smooth ride

The **Lightweight wheels** are constructed with aluminum hubs and rims, connected with stainless steel spokes.

Extremely smooth-running, robust, industrial ball bearings are sealed and maintenance-free.

Schwalbe BIG APPLE tires offer excellent riding comfort. The air cushion of the tire is used as a natural suspension. Inflated to 30 psi, a balloon bike tire rolls wonderfully easy and with full suspension. A normal tire would need to be inflated to 60 psi in order to roll just as easily. The Kevlar liner helps prevent puncture from thorns or glass.
