I fully recognize the critical importance of protecting our students' data—not only from internal risks but also from external threats such as cyberattacks and hacking attempts. To safeguard against such threats, we have implemented the following robust cybersecurity measures:  
Advanced Firewall and Intrusion Detection Systems (IDS): We use enterprise-grade firewalls and IDS tools to monitor and block unauthorized access attempts in real time. Regular Security Updates and Patch Management: All our systems and software are regularly updated to close vulnerabilities that could be exploited by hackers. Data Encryption: Sensitive personal data is encrypted both in transit and at rest using strong encryption protocols (e.g., AES-256), rendering it unreadable to unauthorized users even if accessed. Multi-Factor Authentication (MFA): We enforce MFA across all administrative systems to ensure that stolen passwords alone cannot compromise accounts. Penetration Testing and Vulnerability Scans: We periodically engage cybersecurity professionals to test our systems for weaknesses and resolve any findings immediately. Secure Backups: Data is regularly backed up in encrypted form and stored offsite to ensure recovery in case of ransomware attacks or system breaches. Staff Awareness and Anti-Phishing Training: Our team is trained to detect and respond to phishing emails and other social engineering tactics commonly used by hackers. Incident Response Plan: In the event of a breach, we have a clear and immediate response protocol to contain, investigate, notify affected parties, and report to relevant authorities in accordance with the law. Protecting our students' data is not just a regulatory obligation—it's part of our commitment to integrity, professionalism, and trust in the high-risk industry we serve.

Shadow Defense CO. LTD would like to thank the three instructors for coming to Laos and bringing skill instruction and professional training to the cadets. At the same time, we would like to express our gratitude to CPU for this cooperation with our company,

This is the end of the short training, thanks to the hard work of the three instructors, this training camp can be successfully completed, the students also get a good exercise, they have made greater progress. Although the time spent with the three instructors during the training was very short, the skills brought to the trainees were lifelong, in the process, the trainees not only improved their physical fitness, but also exercised their inner spirit, formed a strong psychological quality, improved their sense of responsibility, and created a sense of collective honor.

Thanks to CPU and the three instructors, looking forward to working together next time!

## Referencia

Korom Krisztián testőri feladatokat látott el nálunk több alkalommal a Wyvern Images megbízásában. 2009-ben és 2010-ben a „Magic Boys” című nemzetközi film forgatásán Mr. Michael Madsen személyi testőre volt melynek keretében a forgatások alatt utazásainak, megjelenéseinek szervezése, védelme, kíséréte, volt a feladata illetve a sztár személyével kapcsolatos felmerülő problémák kezelése volt a munkája. Egyéb feladatai közé tartozott a produkció kreatív stábja és a magyar illetve nemzetközi színész gárda (Szabó Győző, Pindroch Csaba, Koltai Róbert, Winnie Jones, Tamer Hassan) részéről jövő kérések teljesítése.

2010-ben a CEU, Central European University, és a Google Budapesten rendezte 400 fő részvételével az „Internet at Liberty”, az internet szabadságáról szóló nemzetközi konferenciáját. Itt Korom Krisztián VIP személyvédelmi, biztonságtechnikai, kíséresi feladatokat látott el. A konferencián több politikus, védett személy és Martonyi János külügyminiszter úr is jelen volt.

Az eddigi együttműködések alkalmával, a forgatásokon, konferenciákon kiosztott feladatokat maximálisan látta el és a felmerülő problémákat meggyőzően, a helyzet biztos kezelésével oldotta meg akár többnyelvű környezetben is.
