

PLINEST[®] *hair*

USING SCIENCE AND NATURE
TO REGENERATE SKIN AND HAIR
WITH POLYNUCLEOTIDES

PLINEST[®] *hair*

Suffering from a dry and itchy scalp? Is your hair thin and brittle?

Treatment with PLINEST[®] Hair polynucleotides HPT[™] could be your answer!

WHAT IS PLINEST[®] HAIR?

PLINEST[®] Hair is an injectable product that can improve your scalp condition and hair quality. It contains polynucleotides HPT[™], which are clinically proven to regenerate hair follicles. The ones used in Plinest Hair are known as PN-HPT

How does it work?

Polynucleotides are highly-purified DNA molecules extracted from fish. When we inject them into the skin, they reach the cells called fibroblasts.

These cells are responsible for the birth and regrowth of new hair follicles.

Are there any side effects?

As with any injection, you can expect your skin to be slightly red and swollen immediately after the **PLINEST® Hair** procedure. You may experience pin-prick bleeding, bruises and some itchiness, but it's important to avoid touching the treated area and washing your hair for at least 12 hours.

Polynucleotides have the ability to stimulate the fibroblasts to regenerate hair follicles, which improves scalp condition and hair quality, while allowing for better hair growth. PLINEST® Hair can also be used on the eyebrows.

WHAT HAPPENS DURING THE PROCEDURE?

Before you undergo treatment with **PLINEST® Hair**, your practitioner will cleanse the scalp and/or eyebrows being treated. They may then apply a numbing cream or cool compress to reduce pain before administering multiple injections across the treatment area.

HOW MANY PLINEST® HAIR TREATMENTS ARE NEEDED?

For best results, we advise four **PLINEST® Hair** treatments spaced one to two weeks apart. After that, it's recommended you have one treatment every three weeks for an additional four sessions.

CAN PLINEST® HAIR BE USED ALONGSIDE OTHER TREATMENTS?

PLINEST® Hair is an ideal treatment to have alongside other procedures such as hair transplants. It helps to boost hair quality, so new growth feels and looks so much better than before.

What results are expected?

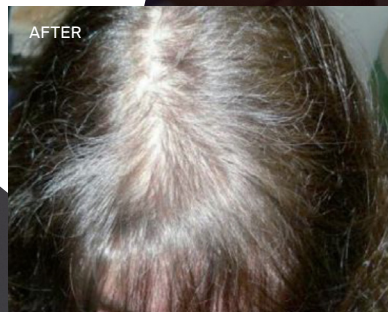

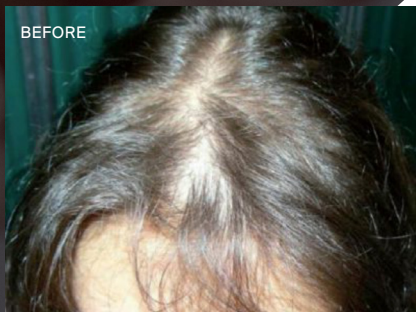

Following treatment with **PLINEST® Hair**, you can expect a less dry and itchy scalp with better quality hair growing through. Hair will be thicker, tougher and more supple, while looking fresh and rejuvenated.

Best results are noticeable after a course of treatments.
