

apace | Fuse Kit

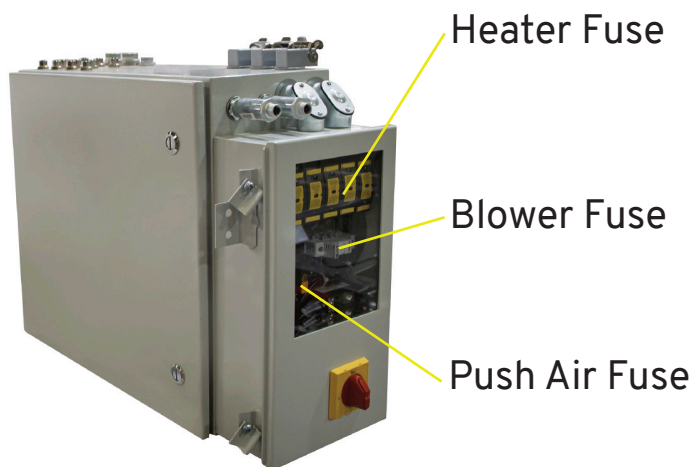

The **APACE Fuse Kit** contains the standard fuses for the **APACE** unit. If the **APACE** is handled properly, there should not be any need to change the fuses; however, in case a fuse does short out, it is always recommended to have spare fuses at hand. Our customer support team is available to walk you through any steps needed via phone (248-472-5650) or email (info@apacegrill.com).
