

THE DOUZAINE

Due to the slippage at La Coupée in January 2025 and the subsequent repairs, it is necessary to set a maximum weight for trailer loads. This will be reviewed with engineers as further inspections are carried out.

Carters, oil and sewage carriers have been informed. Fire and Ambulance have specific guidelines which will not delay any emergency call-outs.

If any carter or contractor has a need for a heavier load for a specific reason, please contact the Douzaine well in advance. Email douzaine@sarkgov.co.uk or via the Committee Office 01481 832118.

The following notices are being placed at either end of La Coupée.
