INSTRUCTIONS: Fill out form completely. Remove the screen from the kitchen faucet and sanitize the spout with Javex, alcohol or bacterial cleaner. Run the cold water approx. 10 minutes and fill the sterile bottle to 90% capacity. Return the sample to Aztech within 24 hours. Keep the sample refrigerated. **DO NOT FREEZE**. Chlorinated samples must be collected in bottles precharged with preservative. Client is responsible for sample integrity prior to submission. Samples that are collected, handled in a manner that is unfit for reliable results may not be tested. Turnaround Time: Potability testing results are typically ready at the end of the next business day. Aztech subcontracts chemistry testing. Aztech performs in house potability testing, but may subcontract when necessary.
