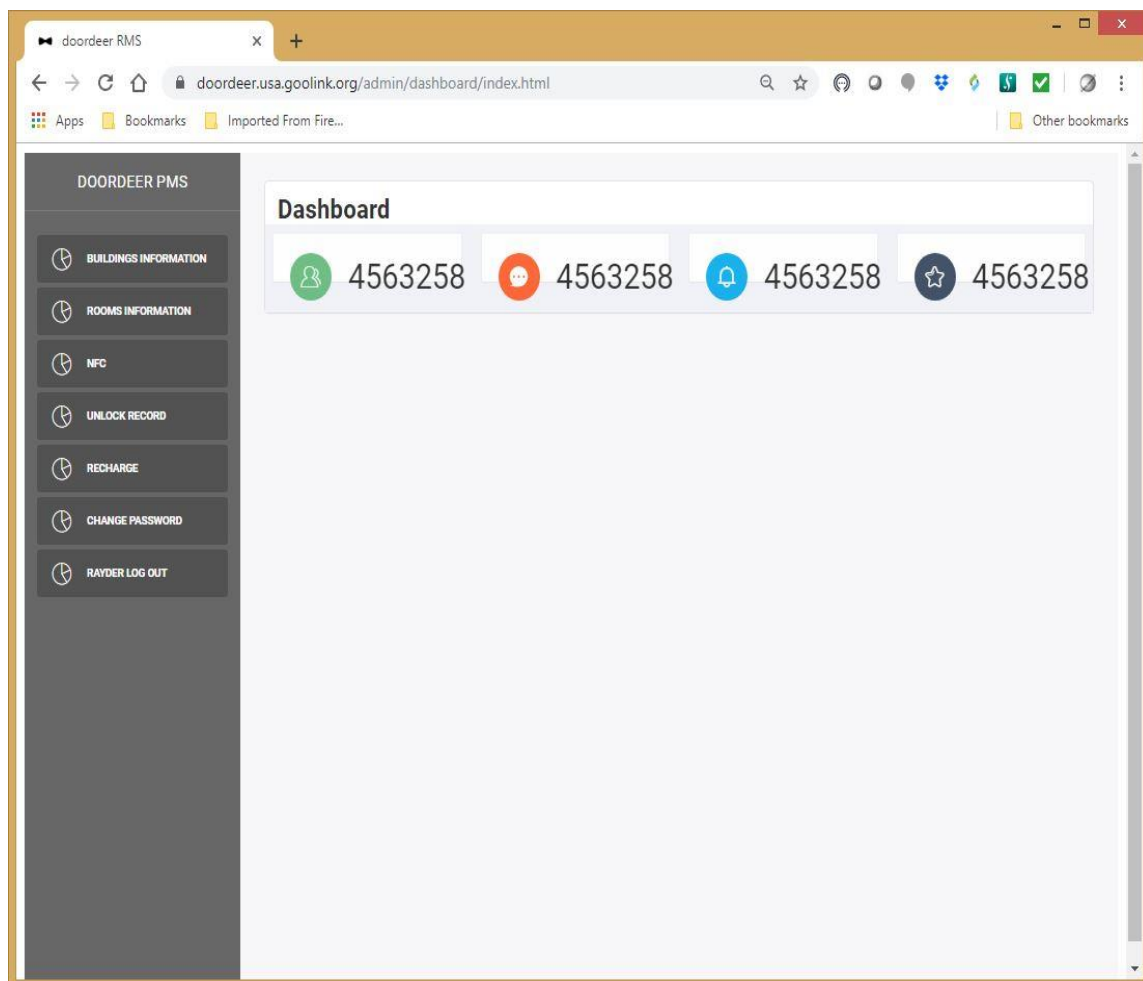

Initially, please supply the GBF support team at info@gbfelectronics.com with the name and email address that will be used for the system administrator/property manager login. After receiving an e-mail confirmation from the GBF support team, you may log in to the webpage at <https://doordeer.usa.goolink.org/admin/index/index.html> from which you will be able to add and manage all tenant and building information.

Property Manager Web Interface:

There are five main sections in the Property manager account:

- **Building Information**--- Contains the building information details: address, property manager phone, etc.
- **Room Information**--- Includes all tenant information such as name, email, phone number, directory display name, etc.
- **NFC**--- RFID keycard or keyfob management.
- **Unlock Record**--- Event log showing all call and unlock events
- **Change Password**--- Administrators/property managers can revise the webpage login password. The factory default password for the account is: 999999.

Building Information Page:

This section shows a summary list of all buildings linked to the administrator/property manager account. The list can be filtered by building, unit number, phone number, and email address. Full or filtered lists can be exported in a .csv or .xls file format, or printed directly.

The screenshot displays the Doordeer PMS interface. On the left is a dark sidebar with the following menu items: BUILDINGS INFORMATION, ROOMS INFORMATION, NFC, UNLOCK RECORD, RECHARGE, CHANGE PASSWORD, and RAYDER LOG OUT. The main content area is titled "Building Info" and features a search form with the following fields: Input Name, Select Company (dropdown), Input City, Input State, and Input Country. Below the search form is a table with the following data:

ID	Building	Company	Buildir	
75	Clarke Place	25	1	service

At the bottom of the table, there is a pagination bar with the text: "Prev 1 Next 10 /Page Total: 1".

Edit Building Information Page:

In this section, the administrator/property manager can edit the building name, building address, and building manager contact information. System wide NFC support can be enabled or disabled in this section.

The screenshot shows a web browser window with the URL `doordeer.usa.goolink.org/admin//Building.html`. The main content is a modal form titled "EDIT Building Information". The form contains the following fields and options:

- Building Name:** Text input field containing "Clarke Place".
- Building Type:** Dropdown menu with "Apartment" selected.
- QR Support:** Dropdown menu with "Support" selected.
- NFC Support:** Dropdown menu with "Support" selected.
- Send Report Support:** Dropdown menu with "Support" selected.
- DEVICE PHONE:** Text input field containing "6042858721".
- ADMIN PHONE:** Text input field containing "Building contac".
- ADDRESS:** Text input field containing "110A, 12811 Clarke Place".
- ZIP CODE:** Text input field containing "V6V 2H9".
- CITY:** Text input field containing "Richmc".
- STATE:** Text input field containing "British".
- COUNTRY:** Text input field containing "Canadr".
- TIMEZONE:** Dropdown menu with "PST(UTC-8)" selected.
- Affiliated company:** Dropdown menu with "Satman Management" selected.

A green "Submit" button is located at the bottom right of the form. The background shows a sidebar menu with options like "BUILDINGS INFORMATION", "ROOMS INFORMATION", "NFC", "UNLOCK RECORD", "RECHARGE", "CHANGE PASSWORD", and "RAYDER LOG OUT".

Room Information Page: (Tenant directory)

This section shows a summary list of all rooms in all buildings linked to the administrator/property manager account. Click the ‘Add’ icon to add a new room entry. Select an entry first if you wish to edit or delete a line entry. NFC keyfob/keycard serial numbers can also be configured to a room directly from this screen. The list can be filtered by building, unit number, phone number, and email address. Full or filtered lists can be exported in a .csv or .xls file format, or printed directly.

Note: A system generated virtual room called “Admin” with room number “0” is automatically generated during the initial configuration, and will not show in the outdoor station directory or require a cloud fee. It should not be deleted as it will be used in the future for generating PIN codes and NFC tags for personnel requiring regular access to the building (e.g. mail carrier, maintenance staff, etc).

The screenshot displays the 'Rooms Info' page in the Doordeer PMS. The page features a sidebar with navigation options: BUILDINGS INFORMATION, ROOMS INFORMATION, NFC, UNLOCK RECORD, RECHARGE, CHANGE PASSWORD, and RAYDER LOG OUT. The main content area includes a search and filter section with dropdowns for 'Select Building' and 'Select Company', and input fields for 'input Unit Label', 'input phone', 'input Owner Email', and 'input tenant Email'. Below this is a table of room entries with columns for ID, Building, UnitLabel, and NFC status. Each row has a checkbox for selection and a 'subscribe serv' button. The table shows units 427 through 421 at Clarke Place. A pagination bar at the bottom indicates 'Page 1 of 13'.

ID	Building	UnitLabel	NFC	subscribe serv
427	Clarke Place	Penthous	NFC	subscribe serv
426	Clarke Place	206	NFC	subscribe serv
425	Clarke Place	205	NFC	subscribe serv
424	Clarke Place	204	NFC	subscribe serv
423	Clarke Place	203	NFC	subscribe serv
422	Clarke Place	202	NFC	subscribe serv
421	Clarke Place	201	NFC	subscribe serv

Edit Room Information Page:

In this section, administrators/property managers can create master tenant accounts and suite numbers stored to the cloud database, forming the directory on the outdoor station. Each tenant will use their email address as the username for their account, which they will also use to log in to their APP to access the intercom system. Optionally, after creating and submitting the master account/suite, you may return to edit the name that will be displayed on the outdoor station. Once the entry is submitted, it is pushed to the outdoor station by the servers, which may take up to 10 minutes.

NFC Page:

This section shows a summary of all RFID access keycards or keyfobs for all buildings managed by this administrator/property manager account. The list can be filtered by building, unit number, and NFC serial number. Click the 'Add' icon to add a new RFID entry. Select an entry first if you wish to edit or delete a line entry. Full or filtered lists can be exported in a .csv or .xls file format, or printed directly.

Add/Edit NFC Info Page:

In this Section, administrators/property managers can add RFID keycard or keyfob access by entering the serial number of the RFID tag, and assigning each to a unit number. Any number of RFID tags can be assigned to an individual suite. Once the entry is submitted, it is pushed to the outdoor station by the servers, which may take up to 10 minutes.

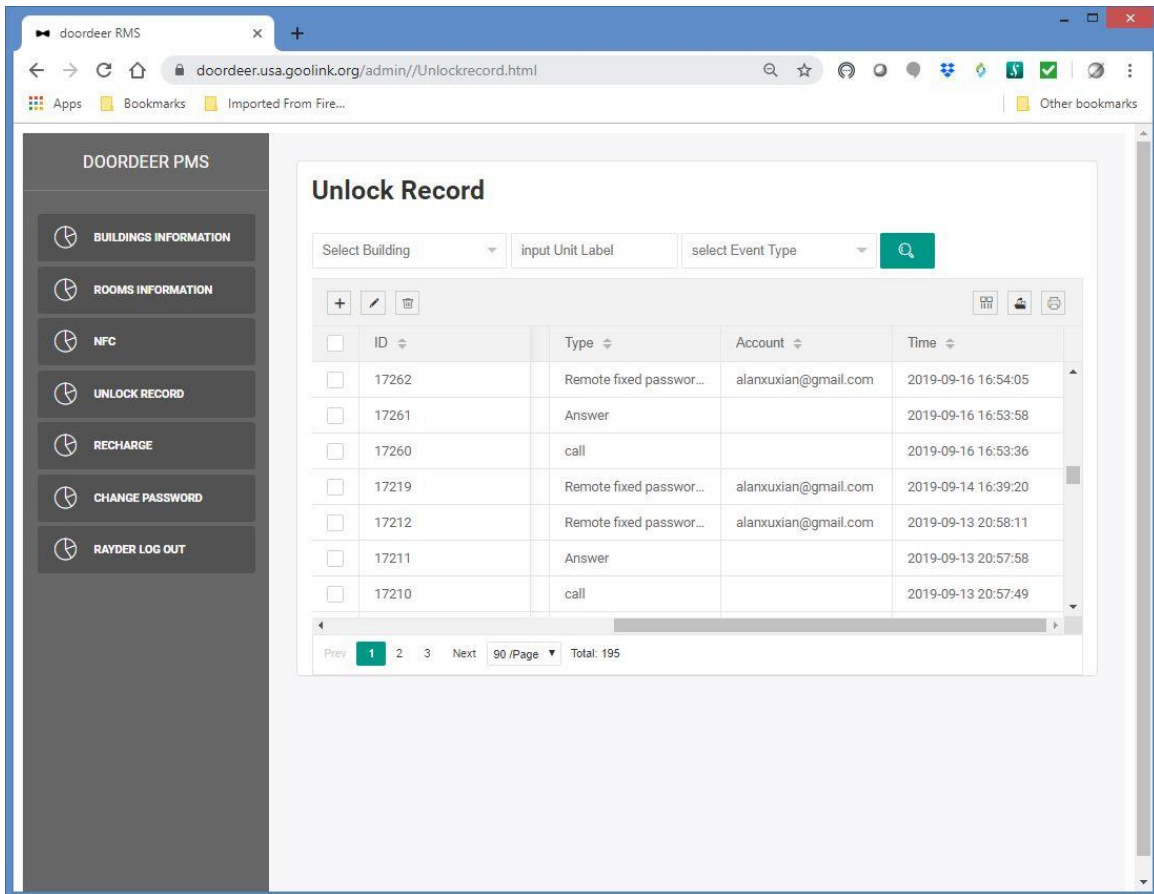

The screenshot shows a web browser window with the URL `doordeer.usa.goolink.org/admin//NFC.html`. The page title is "DOORDEER PMS". A sidebar on the left contains navigation options: BUILDINGS INFORMATION, ROOMS INFORMATION, NFC, UNLOCK RECORD, RECHARGE, CHANGE PASSWORD, and RAYDER LOG OUT. The main content area displays a modal form titled "Add NFC". The form includes the following fields:

- Building:** A dropdown menu with "Clarke Place" selected.
- Unit Label:** A dropdown menu with "106" selected.
- NFC Serial Number:** A text input field containing the placeholder text "NFC Serial Number".
- Account:** A text input field containing the placeholder text "Account".

A "Submit" button is located at the bottom right of the form.

Unlock Record (Event Log) Page:

In this section, administrators/property managers can recall daily SentryLink event history, including time-stamped unlock events and answered/missed calls. The results can be filtered by building, unit number, and any one of six event types; Call, Answer, Virtual key unlock, manual unlock (master account PIN entered at door station), remote fixed password unlock (unlock using the app), and NFC. Full or filtered lists can be exported in a .csv or .xls file format, or printed directly.

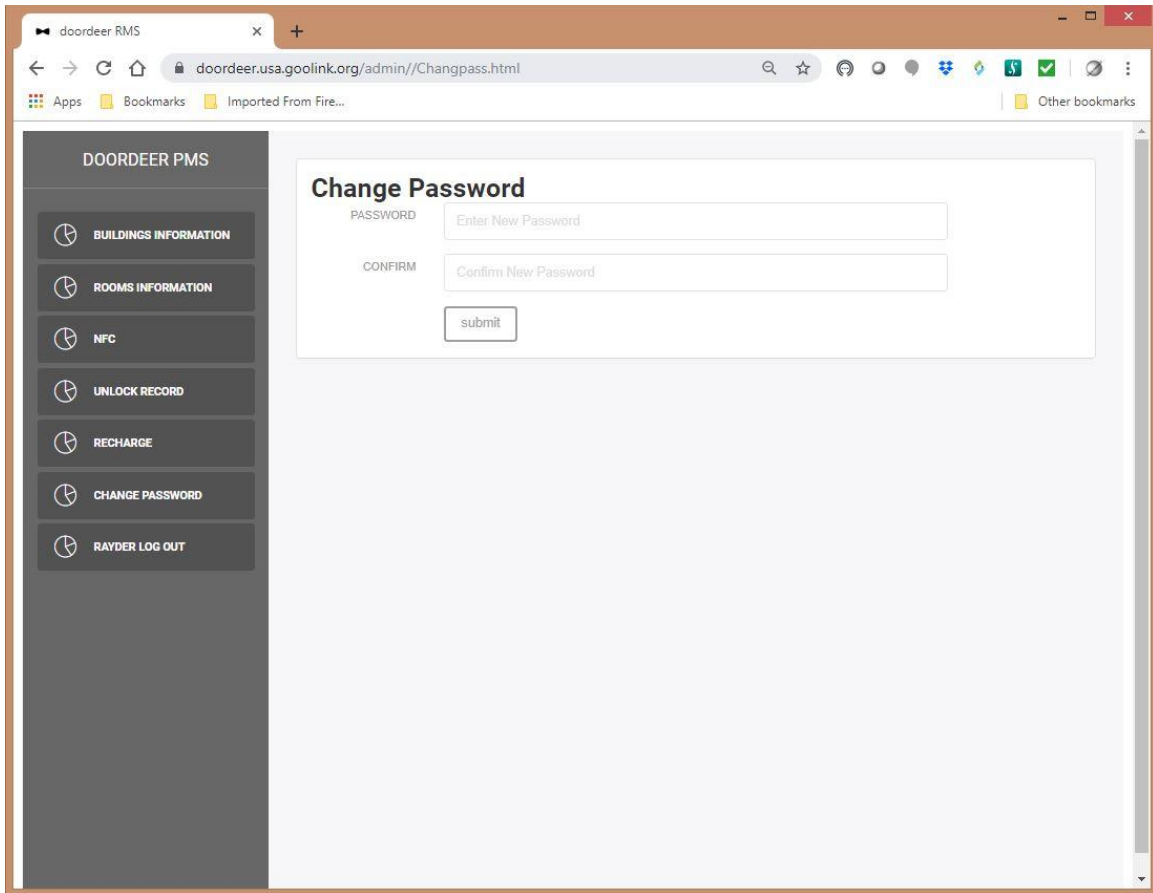

The screenshot displays the 'Unlock Record' page in the Doordeer PMS. The page features a sidebar with navigation options: BUILDINGS INFORMATION, ROOMS INFORMATION, NFC, UNLOCK RECORD (highlighted), RECHARGE, CHANGE PASSWORD, and RAYDER LOG OUT. The main content area includes a search bar with filters for 'Select Building', 'input Unit Label', and 'select Event Type'. Below the search bar is a table of unlock records with columns for ID, Type, Account, and Time. The table contains 8 rows of data. At the bottom of the table, there is a pagination control showing 'Prev', '1', '2', '3', 'Next', '90 /Page', and 'Total: 195'.

Change Password Page:

In this section, the administrator/property manager can change their login password for their account. The factory default password for the account is: 999999.

The screenshot shows a web browser window with the URL `doordeer.usa.goolink.org/admin//Changpass.html`. The page title is "DOORDEER PMS". On the left side, there is a vertical navigation menu with the following items: BUILDINGS INFORMATION, ROOMS INFORMATION, NFC, UNLOCK RECORD, RECHARGE, CHANGE PASSWORD, and RAYDER LOG OUT. The "CHANGE PASSWORD" item is highlighted. The main content area is titled "Change Password" and contains two input fields: "PASSWORD" with the placeholder text "Enter New Password" and "CONFIRM" with the placeholder text "Confirm New Password". Below these fields is a "submit" button.
