

Alexander's Wish For Kids is a 501(c)3 non-profit in memory of Alexander Michael Dodson, a healthy and happy 19-month-old toddler who tragically passed away in December 2008 due to Sudden Unexplained Death in Childhood.

We are hosting our inaugural Aces for Alexander tennis fundraiser on May 4, 2025. Proceeds from our event will be used to fund scholarships for freshmen entering college in the fall of 2025.

Alexander should be turning 18 in May and heading off to college in the fall of 2025. We are sad to miss this important milestone with him and have decided to honor his memory with this fundraiser to help other freshmen heading to college this fall.

Sudden Unexplained Death in Childhood (SUDC) is a category of death in children between the ages of 1 and 18 that remains unexplained after a thorough investigation, including an autopsy. Most often, a seemingly healthy child goes to sleep and never wakes up.

At this time, we do not know what causes SUDC, how to predict it or how to prevent it. A medical examiner or coroner could rule a child's death SUDC when s/he completes a thorough evaluation and finds no other cause of death.

While statistics are difficult to assess given the nature of SUDC it is estimated by the CDC that 3 deaths per 100,000 among children between the ages of 1 and 19 are Unexplained. Over half of this number involves children between the ages of 1 and 4. This diagnosis has gone up over the years as education about SUDC among medical examiners has improved.

Based on CDC statistics gathered by the SUDC Foundation, 525 children in the U.S. were affected by sudden unexplained death in 2022, occurring in:

<b>279</b> children ages of 1-4 years	<b>65</b> children ages of 5-9 years	<b>38</b> children ages of 10-14 years	<b>143</b> teens ages of 15-18 years
