To Whom It May Concern:

I would like to offer my recommendation of Cody Rodgers for the scholarship you are awarding at Perry Technical Institute. Having had the opportunity to watch Cody perform in my Computer Aided Drafting (CAD) and Wood Technology classes at Kelso High School I can confidently recommend him for the scholarship.

I found Cody to be a quality student that always modeled excellence in the classroom. Cody was a very hard worker and was always to class on time and eager to learn. The work Cody did on his assignments and projects was always outstanding.

Cody was one of the most talented Computer Aided Drafting (CAD) and Wood Technology students I have had in my classes. Cody's ability to plan, design, and manufacture a product was well above the normal high school student. He used CAD software to create a set of plans for his projects. Cody also had proven to be very knowledgeable in woodworking and the tools, machines, and processes that it involves. Cody used Computer Aided Manufacturing (CAM) software to generate toolpaths for cutting out his projects using a Computer Numerically Controlled (CNC) machine. His advanced technical reading, applied math, woodworking, and CAD skills has allowed Cody to become a very mature, skilled young man.

In essence, I feel that Cody Rodgers would be highly deserving of the scholarship you are awarding. He has a bright future and will make good use of the scholarship as he pursues a career in Instrumentation at Perry Technical Institute.

Sincerely,
