## **TAX SURGERIES - NEXT STEPS**

Sark's Policy & Finance Committee and the Tax Review (Special) Committee would like to extend their thanks to residents who have taken the time to attend the recent three Tax Surgeries, as well as those who have emailed or spoken directly with Conseillers. The level of engagement has been greatly appreciated, and the comments, questions and suggestions received will all feed in to the ongoing project of the Tax Review.

The next step is to review all the comments received at the Surgeries, in person and by email alongside the 2024 consultation results. This will guide the amendments and improvements to the initial proposals. These will be presented at a further set of Surgeries for further consultation around Eastertime.

Any changes to the tax system will need to be approved by Chief Pleas and drafted by the Law Officers. Given that, it is likely that only limited adjustments can be made to the tax system for 2027. Further changes would be for 2028 at the earliest.

Both Committees are committed to ensuring that the community is fully informed throughout this process. More detailed information, including financial modelling and explanatory material will be published in due course.

We are grateful for the continued interest and participation as we work together to develop a fair and sustainable tax system that benefits the community and secures Sark's future.
