

Notice

Dear Residents of Sark,

I have now received consumption figures from SEL for July and August and I have carried out the calculations described in the Appendix of the January 2021 Variation. These set the maximum electricity price per unit allowed in Sark for the month of October 2021 at 52p/kWh.

Although fuel prices remain higher than at the start of the year, electricity consumption in Sark is higher than assumed when the Variation was finalised in December 2020. Funds raised from the minimum usage charge to date are lower than anticipated on account of SEL granting exemptions to this charge, some of which were backdated.

The electricity price adjustment forms part of my continuing role in ensuring that the prices charged for electricity supplies in Sark are fair and reasonable. Full details of the calculations I have used are set out in the recent Variation to the Price Control Order (www.epc.sark.gg).
