

WARREN TECH
Future Ready.

To Whom It May Concern:

It is my pleasure to submit a letter on behalf of Mr. Aidan Voigt. I have known Aidan for the past year. During this time I served as his Engineering Design and Build instructor as well as his High School Students United with NASA to Create Hardware (HUNCH) and Mathematics, Engineering, Science Achievement (MESA) advisor.

Aidan is a talented student. His assignments are unique and utilize a very thorough and professional look to the finished product. Aidan is always willing to help, both in class and during extracurricular activities. If he is selected to represent you, you will not be disappointed. His strengths in Engineering are but not limited to research, design and testing engineering. Being involved in HUNCH and MESA Aidan has had the ability to do that. His project on Lunar Worktable with power and the MESA Bag Transport Tank design has the potential to become a reality for future use. These projects help exemplify his ability to think outside the box which has helped him to become a very open minded student. His weaknesses are hard to come by but if I had to look hard and find one it is he needs to learn not to work so hard. He will burn out quickly if he is not challenged enough and kept motivated. This could be a positive for him and he will prove himself to be the best.

Aidan's personal qualities include determination, credibility and a willingness to assist others. He is respected by both his peers and educators. Aidan's professional qualities are, positive work ethic, self-motivation, and leadership skills.

Aidan has the personal and professional attributes to become an excellent ambassador to represent you. Please feel free to give me a call if you have any questions (303) 982-0690.

Sincerely,

Nathan Olsen
Engineering Design and Build Instructor
NASA HUNCH and MESA Advisor
